Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Information and Current Analysis Unit, Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9606) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Sous-section de l'information et de l'analyse courante, Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9606) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

Most of the data published in this publication is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. The Databank identification numbers, by which data may be retrieved from CANSIM, are given in the headings of the relevant series in Tables in the publication. For further information on CANSIM call (613) 951-8200 or write Electronic Data Dissemination Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Margaret Parlor, Chief, Consumer Prices Section
- Harold Harnarine, Head, Information and Current Analysis Unit

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans cette publication peuvent être obtenues sous forme lisible par machine de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Les numéros d'identification de la Databank qui servent à retrouver les données de CANSIM sont inscrits à l'en-tête des séries respectives de la publication. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à, Division de la diffusion informatique des données, Statistique Canada, Immeuble R.H. Coats Building, Ottawa, K1A 0T6.

Cette publication a été rédigée sous la direction de:

- Michel Jacod, Directeur, Division des prix
- Margaret Parlor, Chef, Section des prix à la consommation
- Harold Harnarine, Chef, Sous-section de l'information et de l'analyse courante

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behaviour

First Quarter, 1992

Trends in the All-items Index

Between December 1991 and March 1992 (first quarter), the All-items Consumer Price Index (CPI) for Canada rose by 0.6% in seasonally adjusted terms. This latest performance represented a turn-around from the steady decline in rates noted over the previous four quarters. In seasonally adjusted terms, the CPI registered increases of 2.7%, 0.8% and 0.2% starting with the first quarter of 1991 and no change in the fourth quarter of 1991. The monthly increases in the latest quarter rose steadily from 0.1% in January to 0.2% and 0.4% in February and March respectively.

A similar pattern of movements was observed in the unadjusted quarterly changes. Starting in the first quarter 1991 the CPI rose by 3.0% followed by an increase of 1.0% in the second quarter and no change in the third quarter. In the fourth quarter of 1991, the index fell by 0.2% before advancing by 0.9% in the first quarter of 1992.

Movements calculated from 12-month changes showed that the All-items index on an annual basis had been increasing at a noticeably slower pace in the first quarter 1992 compared to previous quarters. The average of the 12-month rates of increase in the first quarter of 1992 was 1.6%. This followed steadily declining rates of increase down from 6.4% in the first quarter 1991 to 4.1% in the fourth quarter. The significantly lower annual rate of increase in the latest quarter was partly attributable to the termination of the one-time influence of the Goods and Services tax introduced into the CPI in January 1991

Contributions by Major Components.

Increases in the indexes for Food (1.4%), Clothing (2.8%) and Transportation (1.0%), exerted the largest upward pressures on the 0.9% unadjusted quarterly rise in the All-items index in the first quarter 1992. Increases in the Housing (0.3%) and Tobacco Products and Alcoholic Beverages (1.3%) indexes, although important, had a smaller impact in explaining the latest overall change. At the same time a rise of 0.5% in the Health and Personal Care index and a drop of 0.3% in the Recreation, Reading and Education index contributed marginally to explaining the overall increase.

Movements in the CPI may also be expressed in terms of a selected set of special breakdowns. For instance, in the first quarter 1992, the Goods index rose by 1.3% and accounted for three quarters of the total 0.9% change compared to a rise of 0.5% in Services which explained the remaining one quarter. The more important movements in the Goods index resulted from increases of 1.0% and 2.4% in the indexes for Non-durables and Semi-durables respectively.

The Energy index fell by a slight 0.2% in the first quarter while the All-items excluding Energy rose by 0.9%. However, the Food and Energy index combined resulted in a slightly higher 1.0% increase compared to the rise of 0.9% registered in the All-items excluding Food and Energy index.

Faits saillants

Comportement des prix à la consommation

Premier trimestre de 1992

Tendances de l'indice d'ensemble

Entre décembre 1991 et mars 1992 (premier trimestre), l'indice d'ensemble désaisonnalisé des prix à la consommation (IPC) pour le Canada augmente de 0.6%. Ce résultat constitue un retournement par rapport à la baisse des taux que l'on avait observée au cours des quatre trimestres précédents. Après désaisonnalisation, l'IPC enregistre des hausses de 2.7%, de 0.8% et de 0.2% à compter du premier trimestre de 1991, puis reste inchangé au quatrième trimestre de 1991. Les augmentations mensuelles au cours du dernier trimestre s'accélèrent de façon continue, passant de 0.1% en janvier à 0.2% et à 0.4% respectivement en février et en mars.

On observe une évolution semblable des variations trimestrielles avant désaisonnalisation. L'IPC augmente de 3.0% au premier trimestre de 1991, de 1.0% au deuxième et reste inchangé au troisième. Au quatrième trimestre de 1991, l'indice recule de 0.2% mais progresse de 0.9% au premier trimestre de 1992.

Les mouvements calculés à partir des variations sur douze mois révèlent que l'indice d'ensemble sur base annuelle a augmenté sensiblement moins rapidement au premier trimestre de 1992 que les trimestres précédents. La moyenne des taux d'augmentation sur douze mois au premier trimestre de 1992 s'établit à 1.6%. Elle fait suite à des taux d'accroissement qui reculent de façon continue, passant de 6.4% au premier trimestre de 1991 à 4.1% au quatrième. Le ralentissement appréciable du taux d'augmentation annuel au cours du dernier trimestre s'explique en partie par la disparition de l'incidence unique de la taxe sur les produits et les services caractérisant l'IPC de janvier 1991.

Contributions des principales composantes

L'augmentation des indices des aliments (1.4%), de l'habillement (2.8%) et des transports (1.0%) est la cause principale de l'augmentation trimestrielle brute de 0.9% de l'indice d'ensemble au premier trimestre de 1992. La hausse dans le cas des indices de l'habitation (0.3%) et des produits du tabac et des boissons alcoolisées (1.3%), bien qu'importante, explique dans une moindre mesure la dernière variation générale. Parallèlement, l'accroissement de 0.5% de l'indice de la santé et des soins personnels et la diminution de 0.3% de celui des loisirs, de la lecture et de l'éducation ont joué un rôle minime dans la progression générale.

Il est possible d'exprimer également les fluctuations de l'IPC en termes d'un ensemble choisi de ventilations spéciales. Ainsi, au premier trimestre de 1992, l'indice des biens augmente de 1.3% et compte pour les trois quarts de la variation totale de 0.9%, comparativement à une progression de 0.5% des services pour le quart restant. Les principaux mouvements de l'indice des biens sont attribuables respectivement à des hausses de 1.0% et de 2.4% des indices des biens non-durables et semi-durables.

L'indice de l'énergie baisse légèrement (-0.2%) au premier trimestre, tandis que l'indice d'ensemble sans l'énergie s'accroît de 0.9%. Toutefois, l'indice combiné des aliments et de l'énergie se traduit par une progression légèrement supérieure (1.0%) à celle enregistrée dans le cas de l'indice d'ensemble sans les aliments et l'énergie (0.9%).

Contributions by Lower-Level indexes.

The Food index advanced by 1.4% in the first quarter after dropping by 1.4% in the previous quarter. Most of the latest increase resulted from higher prices for Food Purchased from Stores, up 2.0%, from a decline of 2.3% reported in the previous quarter. The Food Purchased from Restaurants index climbed by 0.4% in the first quarter, compared to a 0.6% increase in the last quarter of 1991.

Much of the 2.0% advance in the index for Food Purchased from Stores was associated with higher prices for fresh vegetables, notably for salad type vegetables (tomatoes, lettuce, cucumbers and celery). Prices of such vegetables usually drop in March, but a cold, damp Spring in the growing areas of the United States caused the Fresh Vegetables index to advance by 27.0% in the quarter. Fresh Fruit prices were also up an average of 5.5% in the quarter, with most of the increase due to higher prices for bananas and apples. At the same time, lower prices were registered for most meat products, low-fat milk and eggs. Part of this decline was associated with a "price war" among grocery stores in February and March occuring in some Maritime Provinces, and parts of Québec and Ontario.

The Clothing index advanced by 2.8% in the first quarter of 1992 after a drop of 1.6% in the last quarter of 1991. The index had fallen in each of the last four months of 1991 but rose in each of the first three months of 1992 with the largest monthly increase registered in February. The successive price declines were associated with widespread price discounting and promotional activities to stimulate sluggish sales performance. The price increases in the latest months reflected a return to normal price levels.

The Transportation index, which remained unchanged in the fourth quarter of 1991, rose by 1.0% in the first quarter of 1992. A large part of the latest increase was due to a jump in the prices of new automobiles in March. Much of this resulted from adjustment in manufacturers' rebates, mostly on North American model cars. Automobile insurance premiums rose in four provinces (Québec, Alberta, British Columbia and Manitoba) while automobile registration fees were increased in three (Newfoundland, Québec and British Columbia) and drivers' permit renewal charges rose in New Brunswick. Travelling within the city became more expensive as the Toronto Transit Commission imposed a sharp fare increase in March. A large proportion of the upward pressure was offset by a drop of 3.5% in gasoline prices. These prices adjusted upwards due to tax increases implemented by Ontario, Québec and British Columbia and downwards due to falling demand and excess supplies of crude-oil. Price declines for new trucks and a drop in air fares also contributed, in a small way, to dampening the rise in the Transportation index.

The Housing index climbed by 0.3% in the latest quarter following a 0.2% rise in the previous quarter. Much of the upward pressures came from higher charges for electricity (mostly in Ontario) as well as from increased water rates across Canada and higher piped gas charges mainly in the Prairies and British Columbia. Charges on rented accommodation rose as well. This was partially offset by a decline of 0.6% in the Owned Accommodation index. Lower maintenance and repair charges, accompanied by continuing weaknesses in mortgage interest costs and the prices of new homes, explained the decline. Basic telephone services posted higher rates but this was offset partially by a decline in long distance telephone charges. Higher prices were also observed for postal services, child care services, furniture and household textiles. A noticeable price decline for detergent and soap was recorded.

Contribution des indices de niveau inférieur

L'indice des aliments augmente de 1.4% au premier trimestre de 1992, après avoir baissé de 1.4% le trimestre précédent. La plus grande partie de cette augmentation s'explique par la majoration du prix des aliments achetés au magasin (+ 2.0%), alors qu'il avait baissé de 2.3% le trimestre précédent. L'indice des aliments achetés au restaurant s'accroît de 0.4%, alors qu'il avait augmenté de 0.6% au quatrième trimestre de 1991.

La plus grande partie de la progression de 2.0% de l'indice des aliments achetés au magasin s'explique par le relèvement du prix des légumes frais, notamment des légumes pour les salades (tomates, laitue, concombres et céleri). Le prix de ces légumes diminue habituellement en mars, mais un printemps froid et humide dans les régions de culture des États-Unis devait se traduire par une hausse de 27.0% de l'indice des légumes frais au cours du trimestre. Le prix des fruits frais augmente lui aussi en moyenne de 5.5% au cours du trimestre, la plus grande partie de cette hausse s'expliquant par la hausse du prix des bananes et des pommes. Inversement, on relève une diminution du prix de la plupart des produits de la viande, du lait écrémé et des oeufs. Cette baisse s'explique en partie par une guerre de prix en février et en mars dans certaines provinces des Maritimes et des régions du Québec et de l'Ontario.

L'indice de l'habillement augmente de 2.8% au premier trimestre de 1992, après avoir baissé de 1.6% au quatrième trimestre de 1991. Il avait baissé au cours des quatre derniers mois de 1991 mais augmenté au cours de chacun de trois premiers de 1992, la hausse mensuelle la plus forte intervenant en février. Les baisses de prix successives sont reliées à des rabais généraux et des campagnes promotionnelles destinées à relancer les ventes. Les hausses des prix au cours des derniers mois marquent le retour à des niveaux de prix normaux.

L'indice des transports reste inchangé au quatrième trimestre de 1991 et augmente de 1.0% au premier trimestre de 1992. Cette dernière augmentation s'explique dans une large mesure par une hausse appréciable du prix des voitures neuves en mars. Elle s'explique en gros par les rajustements des rabais des fabricants, principalement sur les modèles nord-américains. Les primes d'assurance automobile augmentent dans quatre provinces (Québec, Colombie-Britannique et Manitoba), tandis que les frais d'immatriculation sont majorés dans trois autres (Terre-Neuve, Québec et Colombie-Britannique). Les frais de renouvellement des permis de conduire augmentent au Nouveau-Brunswick. Les transports urbains coûtent plus chers lorsque la Toronto Transit Commission impose une forte majoration des tarifs en mars. Une partie importante de la pression à la hausse se trouve neutralisée par une chute de 3.5% du prix de l'essence. Les prix sont rajustés à la hausse en raison de la majoration des taxes en Ontario, au Québec et en Colombie-Britannique et à la baisse à cause de la diminution de la demande et des approvisionnements excédentaires de pétrole brut. La diminution du prix des camions neufs et des tarifs aériens a contribué aussi, dans une faible mesure, à freiner la hausse de l'indice des transports.

L'indice de l'habitation augmente de 0.3% au cours du trimestre étudié, compartivement à 0.2% le trimestre précédent. Les pressions à la hausse proviennent principalement de la majoration des tarifs d'électricité (principalement en Ontario) ainsi que des tarifs d'eau au Canada et du gaz canalisé dans les Prairies et en Colombie-Britannique. Les frais du logement en location augmentent également. Une diminution de 0.6% de l'indice du logement en propriété a un effet modérateur. Le recul des frais d'entretien et de réparation et la faiblesse persistante des coûts hypothécaires et du prix des maisons neuves en sont les causes. Les services téléphoniques de base enregistrent une hausse des tarifs, qui est compensée en partie par un recul pour les appels interurbains. On observe une hausse de prix pour les services postaux, les services de garde d'enfants, les meubles et les articles ménagers en matière textile. Le prix du détersif et du savon baisse de façon appréciable.

The Tobacco Products and Alcoholic Beverages index rose by 1.3% (0.7% in the previous quarter) as cigarette prices increased 1.6% mostly due to tax increases in Québec and British Columbia. Prices of alcoholic beverages purchased from stores also increased by 1.4% traceable, in part, to tax increases in Québec.

The Health and Personal Care index (up 0.5%) and the Recreation, Reading and Education index (down 0.3%) each exerted a marginal effect on the latest change in the All-items index. Most of the increase in the former was due to higher prices for prescribed medicines and selected personal care supplies. In the case of the latter, the drop was explained by declines in the quotations on packaged holiday tours and in the prices of home-entertainment equipment.

L'indice des produits du tabac et des boissons alcoolisées s'accroît de 1.3% (0.7% le trimestre précédent), à cause d'une hausse de 1.6% du prix des cigarettes, résultant principalement de la majoration des taxes au Québec et en Colombie-Britannique. Le prix des boissons alcoolisées achetées au magasin augmente lui aussi de 1.4%, ce qui se rattache en partie aux hausses de taxes au Québec.

L'indice de la santé et des soins personnels (+ 0.5%) et celui des loisirs, de la lecture et de la formation (- 0.3%) exercent chacun un effet minime sur la dernière variation de l'indice d'ensemble. La hausse dans le premier cas s'explique principalement par le relèvement du prix des médicaments sur ordonnance et de celui de certains articles de soins personnels. Dans le deuxième cas, la diminution résulte d'une baisse du prix des voyages organisés, tout compris, et du prix du matériel de divertissement au foyer.

Introduction

This quarterly publication presents a compendium of consumer prices and price index related information of both a current and historical nature. It provides a wide range of timely and detailed statistical information and serves as a complement to the monthly publication, The Consumer Price Index, Catalogue 62-001.

Part I of this report presents a synopsis of current consumer price index movements. This is presented in the form of tabular and graphic information. Some tabular information on international prices is also presented, in particular for some Canada - U.S. comparisons.

Parts II and III provide a detailed historical summary of monthly consumer price indexes in recent years. This summary contains considerable disaggregated information, again in the perspective of both the urban Canada and the separate city contexts.

Part IV of this report contains tables for the All-items and seven major components for each province.

Place-to-place comparative retail price information forms Part V of the report. This segment presents the most recent data with regards to average city retail prices and inter-city indexes of retail price differentials. Special feature articles, which are periodically included in the publication, are presented in Part VI.

Appendices serve as sources of reference for the statistical data presented in the preceding segments of the report. Appendices 1 and 2 contain explanatory notes pertaining to consumer price index data; Appendix 3 provides reference material for seasonal adjustment methodology in the context of its application to the Consumer Price Index; Appendices 4 and 5 present background information relating to place-to-place retail price comparisons.

Introduction

Cette publication présente un résumé de renseignements historiques et courants des prix à la consommation et des indices de prix. Elle fournit une gamme d'informations statistiques étendue, d'une façon détaillée, et sert de complément à la publication mensuelle, L'indice des prix à la consommation, n° 62-001 au catalogue.

La partie I de ce rapport contient un aperçu synoptique qui présente les mouvements courants des prix à la consommation. Ces informations sont présentées sous la forme de tableaux et de graphiques. Des tableaux comportant de l'information sur les prix internationaux sont également présentés, particulièrement en ce qui regarde certaines comparaisons entre le Canada et les É.-U.

Les parties II et III fournissent un résumé historique détaillé des indices mensuels des prix à la consommation des dernières années. Ce résumé contient des renseignements pour le Canada et les villes à un niveau beaucoup plus désagrégé.

La partie IV de ce rapport contient des tableaux pour l'ensemble et les sept composantes principales pour chaque province.

Des informations sur les prix de détail comparés d'un endroit à l'autre composent la partie V de ce rapport. Cette section fournit les plus récentes données au sujet des prix de détail moyens par ville et des indices comparatifs des prix de détail entre les villes. Les articles spéciaux, qui font périodiquement partie de cette publication, se retrouvent à la partie VI.

Les appendices servent de référence aux données statistique présentées dans les parties précédentes du rapport. Les appendices 1 et 2 contiennent les notes explicatives reliées aux données de l'indice des prix à la consommation; l'appendice 3 fait référence à la méthode des ajustements saisonniers dans son application à l'indice des prix à la consommation; les appendices 4 et 5 fournissent des informations de base reliées aux comparaisons de prix d'un endroit à l'autre.

With the CPI for December 1991 a change in the seasonally adjusted procedure was introduced. Prior to this time the All-items seasonally adjusted CPI was calculated as an aggregate of its seasonally adjusted major component indexes with the exception of the Transportation index which was used in an unadjusted form. Recent examination of the Transportation index revealed the presence of some seasonality accurring particularly in the month of November when new automobile models are introduced into the CPI. As a result, the revised procedure now incorporates this index in a seasonally adjusted form. Owing to noticeable differences to the adjusted mouvement for November, the revised adjusted indexes are released with the December data. This is a slight departure from past practices when revised seasonally adjusted indexes were published with the release of the CPI for January.

Avec la publication de l'IPC de Décembre 1991, débute une nouvelle façon de faire l'ajustement saisonnier. Jusqu'à cette date, on calculait l'indice d'ensemble désaisonnalisé comme aggrégation des indices majeurs qui le composent, composantes qui avaient toutes été désaisonnalisées à l'exception de l'indice des transports. L'examen, récemment, de l'indice des transports révèle la présence de variations saisonnières, surfout en novembre quand les nouveaux modèles automobiles sont introduits dans l'IPC. En consèquence, la nouvelle méthode d'ajustement de l'indice d'ensemble incorpore maintenant l'indice des transports sous une forme corrigée des variations saisonnières. Parce que cette nouvelle méthode créait des différences appréciables de la variation de l'indice désaisonnalisé sont publiés en même temps que les données de décembre. Par le passé, les indices désaisonnalisés révisés étaient publiés avec les données de janvier.

For explanatory notes and detail, see Appendix 4.

Blanks appear on this table where the quality and (or) quantity of the prices were insufficient to produce a good average. Whitehorse is not included in weighted city averages.

As of October 1991, tenderloin removed in all cities.

Chicoutimi (450 g).

One package yielding 2.25 L in total.

Pour de plus amples renseignements et détails, consulter l'appendice 4.

Nous avons laissé les espaces en blanc dans ce tableau lorsque la qualité et (ou) la quantité des prix relevés ne nous a pas permis d'établir des moyennes fiables.

Whitehorse n'est pas inclus dans les moyennes pondérées des villes. À compter d'octobre 1990, les prix du bifteck de surlonge sans la partie du filet sont relevés dans toutes les villes. Chicoutimi (450 g). Un paquet donnant en tout 2.25 L

Appendix 1

THE CONSUMER PRICE INDEX

The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time. Changes in the costs of this basket are therefore due only to "pure" price movements, i.e., price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.

The Consumer Price Index for each city measures price change from one time period to another within that specific city. Thus, while city CPI's show the **movement** of prices over time in each city, they do not indicate price level differences between cities or between cities and Canada. Such inter-city price comparisons for a selected number of items sold in grocery stores for 26 cities are available at present in Part V of this publication. Inter-spatial indexes covering approximately two thirds of the CPI basket for a selected number of cities are also available in this section.

Coverage

Beginning with the December 1988 to January 1989 price change, the weights used in the Consumer Price Index are those pertaining to 1986 expenditure patterns. Data used for establishing these patterns were obtained through the 1986 Family Expenditure Surveys. The expenditure data represents the expenditures of all private households (families and individuals) living in Canadian urban centres with a population of 30,000 or more. Population estimates for 1986 revealed 82 such urban centres. Largely due to limitations on the availability of detailed information on consumer expenditures it has become necessary to group the 82 urban centres into 34 urban centre strata. An urban centre stratum may be interpreted as a geographical unit around which the sampling framework of the CPI is constructed.

Separate CPI's are published for 18 of these centres which, together, accounted for approximately 75% of the total 1986 current consumption expenditures reported in the 82 centres. These 18 centres were, in part, selected in order to permit the publication of at least one CPI in each province. Some 300 commodities are priced in each of these 18 cities while in the remaining 64 urban centres, the number of commodities surveyed is fewer, with clothing and home furnishings being the notable exclusions.

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION

L'indice des prix à la consommation (IPC) mesure la variation dans le temps, exprimée en pourcentage, du coût à l'achat d'un "panier" constant de biens et de services, qui représente les achats faits par un groupe particulier de la population au cours d'une période donnée. Le "panier" renferme des biens et des services de quantité et de qualité invariables ou équivalentes et dont les prix sont mesurables au cours du temps. C'est ainsi que les variations de son coût résultent uniquement des mouvements "purs" de prix, c.-à-d. des mouvements de prix qui ne sont pas attribuables à des changements de qualité ou de quantité des biens et services de consommation du panier.

L'indice des prix à la consommation de chaque agglomération urbaine mesure les variations de prix entre deux périodes dans cette agglomération. Aussi les IPC des villes indiquent-ils le **mouvement** des prix dans le temps dans chaque agglomération, mais non les différences de niveau des prix entre les villes ou bien entre les villes et le Canada. De telles comparaisons entre les villes en ce qui concerne les niveaux de prix de certains articles vendus dans les épiceries sont présentées, pour 26 villes, à la Partie V de la présente publication. On y trouve également, pour certaines villes, des indices interspatiaux portant sur les deux tiers environ du panier de l'IPC.

Champ d'observation

À compter de janvier 1989, les pondérations utilisées pour l'indice des prix à la consommation se rapportent à la composition des dépenses de 1986. Les données qui ont servi à établir cette composition proviennent des enquêtes sur les dépenses des familles de 1986. Les données sur les dépenses représentent les dépenses de tous les ménages privés (familles et personnes seules) qui habitent les centres urbains du Canada qui comptent 30,000 habitants ou plus. D'après les estimations démographiques pour 1986, 82 centres urbains répondent à ce critère de population. En raison principalement du manque de renseignements détaillés sur les dépenses des consommateurs, il a été nécessaire de grouper les 82 centres urbains en 34 strates de centres urbains. Une strate de centres urbains peut se définir comme une unité géographique à partir de laquelle est constituée la base de sondage de l'IPC.

Des IPC distincts sont publiés pour 18 centres qui, ensemble, interviennent pour près de 75% du total des dépenses courantes de consommation déclarées en 1986 par les 82 centres. Les 18 centres ont été choisis, en partie, parce qu'ils permettent la publication d'un IPC au moins dans chaque province. On relève les prix de quelque 300 produits dans chacune des 18 villes; ce nombre est plus faible dans les 64 centres restants, les produits exclus étant principalement l'habillement et les articles d'ameublement.

Prices

The prices used in the calculation of the CPI are retail prices without regard to whether they are described as regular, special, etc. inclusive of all sales and excise taxes applicable to individual commodities. The pricing cycle starts in the latter part of each month and extends to the middle part of the following month. Although prices for most CPI items are collected on a monthly basis, some are priced less frequently, e.g., property taxes, automobile registration fees, dry cleaning services. However, such goods or services scheduled for pricing at less than monthly intervals will be priced in any month when there is evidence to suggest that significant price changes may occur prior to the next regularly scheduled pricing. Prices of food items, some of which are quite volatile from week to week are collected twice monthly, in the first and the third week of each month. This twice-a-month pricing is done in sixteen cities and goes a long way to fulfilling the needs of a more representative measure of monthly price changes for commodities whose prices tend to fluctuate in a noticeable fashion within the course of a month. The number of prices observed in a given city depends upon the importance of that city's expenditures to the total Canada expenditure and also the nature of the commodity, with those commodities displaying a high variability of price change generally requiring more observations. The selection of outlets in which prices are to be collected is judgmental (other than for rents) with the sample being designed to cover volume selling establishments.

Weights and Linking

The weights used in the calculation of the Consumer Price Index are periodically updated. This is a necessary procedure which serves to ensure that weights reflect changes in consumer expenditures thereby maintaining the relevancy of the index. As a result, different weighting systems are in effect in different time periods.

The 1982 family expenditure patterns were used to compile the CPI from January 1985 to December 1988. In January 1989 the 1982 weights were replaced by those derived from the expenditure patterns of 1986. This updating continues the policy of updating on a four-year cycle.

Prix

Les prix servant au calcul de l'IPC sont les prix au détail qu'il s'agisse de prix réguliers, de prix spéciaux, etc. et englobent toutes les taxes de vente, d'accise et autres taxes imposées aux produits. Le cycle des relevés commence vers la fin de chaque mois et se termine au milieu du mois suivant. Les prix de la plupart des articles de l'IPC sont recueillis chaque mois, mais certains articles sont observés moins souvent, notamment l'impôt foncier, l'immatriculation d'automobiles, le nettoyage à sec. Cependant, dans le cas des biens et services dont l'observation est prévue à des intervalles de plus d'un mois, on en relèvera le prix dans tout mois où il apparaît qu'une variation importante se produira avant le prochain relevé prévu au calendrier. Les prix des produits alimentaires, qui affichent dans certains cas une grande instabilité d'une semaine à l'autre, sont observés deux fois chaque mois au cours de la première et de la troisième semaine du mois. Ce relevé bimensuel est réalisé dans seize villes et permet dans une large mesure de mieux suivre l'évolution mensuelle des prix pour les produits dont les prix ont tendance à fluctuer sensiblement au cours d'un mois. Le nombre de prix observés dans une ville donnée dépend de l'importance des dépenses de cette ville par rapport au total des dépenses pour le Canada ainsi que de la nature du produit, les observations étant généralement plus fréquentes pour les produits dont les prix varient beaucoup. Le choix des points de vente où les prix doivent être recueillis est fait au jugé (sauf pour les loyers) et l'échantillon a pour but de couvrir les établissements à gros volume de vente.

Pondérations et enchaînement

Les pondérations utilisées dans le calcul de l'indice des prix à la consommation sont mises à jour périodiquement. Ce procédé est nécessaire pour que les pondérations tiennent compte des changements qui s'opèrent au niveau des dépenses à la consommation et, par le fait même, pour que l'indice conserve son utilité. En conséquence, différents schémas de pondérations sont utilisés pour des périodes de temps distinctes.

La composition des dépenses des familles de 1982 a servi au calcul de l'IPC à partir de janvier 1985 jusqu'à décembre 1988. En janvier 1989, les pondérations de 1982 ont été remplacées par d'autres dérivées de la composition des dépenses de 1986. Cette mise à jour poursuit la politique de Statistique Canada de mettre à jour les pondérations régulièrement à tous les quatre ans.

TEXT TABLE II. Comparison of 1982 and 1986 Expenditure Weights Used in the Consumer Price Index, by Major Component for Canada

TABLEAU EXPLICATIF II. Comparaison des pondérations des dépenses de 1982 et de 1986 utilisées pour l'indice des prix à la consommation, par composante principale pour le Canada

Major components	Weights 1982	Weights 1986
Composantes principales	Pondérations 1982	Pondérations 1986
All-items - Ensemble	100.00 ¹	100.00 ¹
Food - Aliments	20.02	18.05
Housing - Habitation	38.14	36.32
Clothing - Habillement	8.37	8.69
Transportation - Transports	15.75	18.29
Health and personal care - Santé et soins personnels	4.02	4.20
Recreation, reading and education – Loisirs, lecture et formation Tobacco products and alcoholic beverages – Produits du tabac et boissons	8.25	8.84
alcoolisées	5.45	5.60

¹ Figures may not add up due to rounding.

The weights shown in Text Table II represent expenditures in 1982 (1982 quantities valued in 1982 prices) and in 1986 (1986 quantities valued in 1986 prices). They cannot be used to reconstruct or reaggregate indexes on a 1981 = 100 time base. The methodology required to permit such a reaggregation can be obtained on request by contacting the:

Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Telephone: (613) 951-9606).

The indexes based on 1986 weights were linked or connected in December 1988 to the appropriate indexes based on 1982 weights which had been in use since January 1985.

This linking procedure ensures that conceptually equivalent series are made continuous over time. It should be noted that the linking method is such that aggregate indexes cannot be considered as the direct average of their respective component indexes. In exceptional cases, this may cause the level, as well as the percentage changes, of an aggregate index to fall slightly outside the range of its component indexes.

Les pondérations du tableau explicatif II représentent les dépenses en 1982 (quantités et prix de 1982) et en 1986 (quantités et prix de 1986). Elles ne peuvent servir à reconstruire ni à réagréger des indices sur la base de 1981 = 100. La méthode à suivre pour une telle reconstruction peut être obtenue sur demande auprès de la:

Section des prix à la consommation Division des prix, Statistique Canada Ottawa (Ontario) K1A 0T6 (Téléphone: (613) 951-9606).

Les indices fondés sur les pondérations de 1986 ont été enchaînés ou raccordés en décembre 1988 aux indices correspondants fondés sur les pondérations de 1982, en usage depuis janvier 1985.

Grâce à cet enchaînement, des séries équivalentes sur le plan conceptuel sont continues dans le temps. On notera que cette méthode d'enchaînement ne permet pas de considérer les indices composés comme des moyennes directes de leur composante respective. Dans des cas exceptionnels, le niveau et les variations en pourcentage d'un indice agrégé peuvent ainsi dépasser légèrement l'étendue des indices composantes.

¹ Les chiffres ayant été arrondis, les totaux peuvent ne pas correspondre.

Time Base

The All-items Consumer Price Index for Canada and each index city is expressed in terms of 1986 = 100, except for certain items, as noted, where the pricing survey was introduced subsequent to that year. The 1986 = 100 time base became effective with the release of the June 1990 index. The base period for the Consumer Price Index, as well as for other Statistics Canada index series, is revised periodically.

Rebasing the CPI is a straightforward arithmetic operation which does not change the picture of economic events. Percentage changes computed will be the same, except for small differences due to rounding, regardless of whether the 1981 = 100 or 1986 = 100 time base is used. Rebasing of the CPI does not involve changes in the base period expenditure weights. Furthermore, the method employed in converting to the 1986 = 100 time base does not affect the continuity or statistical comparability of the index series.

It should be noted, however, that although the percentage changes in an index series will be the same, except for small differences due to rounding, regardless of whether they are computed from the 1981 or 1986 time base series, the same is not true for changes measured in terms of index points.

Current Annual Rate of Change

A rate of change representative of an annual movement in prices may be derived in several ways, none of which is free of shortcomings and interpretational problems. Statistics Canada presently calculates three measures of annual change, the percentage change between any given month and the same month a year ago, the percentage change between annual averages based on a calendar year and the current annual rate of change.

The method selected for calculating the current seasonally adjusted annual rate of change in the CPI in Table 1 involves compounding the growth rate over the latest three-month period on the seasonally adjust ed level (see Appendix 3). For more information on CPI growth rates, see "A Note on the Current Annual Rate of Change of the Consumer Price Index", **Retail Prices and Living Costs** – Service Bulletin (Catalogue 62-005), Vol. 4, No. 4, April 1975.

Reconstructed Indexes

With the release of the January 1985 Consumer Price Index, certain series were reconstructed historically to reflect the introduction of the Consumer Classification System of Statistics Canada which was introduced with the 1982 Updating. A few additional reconstructions were made with the introduction of the 1986 basket. For further information, contact Prices Division (613-951-9606 or 951-3353).

Période de base

L'indice d'ensemble des prix à la consommation du Canada et les indices de chaque ville sont exprimés sur la base de 1986 = 100, sauf pour certains articles, qui sont signalés et dont l'enquête sur les prix n'a été introduite qu'après cette année là. La base temporelle de 1986 = 100 est devenue effective à partir de la diffusion de l'indice de juin 1990. La période de base pour l'indice des prix à la consommation, et pour d'autres séries d'indices de Statistique Canada, fait l'objet d'une révision periodiquement.

Pour recalculer la base de l'IPC, il suffit d'effectuer une opération arithmétique simple qui ne modifie pas le tableau des événements économiques. Les variations en pourcentage calculées sur la base 1981 = 100 et 1986 = 100 sont équivalentes, les petites différences étant attribuables à l'arrondissement. Le calcul de la nouvelle base de l'IPC ne change pas les pondérations des dépenses de la période de base. De plus, la méthode de conversion selon la base 1986 = 100 ne compromet pas la continuité ou la comparabilité statistique des séries d'indices.

Toutefois, même si les variations en pourcentage d'une série d'indices seront identiques, à quelques différences d'arrondissement près, quelle que soit la base (1981 ou 1986) utilisée pour les calculer, tel ne sera pas le cas de ses mouvements exprimés en points.

Taux de variation annuel courant

Plusieurs méthodes permettent de dériver un taux de variation pour représenter le mouvement annuel des prix, mais toutes comportent des points faibles et des problèmes d'interprétation. Statistique Canada calcule actuellement trois mesures de la variation annuelle, soit le changement en pourcentage pour un mois donné par rapport à un autre et au mois correspondant de l'année précédente, le changement en pourcentage entre des moyennes annuelles basées sur l'année civile et le taux de variation annuel courant.

La méthode retenue pour calculer le taux de variation annuel courant après désaisonnalisation de l'IPC au tableau 1 consiste à prendre un taux de croissance composé sur le niveau désaisonnalisé des trois derniers mois (voir appendice 3). Pour plus de renseignements sur le taux de croissance de l'IPC, se reporter à "Note sur le taux annuel courant de l'indice des prix à la consommation", **Prix de détail et coût de la vie** - Bulletin de service (n° 62-005 au catalogue), vol. 4, n° 4, avril 1975.

Indices reconstruits

À compter de l'émission de l'indice des prix à la consommation de janvier 1985, certaines séries historiques ont été reconstruites de façon à ce qu'elles représentent l'introduction du système de classification de la consommation de Statistique Canada qui fut introduit avec la mise à jour de 1982. L'adoption du panier de 1986 a amené quelques autres remaniements. Pour plus de renseignements, communiquez avec la Divison des prix (613-951-9606 ou 951-3353).

Whitehorse and Yellowknife

In keeping with its commitment to publish consumer price indexes for at least one urban centre in each province and territory, Statistics Canada, as part of the 1978 Updating, began to develop consumer price indexes for the urban centres of Whitehorse and Yellowknife. As no Family Expenditure Survey was conducted in these centres in 1978, 1972 expenditure patterns for these two centres were extrapolated to 1978 using the change in expenditure patterns between 1972 and 1978 in other urban centres. As the 1978 expenditure patterns were incorporated into the official CPI, commencing with the release of the April 1982 index, consumer price indexes for Whitehorse and Yellowknife were developed on a March 1982 = 100 time reference base. Since the expenditure patterns for Whitehorse and Yellowknife were derived and not directly observed, the indexes for these two urban centres were not included in the calculation of the official CPI for Canada. With the introduction of the 1982 Updating, these two centres were included in the calculation of the official CPI for Canada.

It was not possible, at this time, to develop an owned accommodation index for these two centres comparable to that in concept of the national CPI. The nature and the relatively small size of the housing market in these two centres is such that Statistics Canada was unable to construct reliable price indexes for new houses. It was decided that as an interim and only available alternative measure, the price movement of rental accommodation would be used to represent that of owned accommodation. As a consequence, the All-items indexes published for these centres are not comparable to those for Canada or for any of the sixteen urban centres for which a CPI is produced. The rent data used are collected on a quarterly basis by the respective territorial governments. For rents, the data are incorporated into the consumer price indexes for these two centres with a two-month lag.

Provincial CPI's

Consumer price indexes for provincial urban centres were published for the first time in the July-September 1988 issue of this publication. An article describing the coverage and method of these indexes was published in the same issue. Updated Provincial CPI's are now a permanent feature of this publication.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in **The Consumer Price Index**, **Reference Paper**, **Updating Based on 1986 Expenditures**, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in Family Expenditure in Canada, 1986, Catalogue 62-555.

Whitehorse et Yellowknife

Statistique Canada, conformément à son engagement de publier des indices des prix à la consommation pour au moins un centre urbain dans chaque province et territoire, a commencé à élaborer des indices de prix à la consommation pour les centres urbains de Whitehorse et Yellowknife dans le cadre de la mise à jour de 1978. Puisqu'il n'y a pas eu dans ces centres d'enquête sur les dépenses des familles en 1978, les données sur la composition des dépenses de 1972 pour ces deux villes ont été extrapolées pour l'année 1978 en se fondant sur l'évolution de la composition des dépenses entre 1972 et 1978 dans d'autres centres urbains. Étant donné que la composition des dépenses de 1978 a été incorporée dans l'IPC officiel à la consommation avec l'indice d'avril 1982, les indices des prix à la consommation pour Whitehorse et Yellowknife ont été élaborés sur la base mars 1982 = 100. La composition des dépenses pour Whitehorse et Yellowknife ayant été dérivée plutôt qu'observée directement, les indices pour ces deux centres urbains n'étaient pas compris dans le calcul de l'IPC officiel pour le Canada. Avec l'introduction de la mise à jour de 1982, ces deux centres ont été pris en compte lors du calcul de l'IPC officiel pour le Canada

Il n'a pas été possible d'élaborer, pour ces deux centres, un indice du logement en propriété qui soit conceptuellement comparable à celui incorporé à l'IPC national. La nature et la petitesse relative du marché de l'habitation dans ces deux centres ont empêché Statistique Canada de construire des indices de prix fiables pour les maisons neuves. Comme c'est la seule mesure disponible, il a été décidé d'utiliser, pour le moment, le mouvement des prix du logement en location pour représenter celui du logement en propriété. En conséquence, les indices d'ensemble publiés pour ces centres ne sont pas comparables à ceux du Canada ou d'aucun des seize autres centres urbains pour lesquels un IPC est calculé. Les données sur les loyers utilisées sont recueillies trimestriellement par les deux administrations publiques territoriales. S'agissant des loyers, les données pour ces deux centres sont incorporées aux indices de prix à la consommation avec deux mois de retard.

IPC Provinciaux

Des indices de prix à la consommation pour les centres urbains provinciaux ont été publiés pour la première fois dans le numéro de juillet-septembre 1988 de la présente publication. Un article décrivant la couverture et la méthodologie de ces indices est paru dans ce même numéro. Les IPC provinciaux mis à jour sont devenus partie intégrante de la présente publication.

Renseignements supplémentaires et publications connexes

Le Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986, (hors-série), n° 62-553 au catalogue, décrit en détail les méthodes et les concepts de l'IPC. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans Dépenses des familles au Canada, 1986, n° 62-555 au catalogue.

The latest information on the Consumer Price Index for Canada and 18 cities is also available in the **Consumer Price Index**, Catalogue 62-001 monthly. In addition, selected educational and promotional material are available. For these and further information contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606 or 613-951-3353).

De plus, les derniers renseignements sur l'indice des prix à la consommation du Canada et de 18 villes sont publiés dans le bulletin mensuel **L'indice des prix à la consommation**, n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606 ou 613-951-3353).

Appendix 2

THE PURCHASING POWER OF THE CONSUMER DOLLAR

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

Changes in the purchasing power of the consumer dollar, put simply, are inversely related to movements in the Consumer Price Index. For example, between 1986 and June 1990, consumer prices as measured by the CPI rose 19.2% such that, goods and services which could have been purchased for \$100.00 in 1986 would cost \$119.20 in June 1990. Each consumer dollar in June 1990 therefore buys less than in 1986. The extent to which the purchasing power of the dollar has declined is matched precisely by the increase in the consumer price index. Thus the purchasing power of a dollar in June 1990 compared to the 1986

dollar was 83.9 (100 cents X
$$\frac{100.0}{119.2}$$
 = 83.9 cents).

This process may be interpreted as the deflation of money, that is, adjusting values expressed in monetary terms in order to eliminate price effects.

Users of the tabulation which shows the purchasing power of the consumer dollar compared to the 1986 dollar at different points in time (Table 2) should note that, as in the case of the Consumer Price Index from which the numbers are derived, the data may not measure closely the experiences of any one specific family within the large urban group to which the CPI relates. At the same time changes in the purchasing power of the dollar are not expected to match the experience of other population groups whose expen diture behaviour is significantly different from those associated with the CPI target population. It should also be noted that like the CPI, changes in the purchasing power of the dollar are not directly affected by changes in income taxes, unemployment insurance premiums, other types of security payments and all other goods and services that are not included in the CPI basket.

Appendice 2

LE POUVOIR D'ACHAT DU DOLLAR DE CONSOMMATION

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie et la baisse des prix est liée à la hausse du pouvoir d'achat.

En somme, le pouvoir d'achat du dollar de consommation varie en relation inverse avec les mouvements de l'indice des prix à la consommation. Par exemple, entre 1986 et juin 1990, les prix à la consommation mesurés par l'IPC ont grimpé de 19.2% de sorte que les biens et services qu'on pouvait acheter en 1986 avec \$100.00 coûtaient \$119.20 en juin 1990. Chaque dollar de consommation en juin 1990 achète donc moins qu'en 1986. Le pouvoir d'achat du dollar a baissé exactement dans la même proportion que l'indice des prix à la consommation a augmenté. Par conséquent, le pouvoir d'achat d'un dollar en juin 1990, par rapport au dollar de 1986,

s'établissait à 83.9 cents (100 cents X
$$\frac{100.0}{119.2}$$
 = 83.9 cents).

Ce processus peut être assimilé à la déflation de l'argent, c'est-à-dire à la correction des valeurs monétaires afin d'éliminer l'influence des prix.

Les utilisateurs des totalisations qui indiquent le pouvoir d'achat du dollar de consommation à différentes périodes par rapport à 1986 (tableau 2) doivent noter que ces chiffres sont tirés de l'indice des prix à la consommation et qu'ils peuvent, tout comme ce dernier, ne pas mesurer fidèlement la situation particulière d'une famille faisant partie du grand groupe urbain auguel se rapporte l'IPC. Par ailleurs, les variations du pouvoir d'achat du dollar ne reflètent pas les changements touchant les autres groupes de population dont les habitudes de dépenses diffèrent sensiblement de celles du groupe cible pour l'IPC. Il faut également noter que, tout comme l'IPC, les variations du pouvoir d'achat du dollar ne sont pas touchées directement par les changements de l'impôt sur le revenu, des primes d'assurance-chômage, d'autres paiements de sécurité sociale et des prix de tous les autres biens et services ne faisant pas partie du panier de l'IPC.

Appendix 3

SEASONAL ADJUSTMENT OF THE CONSUMER PRICE INDEX

Economic time series, measuring changes through time in economic activities, reflect the combined effects of the underlying seasonal, cyclical, trend and irregular factors which influence them. Such series can be decomposed into distinct movements representing the separate effects of the seasonal, cyclical and trend factors and a residual movement representing factors causing irregular non-repetitive movements.

Seasonal fluctuations in a series are those that can be identified with a particular season or time of year. These fluctuations tend to occur at about the same time each year with roughly the same magnitude and are the composite result of climatic influences and social and commercial customs (e.g., harvests, end of season sales).

Cyclical movements consist of sequences of change over periods longer than a year, during which the series rises to a peak and then falls back, subsequently to rise again. For many series this type of movement is associated with expansion and contraction of the economy over the "business cycle".

The trend is a steady underlying movement which reflects continuing or slowly changing economic forces.

Finally, the fluctuations that remain unaccounted for by the seasonal, cyclical and trend movements of a series are termed irregular. The factors causing irregular movements in a series are of a non-repetitive, ad-hoc nature. The irregular component tends to have a stable random appearance, but may include some extreme movements having identifiable causes (e.g., strikes or severe weather). They therefore can be distinguished from the much smaller random irregular variations.

Appendice 3

LA DÉSAISONNALISATION DE L'INDICE DES PRIX À LA CONSOMMATION

Les séries chronologiques économiques mesurent l'évolution dans le temps de l'activitié économique. Ces séries reflètent les effets combinés de la saisonnalité, du cycle, de la tendance générale et d'autres facteurs accidentels qui leur sont propres et qui agissent sur elles. Il est possible de décomposer de telles séries ou mouvements distincts représentant séparément les effets de tel ou tel facteur (saisonnalité, cycle, tendance) et en un mouvement résiduel représentant les facteurs de mouvements accidentels (non répétitifs).

Les fluctuations saisonnières d'une série sont celles que l'on peut relier à une saison ou une période donnée de l'année; elles ont tendance à se produire généralement à peu près à la même époque de l'année et avec la même ampleur. Elles sont le résultat à la fois de conditions climatiques et d'habitudes sociales et commerciales (telle les récoltes, les ventes de fin de saison).

Les mouvements cycliques se définissent comme une suite de variations sur des périodes supérieures à un an, au cours desquelles la série atteint un sommet, descend puis remonte à nouveau. Ce type de mouvement est associé, pour de nombreuses séries, à l'expansion et à la récession économique au cours du "cycle économique".

La tendance générale est un mouvement fondamental stable qui reflète la continuité ou un changement lent de l'économie.

Enfin, les fluctuations qui ne se classent ni dans la saisonnalité, ni dans le cycle, ni dans la tendance générale sont désignées comme mouvements accidentels. Les facteurs expliquant ce type de mouvement dans une série sont de nature spéciale et non répétitive. L'élément accidentel tend à présenter une apparence aléatoire stable mais il peut comprendre certains mouvements extrêmes, dont on peut identifier les causes (comme des grèves ou de fortes intempéries). Ils peuvent donc être distingués des variations irrégulières aléatoires beaucoup moins prononcées.

The methodologies used for removing as much of the seasonal fluctuation as possible from a series have been described in detail in numerous articles and texts on the subject.¹ Rather than reiterating those texts, an outline of the methodologies employed in the derivation of seasonally adjusted consumer price indexes for Canada is provided below.

With the introduction of the 1982 basket, the seasonal adjustment methodology was changed. Direct seasonal adjustment is performed at the level of the seven major components with the seasonally adjusted All-items and All-items excluding Food indexes being the weighted average of their components. This indirect seasonal adjustment of the two aggregate series ensures (except for possible rounding differences) that the aggregate movements will be within the range of their components' movements. Since each basket has its own weights, the move to indirect seasonal adjustment of the aggregates dictated the use of unlinked series as the basis for the seasonal adjustment. Estimating a separate seasonal pattern for each basket has some conceptual advantages since it means that the classification and weight changes introduced with each updating of the basket will not distort the estimates. However, there is an operational difficulty which arises due to the desirability of having at least seven years of data for estimation of the seasonal pattern and the current rapidity with which CPI baskets are updated. Given the current updating cycle, at the time a new basket is introduced, we have only three years of data for the new basket. To create a longer time series, we chain on data from the previous basket back to it's beginning. This reintroduces some of the distortions present in estimating seasonal patterns from linked data.

The above distortion will be minimized through the use of concurrent seasonal adjustment rather than forecast seasonal factors. With the concurrent methodology, the seasonal pattern is estimated each month using all available data. However, to minimize revisions we will revise past indexes only at the end of each calendar year.

Les méthodes utilisées pour éliminer le plus possible de saisonnalité d'une série ont fait l'objet de descriptions détaillées dans de nombreux articles et ouvrages sur la question¹. Au lieu d'en reprendre ici le contenu, nous présentons ci-dessous les grandes lignes des méthodes utilisées pour dériver les indices des prix à la consommation désaisonnalisés pour le Canada.

Avec l'introduction du panier 1982, la méthode de désaisonnalisation fût changée. La désaisonnalisation directe est effectuée à l'échelle des sept composantes principales; les versions désaisonnalisées de l'indice des aliments et de l'indice d'ensemble sans les aliments correspondent à la pondérée de leurs composantes. Cette désaisonnalisation indirecte des deux séries agrégées garantit que les mouvements agrégés se situeront dans les limites des mouvements de leurs composantes (exception faite des différences attribuables à l'arrondissement). Puisque chaque panier a ses propres coefficients de pondération, le passage à la méthode indirecte de désaisonnalisation des séries agrégées a entraîné l'utilisation, à titre de base de la désaisonnalisation, des séries non enchaînées. L'estimation de tendances saisonnières distinctes pour chacun des paniers représente certains avantages au point de vue conceptuel, puisqu'elle signifie que les changements apportés à la classification et aux coefficients de pondération au moment de la mise à jour du panier n'entraîneront aucune distortion. Toutefois, une difficulté opérationnelle existe étant donné, d'une part, qu'il est souhaitable d'avoir au moins sept années de données pour estimer la tendance saisonnière et, d'autre part, en raison de la rapidité avec laquelle on met maintenant à jour le panier de l'IPC. étant donné le cycle courant de mise-à-jour, nous n'avons que trois ans de données pour un nouveau panier lorsque celui-ci est introduit. Afin de créer une série plus longue, nous enchaînons les données du nouveau panier à celles du panier précédent jusqu'à son début. Cette mesure ramène certaines distorsions que l'on retrouvait dans l'estimation des tendances saisonnières des données enchaînées.

Ces distortions seront toutefois minimisées par l'utilisation de désaisonnalisations concomitantes plutôt que de coefficients saisonniers projetés. Dans la méthodologie concomitante, la tendance saisonnière est estimée chaque mois au moyen de toutes les données accessibles. Nous ne recalculerons toutefois les indices antérieurs qu'à la fin de chaque année civile, et ce pour réduire au minimum le nombre de révisions.

Appendix 4

CITY AVERAGE RETAIL PRICES

Introduction

The Average Retail Price Survey is under taken to produce an accurate measure of average prices at one point in time which will permit comparison between cities. In order not to generate artificial price differentials it is essential that the qualities, brands and sizes selected are sufficiently similar. Prices of approximately 60 items, consisting mainly of food and some personal care items and household supply items are collected in representative outlets in 26 cities. These cities are: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria and Whitehorse. This survey is normally under taken during the first week of January, April, July and October.

In order that the average prices generated for one city will be comparable with those for another city, price collection is generally limited to widely available manufacturers' brands. For meat and produce, care is taken to narrowly define cuts and qualities. The goods and services tax (GST) and the provincial retail sales tax are included in the retail averages where applicable.

Calculation Methodology

City Prices. Prices are collected in both chain and independent stores. (A chain stores organization is defined as one operating four or more stores under the same legal ownership.) A city average price is calculated for each item by weighting the average prices obtained for chain and independent stores according to their overall market sales share in that city. For branded items sold under brand labels, an average price for each brand is first calculated in the manner described above; the brand averages are then weighted together to form the item average. The weight assigned each brand in this process is proportionate to the number of price quotes obtained for each of the brands in that city.

Appendice 4

PRIX DE DÉTAIL MOYENS PAR VILLE

Introduction

L'enquête sur les prix moyens de détail est effectuée afin d'obtenir une mesure adéquate des prix moyens, à une période donnée, qui permette une comparaison entre les villes. Il est essentiel que les qualités, les marques et les tailles choisies soient suffisamment équivalentes afin de ne pas introduire des différences de prix artificielles. Les prix de 60 articles, principalement des produits alimentaires, certains articles de soins personnels et des fournitures de ménage, sont relevés dans de nombreux points de vente dans 26 villes: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria et Whitehorse. Cette enquête est normalement effectuée durant la première semaine de janvier, d'avril, de juillet et d'octobre.

Afin que les prix moyens calculés pour une ville puissent être comparables à ceux d'une autre ville, l'observation des prix se limite généralement aux marques des fabricants largement distribuées. Dans le cas de la viande, des fruits et des légumes, on prend soin de définir avec précision les morceaux et les qualités. La taxe sur les produits et services (TPS) et la taxe de vente au détail sont ajoutées au prix de détail moyen s'il y a lieu.

Méthode de calcul

Prix urbains. Les prix sont recueillis dans les magasins à succursales multiples et les magasins indépendants. (Une entreprise à succursales multiples est définie comme celle qui exploite quatre magasins ou plus sous la même raison sociale.) On calcule un prix moyen par ville pour chaque article en pondérant les prix moyens recueillis dans les magasins à succursales multiples et dans les magasins indépendants selon la part de leurs ventes sur le marché général dans leur ville. Dans le cas ces articles vendus sous marque déposée, on calcule d'abord un prix moyen pour chaque marque déposée de la façon décrite plus haut: ensuite on pondère ensemble les moyennes des marques déposées afin d'en arriver à la moyenne pour l'article. Le poids assigné à chaque marque déposée lors de ce processus est proportionnel au nombre de prix observés dans la ville en question pour cette marque déposée.

Weighted city averages. A weighted city average price for each item is derived by weighting the relevant city averages. The importance of each city in calculating the weighted city average is determined by the volume of retail sales in that city.

Item Specifications

A description of the approximately 60 items covered in the Average Prices Survey can be acquired by contacting Prices Division.

Average Retail Prices for Gasoline

Tables 16 through 19 present average retail prices for two types of gasoline retailed in two types of filling stations. The information is collected on a monthly basis as part of the Consumer Price Index survey. Gasoline prices are collected at the pump from a sample of full service and self-serve filling stations in major urban centres across Canada. The prices collected included all applicable Federal and Provincial taxes. They are presented as average prices per litre of gasoline. The series presented in these tables are confined to the 16 urban centres for which Consumer Price Indexes are produced and cover the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to January 1979, are, however, based on the average prices per imperial gallon.

Average Retail Prices for Fuel Oil

Table 20 presents average retail prices for fuel oil. The information is collected nine times yearly as part of the Consumer Price Index Survey. Fuel oil prices are collected from a sample of distributors in major urban centres across Canada. The prices collected include all applicable Federal and Provincial taxes. They are presented as average prices per litre. The series presented in Table 20 are confined to 16 urban centres and for the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to October 1980 are, however, based on the average prices per imperial gallon.

Moyennes pondérées des villes. Une moyenne pondérée du prix de chaque article pour l'ensemble des villes est calculée en pondérant les moyennes appropriées des villes. L'importance de chaque ville dans le calcul de la moyenne pondérée des villes est déterminée par le volume des ventes au détail dans cette ville.

Spécification des articles

Une description des quelques 60 articles contenus dans l'enquête des prix moyens peut être obtenu en communiquant avec la Division des prix.

Prix de détail moyens de l'essence

Les tableaux 16 à 19 présentent les prix de détail movens de deux types d'essence vendus dans deux genres de stations. Cette information est relevée à chaque mois dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix de l'essence sont relevés, sur place, auprès d'un échantillon de stations offrant un service complet et de stations libre service dans les principaux centres urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ces tableaux sont ceux d'un litre d'essence. Les séries présentées se limitent aux 16 centres urbains pour lesquels on produit un IPC pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant janvier 1979 sont, toutefois, sur la base d'un gallon impérial.

Prix de détail moyens du mazout

Le tableau 20 présente les prix de détail moyens du mazout. Cette information est relevée neuf fois par année dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix du mazout sont relevés auprès d'un échantillon de distributeurs dans les principaux centre urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ce tableau sont ceux d'un litre. Les séries présentées au tableau 20 se limitent à 16 centres urbains, pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant octobre 1980 sont, toutefois, sur la base d'un gallon impérial.

Appendix 5

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government

Appendice 5

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail: les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que

employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking an other complete survey.

statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 7 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Reading and recreation	13
Tobacco and alcohol	12

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 7 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

InterCORPORATE
OWNERSHIP
1992

Will Answer Your Questions About Canada's Corporate Pyramids

LIENS DE PARENTÉ ENTRE SOCIÉTÉS 1992

La publication qui répondra à toutes vos questions sur les pyramides de sociétés au Canada

Inter-Corporate Ownership 1992

is the most comprehensive and authoritative source of information available on Canadian corporate ownership.

Inter-Corporate Ownership lists over 65,000 corporations providing the names of all holding and held companies, ownership percentages and the position of each within the overall corporate hierarchy.

Inter-Corporate Ownership is an indispensable reference source for researching:

- Business-to-business marketing: who owns your corporate clients?
- Purchases: who owns your suppliers?
- Investments: what else does a company own or control?
- Corporate competition: what do your competitors own and control?
- Industrial development: in which province and industry is a corporation active?

Inter-Corporate Ownership 1992 (Cat. no. 61-517) is available for \$325 in Canada, US\$390 in the United States and US\$455 in other countries. To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication. For faster ordering, fax your order to 1-613-951-1584. Or call toll-free to 1-800-267-6677 and use your VISA or MasterCard.

Liens de parenté entre sociétés 1992 est la source de renseignements la plus fiable et la plus exhaustive que l'on puisse consulter sur les liens de parenté entre sociétés canadiennes.

Vous y trouverez une liste de plus de 65 000 sociétés faisant état du nom de toutes les sociétés actionnaires ou détenues, du degré de parenté exprimé en pourcentage et de la position de chacune au sein de la hiérarchie globale des entreprises.

Liens de parenté entre sociétés constitue une source de référence indispensable dans les domaines suivants :

- Commercialisation entre sociétés : qui sont les propriétaires de vos sociétés clientes ?
- Achats : qui sont les propriétaires de vos fournisseurs ?
- Investissements : quelles sociétés l'entreprise en cause possède-t-elle ou contrôle-t-elle ?
- Concurrence entre sociétés : quelles entreprises vos concurrents possèdent-ils ou contrôlent-ils ?
- Expansion industrielle: dans quelle province et dans quel secteur d'activité une société oeuvret-elle?

Liens de parenté entre sociétés 1992

Canada

No other monthly report on the Canadian Economy has this much to offer

La seule publication à vous offrir autant d'information sur l'économie canadienne

Canadian Economic Observer

The most extensive and timely information source for people who want objective facts and analysis on the Canadian Economy... every

Current economic conditions

Brief, "to the point" a current update summary of the economy's performance including trend analyses on employment, output, demand and the leading indicator.

Feature articles

In-depth research on current business and economic issues: business cycles, employment trends, personal savings, business investment plans and corporate concentration.

Statistical summary

Statistical tables, charts and graphs cover national accounts, output, demand, trade, labour and financial markets.

Regional analysis

Provincial breakdowns of key economic indicators.

International overview

Digest of economic performance of Canada's most important trading partners — Europe, Japan and the U.S.

Economic and statistical events

Each month, CEO also publishes a chronology of current events that will affect the economy, and information notes about new products from Statistics Canada.

Consult with an expert

The names and phone numbers of the most appropriate Statistics Canada contacts are provided with each data table in the statistical summary; not only can you read the data and the analysis, you can talk to the experts about it.

The Canadian Economic Observer

(Catalogue no. 11-010) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster service, fax your order to 1-613-951-1584. Or call toll free at 1-800-267-6677 and use your VISA or MasterCard.

L'Observateur économique canadien

La revue la plus complète et la plus à jour qui soit pour les gens qui désirent des renseignements objectifs et une analyse de l'économie canadienne... chaque mois.

Les conditions économiques actuelles

Résumé bref et incisif de l'actualité économique du mois, comportant l'analyse des tendances de l'emploi, de la production, de la demande et de l'indicateur avancé.

Les études spéciales

Recherche approfondie sur les questions du domaine des affaires et de l'économie : cycles économiques, tendances de l'emploi, épargne personnelle, projets d'investissement et concentration des sociétés.

L'aperçu statistique

Tableaux, graphiques et diagrammes englobant les statistiques des comptes nationaux, de la production, de la demande, du commerce, de l'emploi

et des marchés financiers.

L'analyse régionale

Ventilation par province des indicateurs économiques stratégiques.

Le survol de l'économie internationale

Un sommaire du rendement de l'économie des partenaires commerciaux du Canada, comme l'Europe, le Japon et les États-Unis.

Événements économiques et statistiques

Chaque mois, L'OEC publie une chronologie des événements qui influenceront l'économie de même que des renseignements sur les nouveaux produits de Statistique Canada.

Consultez un expert

Les noms et numéros de téléphone des personnes-ressources figurent à chaque tableau de l'aperçu statistique; non seulement pouvez-vous lire les données et l'analyse, mais vous pouvez de plus discuter du sujet avec les experts de Statistique Canada.

What happened to the cost of living last month?

he Consumer Price Index will tell you.

Whether you negotiate wage settlements, administer COLA clauses in labour contracts, assess government policies or are involved in renewal contracts, child support or alimony payments, you need current and detailed information on changes in the cost of living.

Compiled monthly (and published within 20 days of the month's end), **The Consumer Price Index** gives you a precise account of the latest fluctuations in consumer prices.

This monthly publication covers:

- transportation
- health and personal care
- food
- recreation, reading and education
- clothing
- tobacco products and alcoholic beverages
- housing

Over 400 items, ranging from milk to parking, household furnishings to reading material, are included.

Price indexes are presented nationally and for 18 major Canadian cities. In each issue you receive month-to-month percentage comparisons and trends over the last five years. And each issue analyzes the main causes of change.

Get the facts.

Subscribe to **The Consumer Price Index** (Catalogue No. 62-001) for the authoritative measure of the purchasing power of the Canadian consumer dollar. A subscription to this monthly is available for \$93 in Canada, US\$112 in the United States and US\$130 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Qu'en était-il du coût de la vie le mois dernier ?

L'indice des prix à la consommation répond à votre question.

Que vous ayez à négocier des règlements salariaux, à administrer des clauses d'indemnité de vie chère ou à évaluer des politiques gouvernementales, que vous vous occupiez du renouvellement de contrats, de pensions alimentaires ou d'allocations d'entretien, vous avez besoin de données récentes et détaillées sur les fluctuations du coût de la vie.

Établi mensuellement, et publié dans les 20 jours suivant la fin de chaque mois, **L'indice des prix à la consommation** vous renseigne de façon précise sur les plus récentes fluctuations des prix à la consommation.

Cette publication mensuelle porte sur:

- l'alimentation
- l'habillement
- l'habitation
- le transport
- la santé et les soins personnels
- les loisirs, la lecture et la formation
- les produits du tabac et les boissons alcoolisées

Plus de 400 articles sont inclus, allant du lait au stationnement en passant par l'ameublement de maison et le matériel de lecture.

Les indices de prix sont donnés pour l'ensemble du pays et 18 principales villes canadiennes. Chaque numéro présente des comparaisons des pourcentages mois après mois et les tendances au cours des cinq dernières années. En outre, chaque numéro analyse les principales causes de changement.

Abonnez-vous!

L'indice des prix à la consommation (n° 62-001 au catalogue) vous permet d'obtenir une évaluation fiable du pouvoir d'achat du dollar canadien. L'abonnement à cette publication mensuelle coûte 93 \$ au Canada, 112 \$ US aux États-Unis et 130 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Sous-section de l'information et de l'analyse courante, Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9606) ou au centre de consultation de Statistique Canada à:

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

Most of the data published in this publication is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. The Databank identification numbers, by which data may be retrieved from CANSIM, are given in the headings of the relevant series in Tables in the publication. For further information on CANSIM call (613) 951-8200 or write Electronic Data Dissemination Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Margaret Parlor, Chief, Consumer Prices Section
- Harold Harnarine, Head, Information and Current Analysis Unit

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans cette publication peuvent être obtenues sous forme lisible par machine de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Les numéros d'identification de la Databank qui servent à retrouver les données de CANSIM sont inscrits à l'en-tête des séries respectives de la publication. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à, Division de la diffusion informatique des données, Statistique Canada, Immeuble R.H. Coats Building, Ottawa, K1A 0T6.

Cette publication a été rédigée sous la direction de:

- Michel Jacod, Directeur, Division des prix
- Margaret Parlor, Chef, Section des prix à la consommation
- Harold Harnarine, Chef, Sous-section de l'information et de l'analyse courante

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behaviour

Second Quarter, 1992

Trends in the All-items Index

Between March and June 1992 (second quarter), the All-items Consumer Price Index (CPI) for Canada rose by 0.5%. This followed a decline of 0.2% in the fourth quarter of 1991 and a relatively sharp rise of 0.9% in the first quarter of this year. The CPI increased by 0.1% in April, 0.2% in May, and 0.2% in June.

The average of the 12-month changes in the CPI recorded in the second quarter was 1.4%, compared to 1.6% posted in the previous quarter. The averages in the four quarters of 1991 were 6.4%, 6.3%, 5.7% and 4.1%. The significantly lower rates of increase in the first two quarters of 1992 were partly due to the fact that the introduction of Goods and Services Tax in January 1991 no longer affected the annual movements.

The seasonally adjusted CPI edged up by 0.2% in the second quarter, having risen by 0.2% in April, fallen by 0.1% in May, and increased by 0.2% in June. The seasonally adjusted quarterly rates of change peaked at 2.7% in the first quarter of 1991, then decelerated in the remaining three quarters of that year (0.8%, 0.2%, 0.0%). The rate rose to 0.6% in the first quarter of 1992, then settled back to 0.2% in the second quarter.

Contributions by Aggregate Indexes

Of the major components, the Transportation (1.5%) and Food (1.0%) indexes exerted the largest upward pressures on the unadjusted All-items index during the second quarter. Further upward pressures resulted from increases in the indexes for Tobacco Products and Alcoholic Beverages (1.1%), Health and Personal Care (1.3%) and Housing (0.1%). Declines in the index for Clothing (-1.1%) and, to a lesser extent, in the index for Recreation, Reading and Education (-0.3%) dampened the overall increase.

The Goods index increased by 0.5% in the second quarter, explaining sixty percent of the 0.5% rise in the All-items index. The increase was concentrated in the Non-durables index (1.4%), as the Durables and Semi-durables indexes fell by 0.2% and 0.9% respectively. At the same time, the Services index increased 0.4%, accounting for the remaining forty percent of the latest quarterly change in the All-items index.

The Energy index rose by 3.2%, reflecting price increases for gasoline (6.6%) and electricity (1.3%). These increases were dampened by price declines for piped gas (-2.7%) and fuel oil (-1.0%).

The combined Food and Energy index advanced by 1.5% and accounted for four-fifths of the rise in the All-items index. The All-items excluding Food and Energy index edged up by 0.2%.

Faits saillants

Comportement des prix à la consommation

Deuxième trimestre de 1992

Tendances de l'indice d'ensemble

Entre mars et juin 1992 (deuxième trimestre), l'indice d'ensemble des prix à la consommation (IPC) pour le Canada augmente de 0.5%. Cette hausse fait suite à la baisse de 0.2% enregistrée durant le quatrième trimestre de 1991 et à l'augmentation relativement forte de 0.9% enregistrée au cours du premier trimestre de la présente année. L'IPC augmente de 0.1% en avril, de 0.2% en mai et de 0.2% en juin.

La moyenne des variations sur douze mois de l'IPC au deuxième trimestre est de 1.4%, en comparaison de 1.6% au trimestre précédent. Les moyennes des quatre trimestres de 1991 ont été de 6.4%, 6.3%, 5.7% et 4.1%. Les taux d'augmentation sensiblement plus faibles enregistrés au cours des deux premiers trimestres de 1992 sont partiellement dus au fait que la taxe sur les produits et services, entrée en vigueur en janvier 1991, n'exerce plus aucun effet sur les fluctuations annuelles.

L'IPC désaisonnalisé enregistre une légère hausse de 0.2 % au cours du deuxième trimestre, augmentant de 0.2% en avril, diminuant de 0.1% en mai et augmentant de 0.2% en juin. Le taux de variation trimestriel désaisonnalisé atteint un sommet de 2.7% au premier trimestre de 1991, puis ralentit au cours des trois trimestres suivants de la même année (0.8%, 0.2%, 0.0%). Le taux augmente à 0.6% au cours du premier trimestre de 1992, puis diminue à 0.2% au deuxième trimestre.

Contributions des indices agrégés

Parmi les principales composantes, la hausse des indices des transports (1.5%) et des aliments (1.0%) contribue le plus à l'augmentation non-désaisonnalisée de l'indice d'ensemble au deuxième trimestre. Le mouvement à la hausse découle également de l'augmentation de l'indice des produits du tabac et des boissons alcoolisées (1.1%), de celle de l'indice de la santé et des soins personnels (1.3%) et de celle de l'habitation (0.1%). La baisse de l'indice de l'habillement (-1.1%) et, dans une moindre mesure, celle de l'indice des loisirs, de la lecture et de l'éducation (-0.3%), freinent l'augmentation d'ensemble.

L'indice des biens enregistre une hausse de 0.5% au cours du deuxième trimestre, ce qui explique soixante pour cent de l'augmentation de 0.5% de l'indice d'ensemble. L'augmentation se concentre dans l'indice des biens non-durables (1.4%), car les indices des biens durables et des biens semi-durables baissent respectivement de 0.2% et de 0.9%. L'indice des services augmente concurremment de 0.4%, ce qui explique le quarante pour cent restant de la fluctuation trimestrielle la plus récente de l'indice d'ensemble.

L'indice de l'énergie augmente de 3.2%, suite aux augmentations du prix de l'essence (6.6%) et des tarifs d'électricité (1.3%). Ces augmentations sont freinées par la baisse des prix du gaz naturel (-2.7%) et du mazout (-1.0%).

L'indice commun des aliments et de l'énergie augmente de 1.5% et représente les quatre cinquièmes de l'augmentation de l'indice d'ensemble. Celui-ci, à l'exclusion des aliments et de l'énergie, enregistre une faible hausse de 0.2%.

Contributions by Lower-Level Indexes

The second quarter rise of 1.5% in the Transportation index was largely associated with the 6.6% advance in gasoline prices. The latter increase was due in part to increases in crude petroleum prices and in part to the ending of widespread price wars. Automobile insurance premiums were up by 1.6% with most of the increase found in Alberta and Nova Scotia. Prices of new vehicles, vehicle rental charges, and inter-city bus and rail fares also rose in the second quarter. A 2.7% drop in air fares, mostly of a seasonal nature, had a slight dampening effect.

The Food index advanced by 1.0% in the second quarter, as the index for Food Purchased from Stores increased by 1.2% and the index for Food Purchased from Restaurants rose by a much slower 0.2%. A large part of the upward pressure on the Food Purchased from Stores index originated from higher prices for fresh fruit and meat products. The Fresh Fruit index rose by 11.8% in the second quarter 1992, largely due to increased prices for apples, oranges, grapefruits and pears. Prices of pork and chicken and, to a lesser extent, those of beef, prepared and ready-cooked meat, and cured meat rose partly in response to the start of the barbecue season. Smaller price increases were registered for low-fat milk, selected bakery products, flour, breakfast cereal, soft drinks, canned soup and canned fish. Part of the overall increase was moderated by a 6.9% drop in the Fresh Vegetables index, due mainly to declines in the prices of salad type vegetables such as tomatoes and cucumbers.

The bulk of the 1.1% increase in the Tobacco Products and Alcoholic Beverages index was due to a 2.0% rise in the Alcoholic Beverages index. Prices of alcoholic beverages purchased from stores increased by 2.6%, accounting for most of the latest change, while the prices of served alcoholic beverages rose by a slower 1.0%. Government prices or levies increased in British Columbia in April, and in Ontario, Nova Scotia, New Brunswick and Saskatchewan in June. Prices for beer purchased from stores also rose sharply in Quebec in May. In addition, several provinces reported higher supplier prices on bottled alcoholic beverages.

The 1.3% rise in the Health and Personal Care index exerted moderate upward pressure on the All-items index during the second quarter. The Health Care index increased by 2.7%, as dental care charges advanced by 5.6% in April following the introduction of the 1992 suggested fee guides for dental surgeons in most provinces. Personal care supplies and services rose by an average 0.6%.

The Housing index edged up by 0.1%, reflecting several opposing price movements. The upward pressures came from price increases for rented accommodation, traveller accommodation (largely seasonal in nature), electricity, detergent and soap and child care services. Most of the downward influences were found in lower owned accommodation charges, mostly for mortgage interest costs and homeowners' maintenance and repair charges. Price declines were also observed for long-distance telephone charges (mostly in Alberta), piped gas, fuel oil, paper products, furniture and household textiles.

Contributions des indices de niveau inférieur

L'augmentation de 1.5% enregistrée au deuxième trimestre dans l'indice des transports est largement associée à la hausse de 6.6.% du prix de l'essence. Cette hausse est due en partie à l'augmentation du prix du pétrole brut, et en partie à la fin des guerres de prix généralisées. Les primes d'assurance automobile augmentent de 1.6%, l'Alberta et la Nouvelle-Écosse absorbant la majeure partie de ces hausses. Les prix des véhicules neufs, les frais de location de véhicules, ainsi que les prix du transport interurbain par autocar et par train enregistrent également des hausses au cours du deuxième trimestre. Celles-ci sont légèrement freinées par la baisse de 2.7%, surtout de nature saisonnière, du prix des billets d'avion.

L'indice des aliments augmente de 1.0% au deuxième trimestre, l'indice des aliments achetés au magasin augmentant de 1.2% et l'indice des aliments achetés au restaurant augmentant quant à lui beaucoup plus faiblement de 0.2%. Une grande partie de la hausse de l'indice des aliments achetés au magasin découle des prix plus élevés demandés pour les fruits frais et les produits de la viande. L'indice des fruits frais augmente de 11.8% au cours du deuxième trimestre de 1992, à cause principalement de la hausse des prix des pommes, des oranges, des pamplemousses et des poires. Les prix du porc et du poulet et, dans une moindre mesure, ceux du boeuf, de la viande préparée et de la viande cuite prête à servir, ainsi que de la viande de salaison, augmentent en partie à cause du début de la saison des barbecues. Des augmentations de prix plus faibles sont enregistrées pour le lait écrémé, certains produits de boulangerie, la farine, les céréales de table, les boissons gazeuses, ainsi que pour les soupes et le poisson en boîte. Une partie de l'augmentation d'ensemble est compensée par la baisse de 6.9% de l'indice des légumes frais, qui résulte principalement de la baisse des prix des légumes servant à composer des salades, par exemple les tomates et les concombres.

La majeure partie de l'augmentation de 1.1% enregistrée dans l'indice des produits du tabac et des boissons alcoolisées est due à la hausse de 2.0% de l'indice des boissons alcoolisées. Les prix des boissons alcoolisées achetées au magasin augmentent de 2.6%, ce qui explique en bonne partie le mouvement le plus récent, tandis que les prix des boissons alcoolisées servies augmentent plus faiblement de 1.0%. Les prix ou les prélèvements imposés par les gouvernements augmentent au mois d'avril en Colombie-Britannique, et en juin en Ontario, en Nouvelle-Écosse, au Nouveau-Brunswick et en Saskatchewan. Les prix de la bière achetée au magasin enregistrent également une hausse marquée au Québec en mai. De plus, les prix des fournisseurs de boissons alcoolisées en bouteilles augmentent dans plusieurs provinces.

L'augmentation de 1.3% de l'indice de la santé et des soins personnels entraı̂ne une augmentation modérée de l'indice d'ensemble au cours du deuxième trimestre. L'indice des soins de santé augmente de 2.7%, les frais exigés pour les soins dentaires connaissant en avril une hausse de 5.6% suite à l'entrée en vigueur dans la majorité des provinces des guides d'honoraires pour 1992 destinés aux chirurgiens-dentistes. Les articles et les services de soins personnels augmentent en moyenne de 0.6%.

L'indice de l'habitation progresse faiblement de 0.1%, ce qui reflète divers mouvements de prix opposés. Les hausses touchent le logement en location, l'hébergement des voyageurs (de nature largement saisonnière), l'électricité, le détersif et le savon, ainsi que les services de soins d'enfants. Les baisses touchent essentiellement le logement en propriété, particulièrement les coûts hypothécaires et les frais d'entretien et de réparation des propriétaires. Des baisses sont aussi signalées dans les tarifs des appels interurbains (principalement en Alberta), ainsi que dans les prix du gaz naturel, du mazout, des produits de papier, des meubles et des articles ménagers en matière textile.

A drop of 1.1% in the Clothing index had a moderating effect on the second quarter change in the All-items index. The Women's Wear and the Men's Wear index fell by 0.8 and 1.8% respectively. The Girls' Wear and Boys' Wear indexes each fell by 0.4%. The decline in the Women's Wear index resulted largely from falling prices for suits, dresses, sportswear and footwear. In the Men's Wear index, the lower prices were observed for suits and footwear. A sluggish economy associated with a lowering of consumer confidence contributed to declines in the Clothing index in every month of the second quarter.

The Recreation, Reading and Education index fell by 0.3%, contributing, in a small way, to the moderating pressures. Most of the decline was associated with lower prices for home-entertainment equipment and cablevision charges. These were partly offset by higher membership fees and dues relating to the use of recreational facilities and a 0.3% increase in the Reading Materials index caused by higher prices for newspapers and magazines.

La baisse de 1.1% de l'indice de l'habillement freine au cours du deuxième trimestre la hausse de l'indice d'ensemble. Les indices des vêtements pour femmes et des vêtements pour hommes diminuent respectivement de 0.8% et de 1.8%. Les indices des vêtements pour filles et des vêtements pour garçons enregistrent chacun une baisse de 0.4%. La baisse de l'indice des vêtements pour femmes résulte en grande partie de la diminution des prix des tailleurs, des robes, des vêtements sport et des chaussures. Dans l'indice des vêtements pour hommes, on observe une diminution des prix des complets et des chaussures. La stagnation de l'économie, associée à une baisse de la confiance des consommateurs, ont contribué à la baisse de l'indice de l'habillement pour chaque mois du deuxième trimestre.

L'indice des loisirs, de la lecture et de l'éducation diminue de 0.3%, contribuant ainsi d'une manière modeste à freiner la hausse de l'indice d'ensemble. La plus grande partie de cette baisse découle de la diminution des prix du matériel de divertissement au foyer ainsi que des frais de la câblodistribution. Ces diminutions sont compensées en partie par la hausse des cotisations et droits d'abonnement pour l'utilisation des installations de loisirs, ainsi que par l'augmentation de 0.3% de l'indice du matériel de lecture entraînée par la hausse des prix des journaux et des magazines.

Introduction

This quarterly publication presents a compendium of consumer prices and price index related information of both a current and historical nature. It provides a wide range of timely and detailed statistical information and serves as a complement to the monthly publication, The Consumer Price Index, Catalogue 62-001.

Part I of this report presents a synopsis of current consumer price index movements. This is presented in the form of tabular and graphic information. Some tabular information on international prices is also presented, in particular for some Canada - U.S. comparisons.

Parts II and III provide a detailed historical summary of monthly consumer price indexes in recent years. This summary contains considerable disaggregated information, again in the perspective of both the urban Canada and the separate city contexts.

Part IV of this report contains tables for the All-items and seven major components for each province.

Place-to-place comparative retail price information forms Part V of the report. This segment presents the most recent data with regards to average city retail prices and inter-city indexes of retail price differentials. Special feature articles, which are periodically included in the publication, are presented in Part VI.

Appendices serve as sources of reference for the statistical data presented in the preceding segments of the report. Appendices 1 and 2 contain explanatory notes pertaining to consumer price index data; Appendix 3 provides reference material for seasonal adjustment methodology in the context of its application to the Consumer Price Index; Appendices 4 and 5 present background information relating to place-to-place retail price comparisons.

Introduction

Cette publication présente un résumé de renseignements historiques et courants des prix à la consommation et des indices de prix. Elle fournit une gamme d'informations statistiques étendue, d'une façon détaillée, et sert de complément à la publication mensuelle, L'indice des prix à la consommation, n° 62-001 au catalogue.

La partie I de ce rapport contient un aperçu synoptique qui présente les mouvements courants des prix à la consommation. Ces informations sont présentées sous la forme de tableaux et de graphiques. Des tableaux comportant de l'information sur les prix internationaux sont également présentés, particulièrement en ce qui regarde certaines comparaisons entre le Canada et les É.-U.

Les parties II et III fournissent un résumé historique détaillé des indices mensuels des prix à la consommation des dernières années. Ce résumé contient des renseignements pour le Canada et les villes à un niveau beaucoup plus désagrégé.

La partie IV de ce rapport contient des tableaux pour l'ensemble et les sept composantes principales pour chaque province.

Des informations sur les prix de détail comparés d'un endroit à l'autre composent la partie V de ce rapport. Cette section fournit les plus récentes données au sujet des prix de détail moyens par ville et des indices comparatifs des prix de détail entre les villes. Les articles spéciaux, qui font périodiquement partie de cette publication, se retrouvent à la partie VI.

Les appendices servent de référence aux données statistique présentées dans les parties précédentes du rapport. Les appendices 1 et 2 contiennent les notes explicatives reliées aux données de l'indice des prix à la consommation; l'appendice 3 fait référence à la méthode des ajustements saisonniers dans son application à l'indice des prix à la consommation; les appendices 4 et 5 fournissent des informations de base reliées aux comparaisons de prix d'un endroit à l'autre.

With the CPI for December 1991 a change in the seasonally adjusted procedure was introduced. Prior to this time the All-items seasonally adjusted CPI was calculated as an aggregate of its seasonally adjusted major component indexes with the exception of the Transportation index which was used in an unadjusted form. Recent examination of the Transportation index revealed the presence of some seasonality accuring particularly in the month of November when new automobile models are introduced into the CPI. As a result, the revised procedure now incorporates this index in a seasonally adjusted form. Owing to noticeable differences to the adjusted mouvement for November, the revised adjusted indexes are released with the December data. This is a slight departure from past practices when revised seasonally adjusted indexes were published with the release of the CPI for January.

Avec la publication de l'IPC de Décembre 1991, débute une nouvelle façon de faire l'ajustement saisonnier. Jusqu'à cette date, on calculait l'indice d'ensemble désaisonnalisé comme aggrégation des indices majeurs qui le composent, composantes qui avaient toutes été désaisonnalisées à l'exception de l'indice des transports. L'examen, récemment, de l'indice des transports révèle la présence de variations saisonnières, surtout en novembre quand les nouveaux modèles automobiles sont introduits dans l'IPC. En conséquence, la nouvelle méthode d'ajustement de l'indice d'ensemble incorpore maintenant l'indice des transports sous une forme corrigée des variations saisonnières. Parce que cette nouvelle méthode créait des différences appréciables de la variation de l'indice désaisonnalisé pour novembre. les révisions de l'indice désaisonnalisé sont publiés en même temps que les données de décembre. Par le passé, les indices désaisonnalisés révisés étaient publiés avec les données de janvier.

For explanatory notes and detail, see Appendix 4.
Blanks appear on this table where the quality and (or) quantity of the prices were insufficient to produce a good average. Whitehorse is not included in weighted city averages.
As of October 1991, tenderloin removed in all cities.
Chicoutimi (450 g).
One package yielding 2.25 L in total.

The Analytical Consumer Price Index Series for Owned Accommodation

Update

Introduction

This note describes the most recent updating of the monthly analytical indexes of consumer prices based on different treatments of owned accommodation. These analytical series are now available for the period January 1982 to December 1991, but are reported here only for the interval January 1987 to December 1991.

Altogether, six different analytical indexes for owned accommodation will be presented. They are based on variants of four different concepts: 1) the official concept, upon which the Canadian Consumer Price Index (CPI) is based; 2) the rental equivalence concept; 3) the money outlays concept; and 4) the net purchase concept. In order to demonstrate the impact of using these different concepts on the consumer price change at higher levels of aggregation, results are also reported here for Shelter, Housing, and All-items.

While the most obvious use of the analytical indexes is to provide a picture of how different approaches impact the CPI series, they also serve an important role for international comparisons. In particular, since the U.S. CPI is based on a rental equivalence approach, the analytical CPI based on the same approach would provide a comparison less affected by methodological differences than the official Canadian series. For similar reasons, one might use the analytical Canadian CPI based on the first variant of the money outlays approach for comparisons involving the United Kingdom².

In the next section, each of the four concepts, upon which the analytical series are based, is briefly defined. For more detailed descriptions of these concepts and a discussion of the weighting and estimation of the analytical indexes, the reader should consult the original publication of these series³.

Definition of Concepts

The official concept, upon which the owned accommodation component of the CPI is based, is one variant of the user cost approach. An index based on the official concept measures the changes in the cost of using a fixed stock of owned dwellings. It

Those wishing to obtain the series corresponding to the previous interval, January 1982 to December 1987, may consult Consumer Prices and Price Indexes (Catalogue No. 62-010) July-September, 1985 issue for the series from January 1982 to September 1985, and the January-March, 1988 issue for the remainder.

See the supplement to the July-September issue of Consumer Prices and Price Indexes (Catalogue No. 62-010) for 1985. That supplement was written by Andrew Baldwin of Prices Division. Enquiries concerning the analytical owned accommodation series should be addressed to the author of this update, Terri Markle, Central Research Section, Prices Division, 613-951-3355.

Séries analytiques d'indices des prix à la consommation pour le logement en propriété

Mise à jour

Introduction

Dans cette note, on décrit la mise à jour la plus récente des indices analytiques des prix à la consommation fondés sur différentes méthodes de traitement du logement en propriété. Ces séries analytiques couvrent la période allant de janvier 1982 à décembre 1991, mais elles ne sont présentées ici que pour la période janvier 1987-décembre 1991.

On présentera en tout six indices analytiques différents du logement en propriété. Ces indices reposent sur des variantes de quatre concepts différents : 1) le concept officiel, sur lequel est basé l'indice canadien des prix à la consommation (IPC), 2) le concept d'équivalence en valeur locative, 3) le concept des débours, 4) le concept des achats nets. Afin de présenter l'incidence de ces différents concepts sur les variations des prix à la consommation à des niveaux d'agrégation plus élevés, on présente également les résultats pour les indices du logement, de l'habitation et d'ensemble.

Si l'utilisation la plus évidente des indices analytiques est de présenter la façon dont les différentes méthodes se répercutent sur les séries de l'IPC, ces indices jouent également un rôle important pour les comparaisons internationales. En particulier, comme l'IPC des États-Unis d'Amérique utilise le concept de l'équivalence en valeur locative, l'IPC analytique basé sur les mêmes notions fournirait une comparaison qui serait moins touchée par les différences méthodologiques que la série officielle canadienne. De même, on pourrait utiliser l'IPC canadien analytique basé sur la première variante du concept des débours pour faire les comparaisons avec le Royaume-Uni².

Dans la section suivante, on examine brièvement chacun de ces quatre concepts sur lesquels reposent les séries analytiques. Pour obtenir une description plus détaillée de ces concepts ainsi qu'une discussion de la pondération et de l'estimation des indices analytiques, le lecteur est prié de consulter la publication originale de ces séries³.

Définition des concepts

Le concept officiel, sur lequel repose la composante du logement en propriété de l'IPC, est une variante de la méthode du coût pour l'utilisateur. Un indice fondé sur le concept officiel mesure les variations du coût d'utilisation d'un stock fixe de logements en propriété. Il comprend cinq

3 Ibid.

Les lecteurs désireux d'obtenir la série correspondant à la période janvier 1982-décembre 1987 peuvent consulter la publication **Prix à la consommation et indices des prix** (n° 62-010 au catalogue): le numéro de juillet-septembre 1985 pour la série couvrant la période janvier 1982-septembre 1985 et le numéro de janvier-mars 1988 pour le reste.

Voir le supplément au numéro de juillet-septembre 1985 de Prix à la consommation et indices des prix (n° 62-010 au catalogue). Ce supplément a été rédigé par Andrew Baldwin, de la Division des prix. Les demandes de renseignements sur les séries analytiques pour le logement en propriété doivent être adressées à l'auteur de la mise à jour, Terri Markle, Section centrale de recherche, Division des prix, au 613-951-3355.

incorporates five main components: the replacement cost of that part of the dwelling that is assumed to be used up in the year in question, mortgage interest costs, property taxes, homeowners' insurance premiums and homeowners' repairs. Less important components include transaction charges (real estate commissions, legal fees, etc.), condominium charges, and mortgage insurance.

An index based on the **rental equivalence concept** estimates changes in the cost of consuming the dwelling services of a fixed stock of owner-occupied homes by imputing the change in market rents on similar types of tenant-occupied dwellings. The landlord directly pays most of the expenses of a tenant-occupied dwelling, including property taxes, dwelling insurance, mortgage interest, transaction costs and most repairs. Therefore, the owned accommodation series based on a rental equivalence concept contains, in addition to the rent series, only two other components: one series representing the costs of tenants' repairs and the other representing the costs of tenants' insurance on personal property.

An index based on the **money outlays concept** measures the price-induced changes in the consumption-related cash outlays on owner-occupied homes. Imputed costs are therefore excluded by definition because they are not cash outlays. Most of the components of the official owned accommodation index represent cash disbursements; hence they are in scope under a money outlays concept. The major exception is replacement cost, an imputed item,

In this update, two variants of the money outlays concept are shown. They differ only to the extent that one of them includes net equity payments and the other one does not. Net equity payments are calculated as the sum of all downpayments on owner-occupied homes, plus all payments going directly towards the reduction of principal outstanding (for homes purchased on credit), minus all sales of owner-occupied homes. The first of the money outlays variants treats equity payments as being related to investment, and excludes them on this ground, whereas the second variant considers them as being related to consumption, and includes them.

A series based on the net purchase concept measures changes in the current transaction prices for owned accommodation. Net purchases of owneroccupied dwellings consist of all purchases of new and existing owner-occupied dwellings by the target population less sales of such dwellings within the target population. Indexes based on two variants of the net purchase concept are shown here. The first series is quite similar to the money outlays variant excluding equity, except that it excludes the mortgage interest and mortgage insurance components and, instead, includes home purchases. The second net purchase variant includes downpayments and discounted mortgage payments in place of the expenditure on home purchases. In contrast to the first variant, this latter variant will reflect changes in current mortgage rates.

composantes principales : le coût de remplacement de la partie du logement qui est censée avoir été utilisée pendant l'année en question, les coûts des intérêts hypothécaires, les impôts fonciers, les primes d'assurance contractée par le propriétaire ainsi que les réparations faites par le propriétaire. Les composantes secondaires comprennent les frais de transaction (commissions immobilières, honoraires d'avocat et de notaire, etc.), les frais de copropriété et l'assurance-hypothèque.

Un indice basé sur le concept de l'équivalence en valeur locative permet d'estimer les variations du coût d'utilisation des services de logement d'un stock fixe de maisons occupées par le propriétaire par une imputation de la variation des loyers courants de logements semblables occupés par des locataires. Le propriétaire paie directement la plupart des dépenses du logement occupé par un locataire, y compris les impôts fonciers, l'assurance du logement, les intérêts hypothécaires, les coûts de transaction et la plupart des réparations. La série du logement en propriété basée sur le concept de l'équivalence en valeur locative contient donc, en plus de la série des loyers, deux autres composantes seulement : une série représentant le coût des réparations faites par des locataires et une autre représentant les coûts de l'assurance par le locataire de ses biens personnels.

L'indice fondé sur le **concept des débours** mesure les variations induites par les prix dans les débours pour les maisons occupées par le propriétaire reliés à la consommation. Les coûts imputés sont donc exclus par définition, puisqu'ils ne constituent pas des débours. La plupart des composantes de l'indice du logement en propriété officiel sont des débours et tombent sous la définition du concept des débours. La principale exception est le coût de remplacement, qui est un élément imputé.

Dans cette mise à jour, on présente deux variantes du concept des débours. Elles ne diffèrent que dans la mesure où l'une d'entre elles comprend les remboursements nets sur le capital, alors que l'autre ne les comprend pas. On calcule les remboursements nets sur le capital comme étant la somme de toutes les mises de fonds sur les logements occupés par le propriétaire, et de tous les paiements destinés directement à réduire le capital (pour les maisons achetées à crédit), moins toutes les ventes de maisons occupées par le propriétaire. La première de ces variantes retrace les remboursements sur le capital comme se rattachant aux investissements et les exclut à ce titre, tandis que la deuxième variante les traite comme se rattachant à la consommation, et les inclut.

L'indice basé sur le **concept des achats nets** mesure les variations des prix de transactions courantes pour le logement en propriété. Les achats nets de logements occupés par leur propriétaire englobent les achats moins les ventes de tous les logements neufs et existants occupés par les propriétaires, effectués par la population visée. On présente ici les indices utilisant deux variantes de ce concept. La première série est assez semblable à la variante des débours sans ceux sur le capital, mais elle exclut les intérêts hypothécaires et l'assurance-hypothèque et inclut, à la place, les achats de maisons. La deuxième variante inclut les paiements initiaux et les paiements hypothécaires actualisés à la place des dépenses au titre des achats de maisons. Contrairement à la première variante, la deuxième va retracer les fluctuations des taux hypothécaires actuels.

Methodology of the Analytical Index Series

With the previous update⁴, the 1986 basket was introduced to the owned accommodation analytical series, in accordance with the methodology of the CPI. The series with the 1986 basket were linked at December 1988 to the 1982 basket series rebased to 1986 = 100. As a result, the analytical series are calculated as chain indexes of the following form:

$$P_{t/86}^{Ch} = P_{t/D88}^{86} * P_{D88/86}^{82}$$
where,

Ch
P is a chain price index which compares
t/86 prices in the given period, t, to prices in the
1986 base period;

86
P is a fixed-basket index, with a 1986 basket,
t/D88 which compares prices in the given period,
t, to prices in the December 1988 base
period;

P is a fixed-basket price index, with a 1982
D88/86 basket, which compares prices in
December 1988 to prices in the 1986 base
period.

The change in the basket reference period was accompanied by refinements in the calculation of weights for the rental equivalence and money outlay series. For a discussion of these refinements, the reader should consult the previous update⁵. The description of the methodology for the net purchase weights that appeared in the July-September 1985 issue of this publication is still applicable. The set of 1986 expenditure weights for each of the analytical indexes can be found in percentage terms in Text Table I.

Update on the Movement of the Analytical Index Series

Text Tables II, III, IV, and V contain analytical chain price indexes for four respective aggregation levels: Owned Accommodation, Shelter, Housing, and All-items, for the period 1987 to 1991. A graph of the analytical series for Owned Accommodation is included as Figure 1.

For the first four years, 1987 to 1990, the index values are identical to those which were reported in the most recent update⁶. The comments made on the index movements therefore still apply and need not be repeated here. The focus of the following text will be on the 1991 index movements. In examining these index movements, emphasis will be placed on

Méthodologie des séries analytiques d'indices

Au moment de la mise à jour précédente⁴, on a adopté le panier de 1986 pour la série analytique du logement en propriété, conformément à la méthodologie de l'IPC. Les séries utilisant le panier de 1986 ont été enchaînées en décembre 1988 à celles utilisant le panier de 1982, dont la base avait été changée à celle de 1986. Les séries analytiques sont donc calculées comme des indices enchaînés sous la forme suivante :

$$P_{t/86}^{Ch} = P_{t/D88}^{86} * P_{D88/86}^{82}$$

Ch
P est un indice de prix en chaîne qui compare les
t/86 prix au cours de la période donnée (t) à ceux de la
période de référence (1986);

86
P est un indice de prix à panier fixe (panier de 1986)
t/D88 qui compare des prix de la période donnée (t) à ceux de la période de base (décembre 1988);

82
P est un indice de prix à panier fixe (panier de 1982)
D88/86 qui compare les prix en décembre 1988 à ceux de base 1986.

Au moment du changement de la période de référence du panier, on a amélioré le calcul des pondérations pour les séries utilisant l'équivalence en valeur locative et le concept des débours. Le lecteur trouvera dans la mise à jour précédente une discussion de ces améliorations⁵. La description de la méthodologie utilisée pour la pondération des achats nets qui a paru dans l'édition de juillet-septembre 1985 de cette publication, est toujours valable. L'ensemble des pondérations des dépenses de 1986 pour chacun des indices analytiques est présenté en pourcentage au tableau explicatif l.

Mise à jour du mouvement des séries analytiques d'indices

Les tableaux explicatifs II, III, IV et V présentent les indices de prix enchaînés analytiques à quatre niveaux d'agrégation respectifs : le logement en propriété, le logement, l'habitation et l'ensemble de l'IPC, pour la période 1987-1991. Un graphique de la série analytique du logement en propriété est présenté à la figure 1.

Au cours des quatre années allant de 1987 à 1990, les valeurs de l'indice sont identiques à celles signalées pour la mise à jour la plus récente⁶. Les remarques faites alors pour le mouvement des indices sont toujours valables, par conséquent elles ne seront pas reprises ici. Le texte qui suit portera surtout sur les mouvements des indices de 1991. Lors de l'étude de ces mouvements, on s'attachera plus

bid.

⁶ Ibid

the annual rate of change rather than the monthly rate of change, since the annual rate is not influenced by seasonal patterns⁷. The 1991/1990 annual rate of change is calculated by dividing the arithmetic mean of the twelve monthly index levels for 1991 by the corresponding mean for 1990. These average annual changes are shown in Text Table VI. Most of the comments made thereafter will pertain to the owned accommodation series, since the most noticeable impact of the different methodologies used here occurs at this, the lowest, level of aggregation. These differences diminish as one proceeds to higher and higher levels of aggregation.

The year 1991 was a year of disappointing economic growth, as the recession, which began in 1990, continued. New house prices were lower than their levels in the previous year. Conventional mortgage rates declined throughout the year, reaching the lowest levels recorded in more than a decade. For example, the average rate for a one year mortgage was 12.2% in January and had fallen to 8.6% by December. Given the economic climate, it should not come as a surprise that all six indexes for owned accommodation displayed smaller average annual price increases in 1991 than in 1990. This can be seen from Text Table IV.

The **net purchase** indexes, which are substantially influenced by current house prices, form the lower boundary in the recorded annual rates of change. The **rental equivalence** index registered the next lowest increase. Of the three remaining indexes, the impact of current house prices is moderated by the presence of lagged house prices and lagged interest rates. The two **money outlay** variants increased significantly more than the **official** index. The underlying reasons for the movements of each of these indexes will be explained in the following text.

The **net purchase** variant excluding interest increased by a modest 0.8%, due mostly to sluggish housing sales. In fact, the home purchase and mortgage insurance components decreased by 3.9% and 2.9%, respectively. However, these decreases were more than compensated for by sizeable increases in all remaining components, such as the 7.6% increase recorded for property taxes. The net purchase variant including discounted mortgage payments decreased significantly by 3.7%. Indeed, the 1986-based index fell below the official index in 1991 for the first time since 1986. This index was heavily influenced by the 16.6% decrease in the discounted mortgage payment component.

The **rental equivalence** index, which does not contain house price or interest rate components, demonstrated the next smallest increase of 2.7%. Thus the pattern of modest rates of increase under the 5% mark, as observed over the last five years,

plus particulièrement au taux de variation annuel plutôt qu'au taux de variation mensuel, puisque les taux annuels ne sont pas sujets à la saisonnalité⁷. Le taux annuel de variation 1991/1990 se calcule en divisant la moyenne arithmétique des douze niveaux mensuels de l'indice pour 1991 par la moyenne correspondante pour 1990. Ces variations annuelles moyennes sont présentées au tableau explicatif VI. Les explications ci-dessous pour la plupart se rapportent à la série sur le logement en propriété, puisque les différences dans les méthodologies utilisées ici ont l'incidence la plus forte à ce niveau d'agrégation, qui est le plus bas. Ces différences diminuent à mesure que l'on passe à des niveaux d'agrégation de plus en plus élevés.

La croissance économique en 1991 a été décevante, car la récession qui avait commencé en 1990 s'est poursuivie. Les prix des maisons neuves étaient plus bas que ceux de l'année précédente. Les taux d'intérêt hypothécaire conventionnels ont baissé pendant l'année pour tomber à leur niveau le plus bas en plus de dix ans. Ainsi, le taux d'une hypothèque d'un an, qui était en moyenne de 12.2% en janvier, était tombé à 8.6% en décembre. Compte tenu de la conjoncture économique, il n'est donc pas surprenant que les six indices du logement en propriété aient enregistré des augmentations de prix annuelles moyennes plus faibles en 1991 qu'en 1990, comme on peut le voir au tableau explicatif IV.

Les indices utilisant le concept des achats nets, qui sont grandement influencés par le prix courant des maisons, constituent une limite inférieure des taux de variation annuels observés. L'indice utilisant le concept de l'équivalence en valeur locative enregistre la deuxième augmentation la plus faible. En ce qui a trait aux trois autres indices, l'incidence des prix courants des maisons se trouve atténuée par l'existence de prix décalés des maisons et de taux d'intérêt décalés. Les deux variantes du concept des débours augmentent sensiblement plus que l'indice officiel. Les causes inhérentes des mouvements de chacun de ces indices seront expliquées dans le texte suivant.

La variante du **concept des achats nets** excluant l'intérêt enregistre une augmentation modeste de 0.8%, principalement à cause de la lenteur des ventes. En fait, les composantes des achats de logements et de l'assurance-hypothèque baissent respectivement de 3.9% et de 2.9%. Ces baisses sont toutefois plus que compensées par des hausses appréciables pour les autres composantes, comme par exemple l'accroissement de 7.6% des impôts fonciers. La variante des achats nets incluant les paiements hypothécaires actualisés diminue de façon appréciable (-3.7%). De fait, l'indice sur la base de 1986 tombe en dessous de l'indice officiel en 1991 pour la première fois depuis 1986. Cet indice a été fortement influencé par la diminution de 16.6% de la composante des versements hypothécaires actualisés.

L'indice utilisant le concept de l'équivalence en valeur locative, qui ne contient pas les composantes du prix des maisons ou des taux d'intérêt, enregistre l'augmentation suivante la plus faible (2.7%). La tendance à des taux d'augmentation peu élevés, inférieurs à 5%, que l'on a

In particular, the rental equivalence series has been found to exhibit a seasonal pattern due to a seasonal concentration of lease commencements.

En particulier, on a constaté que la série de l'équivalence en valeur locative se caractérise par une composante saisonnière en raison de la concentration saisonnière des débuts des baux.

continues. In general, this rate differs slightly from the rate displayed by the rented accommodation index in the CPI. This is largely due to the differences in weights attached to various types of dwellings. The weights for the analytical series reflect proportions of dwelling types as found among homeowners, and the CPI weights reflect proportions of dwelling types as found among renters. The rental equivalence index is predominantly an index of house rents, while the CPI rent index is predominantly an index of apartment rents.

At the upper end of the spectrum, relatively large increases were observed for the three remaining indexes; namely, the two money outlay variants and the official one. This is mostly explained by the large average annual increase in the mortgage interest cost component, which bears a very heavy, if not the heaviest, weight in each of these indexes. It measures the price-induced changes in the amount of mortgage interest owed by the target population on outstanding mortgages. In general, the mortgage interest cost component will drop with falling current interest rates, but only after a substantial time lag. This lag reflects the reality, in which the existing mortgage contracts carry over past interest rates until they are replaced by new contracts, taking advantage of lower rates. House prices also impact this component, with a similar lag. Both interest rates and house prices peaked in mid 1990 but the mortgage interest cost component did not turn around until May of 1991. So, even though this component fell consistently from May to December, decreasing by 1.5%, the average annual change was a hefty increase of 6.3%.

The non-equity variant of the **money outlays** series rose by 5.8%, which was considerably less than the 7.5% increase which was observed for the equity variant. This noticeable gap between them is explained partly by the additional impact of lagged house prices on the equity variant through the "principal portion of mortgage payments" component. This latter component had an average annual increase of 5.6%. Another important factor that contributed to this gap was the 3.9% fall in the sale of home component, which leads to an increase in the index due to its very large negative weight.

The **official** owned accommodation index increased by 3.5%, which is substantially lower than the 5.8% increase exhibited by the money outlays variant excluding equity. This is the result of a 4.3% decrease in the replacement cost component, which is the only component included in the official index that is not included in the money outlays variant excluding equity. The movement of this component is based on the New House Price Index (NHPI) for houses only.

observée au cours des cinq dernières années se poursuit par conséquent. En général, ce taux diffère légèrement de celui affiché par l'indice du logement en location de l'IPC. Les causes principales sont les différences des pondérations propres aux différents types de logements. Les pondérations de la série analytique retracent les proportions des types de logements parmi les propriétaires, et les pondérations de l'IPC retracent les proportions des types de logements parmi les locataires. L'indice de l'équivalence en valeur locative est surtout un indice des loyers pour les maisons, tandis que l'indice des loyers de l'IPC est avant tout un indice des loyers pour les appartements.

On observe des augmentations relativement importantes pour les trois autres indices, c'est-à-dire les deux variantes du concept des débours et l'indice officiel. Ces augmentations s'expliquent principalement par la forte hausse annuelle moyenne de la composante des coûts des intérêts hypothécaires, qui exerce un poids très lourd, sinon le plus lourd, sur chacun de ces indices. Cette composante mesure les variations causées par les prix du montant des intérêts hypothécaires pour la population enquêtée pour hypothèques non remboursées. De façon générale, la composante des coûts des intérêts hypothécaires va diminuer avec les taux d'intérêt, mais seulement après un retard appréciable. Ce retard traduit la réalité, dans laquelle les contrats hypothécaires existants conservent les taux d'intérêt passés jusqu'à ce qu'ils soient remplacés par de nouveaux contrats, portant des taux moins élevés. Le prix des maisons se répercute également sur cette composante, avec un retard semblable. Les taux d'intérêt et les prix des maisons atteignent tous les deux un sommet en 1990 mais la composante des coûts des intérêts hypothécaires n'a pas changé de direction avant mai 1991. Alors, même si cette composante baisse de façon continue de mai à décembre, (- 1.5%), la variation annuelle moyenne a été très forte (6.3%).

La variante excluant les remboursements du concept des débours augmente de 5.8%, un pourcentage considérablement inférieur à celui de 7.5% observé pour les variantes incluant les remboursements. Cet écart appréciable s'explique en partie par l'incidence supplémentaire du prix décalé des maisons sur la variante incluant les remboursements nets par le moyen de la composante — partie capital des versements hypothécaires. Cette dernière fait ressortir une augmentation annuelle moyenne de 5.6%. Un autre facteur important expliquant cet écart est la chute de 3.9% des ventes de maisons, qui se traduit par une augmentation de l'indice en raison de son poids négatif très important.

L'indice du logement en propriété officiel progresse de 3.5%, taux sensiblement inférieur à celui de 5.8% de la variante utilisant le concept des débours excluant les remboursements nets. Ceci s'explique par une diminution de 4.3% de la composante du coût de remplacement, qui est la seule composante incluse dans l'indice officiel qui n'entre pas dans la variante du concept des débours excluant les remboursements nets. Le mouvement de cette composante est basé sur l'indice des prix des logements neufs (IPLN) pour les maisons seulement.

If one examines Text Table VI, it can be seen that the differences between the index series are less apparent at higher levels of aggregation. In 1991, the annual rates of change for the All-items CPI range from 4.8%, using the net purchase series, to 6.3%, using the money outlays series. This difference of 1.5%, albeit not negligible, is very small compared to the corresponding difference of 11.2 percentage points found at the owned accommodation level. The effect of the movement of the owned accommodation component on a given higher level aggregate tends to diminish mostly because its corresponding weight decreases in relative terms, when compared to the combined weight of all other components included in the aggregate. These relative weights are presented in Text Table VII. Considering the values appearing in this table, it becomes apparent that the weight of owned accommodation in any given aggregate will vary depending on the particular concept used. In particular, we see that owned accommodation has more potential to influence the higher level aggregates when it is based on rental equivalence than when it is based on any of the alternative concepts.

Si l'on examine le tableau explicatif VI, on peut constater que les différences entre les séries des indices sont moins marquées à des niveaux plus élevés d'agrégation. En 1991, les taux annuels de variation de l'IPC d'ensemble étaient compris entre 4.8% dans le cas de la série utilisant le concept des achats nets et 6.3% pour les séries utilisant le concept des débours. Cette différence de 1.5%, bien que non négligeable, est très faible si on la compare à la différence correspondante de 11.2 points de pourcentage que l'on observe au niveau du logement en propriété. L'effet du mouvement de la composante du logement en propriété sur un niveau d'agrégation plus élevé donné tend à diminuer, principalement parce que sa pondération diminue en valeur relative lorsqu'on le compare à la pondération combinée de toutes les autres composantes de l'agrégat. Ces pondérations relatives sont présentées au tableau explicatif VII. Si l'on considère les valeurs figurant dans ce tableau, on peut constater que la pondération du logement en propriété dans un agrégat donné variera selon le concept utilisé. En particulier, nous voyons que le logement en propriété a plus de possibilités d'influencer les niveaux d'agrégation plus élevés lorsqu'il est basé sur le concept de l'équivalence en valeur locative plutôt que sur un des autres concepts existants.

TABLEAU EXPLICATIF VII. Part relative du logement en propriété dans les dépenses de 1986 pour le Canada, selon le concept utilisé

Title Titre	Oficial concept Concept officiel	Rental equivalence concept Concept d'équivalence en valeur locative	1	ays concept es débours Including equity payments Comprenant les remboursements sur le capital	· ·	Based on downpayment and discounted mortgage payments Basés sur les paiements initiaux sur le capital et les versements hypothécaires actualisés
All-items - Ensemble	12.7	16.4	10.2	12.7	10.8	10.8
Housing - Habitation	35.0	42.1	29.6	35.1	30.8	31.0
Shelter - Logement	49.5	57.0	43.3	49.6	44.8	45.0
Principal accommodation - Logement principal	52.4	59.7	46.1	52.4	47.6	47.8

The annual rate is calculated by comparing annual price indexes from two calendar years. Le taux annuel est calculé en comparant les indices de prix annuels de deux années civiles.

Appendix 1

THE CONSUMER PRICE INDEX

The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time. Changes in the costs of this basket are therefore due only to "pure" price movements, i.e., price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.

The Consumer Price Index for each city measures price change from one time period to another within that specific city. Thus, while city CPI's show the **movement** of prices over time in each city, they do not indicate price level differences between cities or between cities and Canada. Such inter-city price comparisons for a selected number of items sold in grocery stores for 26 cities are available at present in Part V of this publication. Inter-spatial indexes covering approximately two thirds of the CPI basket for a selected number of cities are also available in this section.

Coverage

Beginning with the December 1988 to January 1989 price change, the weights used in the Consumer Price Index are those pertaining to 1986 expenditure patterns. Data used for establishing these patterns were obtained through the 1986 Family Expenditure Surveys. The expenditure data represents the expenditures of all private households (families and individuals) living in Canadian urban centres with a population of 30,000 or more. Population estimates for 1986 revealed 82 such urban centres. Largely due to limitations on the availability of detailed information on consumer expenditures it has become necessary to group the 82 urban centres into 34 urban centre strata. An urban centre stratum may be interpreted as a geographical unit around which the sampling framework of the CPI is constructed.

Separate CPI's are published for 18 of these centres which, together, accounted for approximately 75% of the total 1986 current consumption expenditures reported in the 82 centres. These 18 centres were, in part, selected in order to permit the publication of at least one CPI in each province. Some 300 commodities are priced in each of these 18 cities while in the remaining 64 urban centres, the number of commodities surveyed is fewer, with clothing and home furnishings being the notable exclusions.

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION

L'indice des prix à la consommation (IPC) mesure la variation dans le temps, exprimée en pourcentage, du coût à l'achat d'un "panier" constant de biens et de services, qui représente les achats faits par un groupe particulier de la population au cours d'une période donnée. Le "panier" renferme des biens et des services de quantité et de qualité invariables ou équivalentes et dont les prix sont mesurables au cours du temps. C'est ainsi que les variations de son coût résultent uniquement des mouvements "purs" de prix, c.-à-d. des mouvements de prix qui ne sont pas attribuables à des changements de qualité ou de quantité des biens et services de consommation du panier.

L'indice des prix à la consommation de chaque agglomération urbaine mesure les variations de prix entre deux périodes dans cette agglomération. Aussi les IPC des villes indiquent-ils le **mouvement** des prix dans le temps dans chaque agglomération, mais non les différences de niveau des prix entre les villes ou bien entre les villes et le Canada. De telles comparaisons entre les villes en ce qui concerne les niveaux de prix de certains articles vendus dans les épiceries sont présentées, pour 26 villes, à la Partie V de la présente publication. On y trouve également, pour certaines villes, des indices interspatiaux portant sur les deux tiers environ du panier de l'IPC.

Champ d'observation

À compter de janvier 1989, les pondérations utilisées pour l'indice des prix à la consommation se rapportent à la composition des dépenses de 1986. Les données qui ont servi à établir cette composition proviennent des enquêtes sur les dépenses des familles de 1986. Les données sur les dépenses représentent les dépenses de tous les ménages privés (familles et personnes seules) qui habitent les centres urbains du Canada qui comptent 30,000 habitants ou plus. D'après les estimations démographiques pour 1986, 82 centres urbains répondent à ce critère de population. En raison principalement du manque de renseignements détaillés sur les dépenses des consommateurs, il a été nécessaire de grouper les 82 centres urbains en 34 strates de centres urbains. Une strate de centres urbains peut se définir comme une unité géographique à partir de laquelle est constituée la base de sondage de l'IPC.

Des IPC distincts sont publiés pour 18 centres qui, ensemble, interviennent pour près de 75% du total des dépenses courantes de consommation déclarées en 1986 par les 82 centres. Les 18 centres ont été choisis, en partie, parce qu'ils permettent la publication d'un IPC au moins dans chaque province. On relève les prix de quelque 300 produits dans chacune des 18 villes; ce nombre est plus faible dans les 64 centres restants, les produits exclus étant principalement l'habillement et les articles d'ameublement.

Prices

The prices used in the calculation of the CPI are retail prices without regard to whether they are described as regular, special, etc. inclusive of all sales and excise taxes applicable to individual commodities. The pricing cycle starts in the latter part of each month and extends to the middle part of the following month. Although prices for most CPI items are collected on a monthly basis, some are priced less frequently, e.g., property taxes, automobile registration fees, dry cleaning services. However, such goods or services scheduled for pricing at less than monthly intervals will be priced in any month when there is evidence to suggest that significant price changes may occur prior to the next regularly scheduled pricing. The number of prices observed in a given city depends upon the importance of that city's expenditures to the total Canada expenditure and also the nature of the commodity, with those commodities displaying a high variability of price change generally requiring more observations. The selection of outlets in which prices are to be collected is judgmental (other than for rents) with the sample being designed to cover volume selling establishments.

Weights and Linking

The weights used in the calculation of the Consumer Price Index are periodically updated. This is a necessary procedure which serves to ensure that weights reflect changes in consumer expenditures thereby maintaining the relevancy of the index. As a result, different weighting systems are in effect in different time periods.

The 1982 family expenditure patterns were used to compile the CPI from January 1985 to December 1988. In January 1989 the 1982 weights were replaced by those derived from the expenditure patterns of 1986. This updating continues the policy of updating on a four-year cycle.

Prix

Les prix servant au calcul de l'IPC sont les prix au détail qu'il s'agisse de prix réguliers, de prix spéciaux, etc. et englobent toutes les taxes de vente, d'accise et autres taxes imposées aux produits. Le cycle des relevés commence vers la fin de chaque mois et se termine au milieu du mois suivant. Les prix de la plupart des articles de l'IPC sont recueillis chaque mois, mais certains articles sont observés moins souvent, notamment l'impôt foncier, l'immatriculation d'automobiles, le nettoyage à sec. Cependant, dans le cas des biens et services dont l'observation est prévue à des intervalles de plus d'un mois, on en relèvera le prix dans tout mois où il apparaît qu'une variation importante se produira avant le prochain relevé prévu au calendrier. Le nombre de prix observés dans une ville donnée dépend de l'importance des dépenses de cette ville par rapport au total des dépenses pour le Canada ainsi que de la nature du produit, les observations étant généralement plus fréquentes pour les produits dont les prix varient beaucoup. Le choix des points de vente où les prix doivent être recueillis est fait au jugé (sauf pour les loyers) et l'échantillon a pour but de couvrir les établissements à gros volume de vente.

Pondérations et enchaînement

Les pondérations utilisées dans le calcul de l'indice des prix à la consommation sont mises à jour périodiquement. Ce procédé est nécessaire pour que les pondérations tiennent compte des changements qui s'opèrent au niveau des dépenses à la consommation et, par le fait même, pour que l'indice conserve son utilité. En conséquence, différents schémas de pondérations sont utilisés pour des périodes de temps distinctes.

La composition des dépenses des familles de 1982 a servi au calcul de l'IPC à partir de janvier 1985 jusqu'à décembre 1988. En janvier 1989, les pondérations de 1982 ont été remplacées par d'autres dérivées de la composition des dépenses de 1986. Cette mise à jour poursuit la politique de Statistique Canada de mettre à jour les pondérations régulièrement à tous les quatre ans.

TEXT TABLE II. Comparison of 1982 and 1986 Expenditure Weights Used in the Consumer Price Index, by Major Component for Canada

TABLEAU EXPLICATIF II. Comparaison des pondérations des dépenses de 1982 et de 1986 utilisées pour l'indice des prix à la consommation, par composante principale pour le Canada

	T	
Major components	Weights 1982	Weights 1986
Composantes principales	Pondérations 1982	Pondérations 1986
All-items - Ensemble	100.00 ¹	100.00 ¹
Food - Aliments	20.02	18.05
Housing - Habitation	38.14	36.32
Clothing - Habillement	8.37	8.69
Transportation - Transports	15.75	18.29
Health and personal care - Santé et soins personnels	4.02	4.20
Recreation, reading and education – Loisirs, lecture et formation Tobacco products and alcoholic beverages – Produits du tabac et boissons	8.25	8.84
alcoolisées	5.45	5.60

Figures may not add up due to rounding.

The weights shown in Text Table II represent expenditures in 1982 (1982 quantities valued in 1982 prices) and in 1986 (1986 quantities valued in 1986 prices). They cannot be used to reconstruct or reaggregate indexes on a 1981 = 100 time base. The methodology required to permit such a reaggregation can be obtained on request by contacting the:

Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Telephone: (613) 951-9606).

The indexes based on 1986 weights were linked or connected in December 1988 to the appropriate indexes based on 1982 weights which had been in use since January 1985.

This linking procedure ensures that conceptually equivalent series are made continuous over time. It should be noted that the linking method is such that aggregate indexes cannot be considered as the direct average of their respective component indexes. In exceptional cases, this may cause the level, as well as the percentage changes, of an aggregate index to fall slightly outside the range of its component indexes.

Les pondérations du tableau explicatif II représentent les dépenses en 1982 (quantités et prix de 1982) et en 1986 (quantités et prix de 1986). Elles ne peuvent servir à reconstruire ni à réagréger des indices sur la base de 1981 = 100. La méthode à suivre pour une telle reconstruction peut être obtenue sur demande auprès de la:

Section des prix à la consommation Division des prix, Statistique Canada Ottawa (Ontario) K1A 0T6 (Téléphone: (613) 951-9606).

Les indices fondés sur les pondérations de 1986 ont été enchaînés ou raccordés en décembre 1988 aux indices correspondants fondés sur les pondérations de 1982, en usage depuis janvier 1985.

Grâce à cet enchaînement, des séries équivalentes sur le plan conceptuel sont continues dans le temps. On notera que cette méthode d'enchaînement ne permet pas de considérer les indices composés comme des moyennes directes de leur composante respective. Dans des cas exceptionnels, le niveau et les variations en pourcentage d'un indice agrégé peuvent ainsi dépasser légèrement l'étendue des indices composantes.

¹ Les chiffres ayant été arrondis, les totaux peuvent ne pas correspondre

Time Base

The All-items Consumer Price Index for Canada and each index city is expressed in terms of 1986 = 100, except for certain items, as noted, where the pricing survey was introduced subsequent to that year. The 1986 = 100 time base became effective with the release of the June 1990 index. The base period for the Consumer Price Index, as well as for other Statistics Canada index series, is revised periodically.

Rebasing the CPI is a straightforward arithmetic operation which does not change the picture of economic events. Percentage changes computed will be the same, except for small differences due to rounding, regardless of whether the 1981 = 100 or 1986 = 100 time base is used. Rebasing of the CPI does not involve changes in the base period expenditure weights. Furthermore, the method employed in converting to the 1986 = 100 time base does not affect the continuity or statistical comparability of the index series.

It should be noted, however, that although the percentage changes in an index series will be the same, except for small differences due to rounding, regardless of whether they are computed from the 1981 or 1986 time base series, the same is not true for changes measured in terms of index points.

Current Annual Rate of Change

A rate of change representative of an annual movement in prices may be derived in several ways, none of which is free of shortcomings and interpretational problems. Statistics Canada presently calculates three measures of annual change, the percentage change between any given month and the same month a year ago, the percentage change between annual averages based on a calendar year and the current annual rate of change.

The method selected for calculating the current seasonally adjusted annual rate of change in the CPI in Table 1 involves compounding the growth rate over the latest three-month period on the seasonally adjust ed level (see Appendix 3). For more information on CPI growth rates, see "A Note on the Current Annual Rate of Change of the Consumer Price Index", **Retail Prices and Living Costs** — Service Bulletin (Catalogue 62-005), Vol. 4, No. 4, April 1975.

Reconstructed Indexes

With the release of the January 1985 Consumer Price Index, certain series were reconstructed historically to reflect the introduction of the Consumer Classification System of Statistics Canada which was introduced with the 1982 Updating. A few additional reconstructions were made with the introduction of the 1986 basket. For further information, contact Prices Division (613-951-9606 or 951-3353).

Période de base

L'indice d'ensemble des prix à la consommation du Canada et les indices de chaque ville sont exprimés sur la base de 1986 = 100, sauf pour certains articles, qui sont signalés et dont l'enquête sur les prix n'a été introduite qu'après cette année là. La base temporelle de 1986 = 100 est devenue effective à partir de la diffusion de l'indice de juin 1990. La période de base pour l'indice des prix à la consommation, et pour d'autres séries d'indices de Statistique Canada, fait l'objet d'une révision periodiquement.

Pour recalculer la base de l'IPC, il suffit d'effectuer une opération arithmétique simple qui ne modifie pas le tableau des événements économiques. Les variations en pourcentage calculées sur la base 1981 = 100 et 1986 = 100 sont équivalentes, les petites différences étant attribuables à l'arrondissement. Le calcul de la nouvelle base de l'IPC ne change pas les pondérations des dépenses de la période de base. De plus, la méthode de conversion selon la base 1986 = 100 ne compromet pas la continuité ou la comparabilité statistique des séries d'indices.

Toutefois, même si les variations en pourcentage d'une série d'indices seront identiques, à quelques différences d'arrondissement près, quelle que soit la base (1981 ou 1986) utilisée pour les calculer, tel ne sera pas le cas de ses mouvements exprimés en points.

Taux de variation annuel courant

Plusieurs méthodes permettent de dériver un taux de variation pour représenter le mouvement annuel des prix, mais toutes comportent des points faibles et des problèmes d'interprétation. Statistique Canada calcule actuellement trois mesures de la variation annuelle, soit le changement en pourcentage pour un mois donné par rapport à un autre et au mois correspondant de l'année précédente, le changement en pourcentage entre des moyennes annuelles basées sur l'année civile et le taux de variation annuel courant.

La méthode retenue pour calculer le taux de variation annuel courant après désaisonnalisation de l'IPC au tableau 1 consiste à prendre un taux de croissance composé sur le niveau désaisonnalisé des trois derniers mois (voir appendice 3). Pour plus de renseignements sur le taux de croissance de l'IPC, se reporter à "Note sur le taux annuel courant de l'indice des prix à la consommation", **Prix de détail et coût de la vie** - Bulletin de service (n° 62-005 au catalogue), vol. 4, n° 4, avril 1975.

Indices reconstruits

À compter de l'émission de l'indice des prix à la consommation de janvier 1985, certaines séries historiques ont été reconstruites de façon à ce qu'elles représentent l'introduction du système de classification de la consommation de Statistique Canada qui fut introduit avec la mise à jour de 1982. L'adoption du panier de 1986 a amené quelques autres remaniements. Pour plus de renseignements, communiquez avec la Divison des prix (613-951-9606 ou 951-3353).

Whitehorse and Yellowknife

In keeping with its commitment to publish consumer price indexes for at least one urban centre in each province and territory, Statistics Canada, as part of the 1978 Updating, began to develop consumer price indexes for the urban centres of Whitehorse and Yellowknife. As no Family Expenditure Survey was conducted in these centres in 1978, 1972 expenditure patterns for these two centres were extrapolated to 1978 using the change in expenditure patterns between 1972 and 1978 in other urban centres. As the 1978 expenditure patterns were incorporated into the official CPI, commencing with the release of the April 1982 index, consumer price indexes for Whitehorse and Yellowknife were developed on a March 1982 = 100 time reference base. Since the expenditure patterns for Whitehorse and Yellowknife were derived and not directly observed, the indexes for these two urban centres were not included in the calculation of the official CPI for Canada. With the introduction of the 1982 Updating, these two centres were included in the calculation of the official CPI for Canada.

It was not possible, at this time, to develop an owned accommodation index for these two centres comparable to that in concept of the national CPI. The nature and the relatively small size of the housing market in these two centres is such that Statistics Canada was unable to construct reliable price indexes for new houses. It was decided that as an interim and only available alternative measure, the price movement of rental accommodation would be used to represent that of owned accommodation. As a consequence, the All-items indexes published for these centres are not comparable to those for Canada or for any of the sixteen urban centres for which a CPI is produced. The rent data used are collected on a quarterly basis by the respective territorial governments. For rents, the data are incorporated into the consumer price indexes for these two centres with a two-month lag.

Provincial CPI's

Consumer price indexes for provincial urban centres were published for the first time in the July-September 1988 issue of this publication. An article describing the coverage and method of these indexes was published in the same issue. Updated Provincial CPI's are now a permanent feature of this publication.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in **The Consumer Price Index, Reference Paper, Updating Based on 1986 Expenditures,** (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in Family Expenditure in Canada, 1986, Catalogue 62-555.

Whitehorse et Yellowknife

Statistique Canada, conformément à son engagement de publier des indices des prix à la consommation pour au moins un centre urbain dans chaque province et territoire, a commencé à élaborer des indices de prix à la consommation pour les centres urbains de Whitehorse et Yellowknife dans le cadre de la mise à jour de 1978. Puisqu'il n'y a pas eu dans ces centres d'enquête sur les dépenses des familles en 1978, les données sur la composition des dépenses de 1972 pour ces deux villes ont été extrapolées pour l'année 1978 en se fondant sur l'évolution de la composition des dépenses entre 1972 et 1978 dans d'autres centres urbains. Étant donné que la composition des dépenses de 1978 a été incorporée dans l'IPC officiel à la consommation avec l'indice d'avril 1982, les indices des prix à la consommation pour Whitehorse et Yellowknife ont été élaborés sur la base mars 1982 = 100. La composition des dépenses pour Whitehorse et Yellowknife ayant été dérivée plutôt qu'observée directement, les indices pour ces deux centres urbains n'étaient pas compris dans le calcul de l'IPC officiel pour le Canada. Avec l'introduction de la mise à jour de 1982, ces deux centres ont été pris en compte lors du calcul de l'IPC officiel pour le Canada.

Il n'a pas été possible d'élaborer, pour ces deux centres, un indice du logement en propriété qui soit conceptuellement . comparable à celui incorporé à l'IPC national. La nature et la petitesse relative du marché de l'habitation dans ces deux centres ont empêché Statistique Canada de construire des indices de prix fiables pour les maisons neuves. Comme c'est la seule mesure disponible, il a été décidé d'utiliser, pour le moment, le mouvement des prix du logement en location pour représenter celui du logement en propriété. En conséquence, les indices d'ensemble publiés pour ces centres ne sont pas comparables à ceux du Canada ou d'aucun des seize autres centres urbains pour lesquels un IPC est calculé. Les données sur les loyers utilisées sont recueillies trimestriellement par les deux administrations publiques territoriales. S'agissant des loyers, les données pour ces deux centres sont incorporées aux indices de prix à la consommation avec deux mois de retard.

IPC Provinciaux

Des indices de prix à la consommation pour les centres urbains provinciaux ont été publiés pour la première fois dans le numéro de juillet-septembre 1988 de la présente publication. Un article décrivant la couverture et la méthodologie de ces indices est paru dans ce même numéro. Les IPC provinciaux mis à jour sont devenus partie intégrante de la présente publication.

Renseignements supplémentaires et publications connexes

Le Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986, (hors-série), n° 62-553 au catalogue, décrit en détail les méthodes et les concepts de l'IPC. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans Dépenses des familles au Canada, 1986, n° 62-555 au catalogue.

The latest information on the Consumer Price Index for Canada and 18 cities is also available in the **Consumer Price Index**, Catalogue 62-001 monthly. In addition, selected educational and promotional material are available. For these and further information contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606 or 613-951-3353).

De plus, les derniers renseignements sur l'indice des prix à la consommation du Canada et de 18 villes sont publiés dans le bulletin mensuel **L'indice des prix à la consommation**, n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606 ou 613-951-3353).

Appendix 2

THE PURCHASING POWER OF THE CONSUMER DOLLAR

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

Changes in the purchasing power of the consumer dollar, put simply, are inversely related to movements in the Consumer Price Index. For example, between 1986 and June 1990, consumer prices as measured by the CPI rose 19.2% such that, goods and services which could have been purchased for \$100.00 in 1986 would cost \$119.20 in June 1990. Each consumer dollar in June 1990 therefore buys less than in 1986. The extent to which the purchasing power of the dollar has declined is matched precisely by the increase in the consumer price index. Thus the purchasing power of a dollar in June 1990 compared to the 1986

This process may be interpreted as the deflation of money, that is, adjusting values expressed in monetary terms in order to eliminate price effects.

Users of the tabulation which shows the purchasing power of the consumer dollar compared to the 1986 dollar at different points in time (Table 2) should note that, as in the case of the Consumer Price Index from which the numbers are derived, the data may not measure closely the experiences of any one specific family within the large urban group to which the CPI relates. At the same time changes in the purchasing power of the dollar are not expected to match the experience of other population groups whose expen diture behaviour is significantly different from those associated with the CPI target population. It should also be noted that like the CPI, changes in the purchasing power of the dollar are not directly affected by changes in income taxes, unemployment insurance premiums, other types of security payments and all other goods and services that are not included in the CPI basket.

Appendice 2

LE POUVOIR D'ACHAT DU DOLLAR DE CONSOMMATION

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie et la baisse des prix est liée à la hausse du pouvoir d'achat.

En somme, le pouvoir d'achat du dollar de consommation varie en relation inverse avec les mouvements de l'indice des prix à la consommation. Par exemple, entre 1986 et juin 1990, les prix à la consommation mesurés par l'IPC ont grimpé de 19.2% de sorte que les biens et services qu'on pouvait acheter en 1986 avec \$100.00 coûtaient \$119.20 en juin 1990. Chaque dollar de consommation en juin 1990 achète donc moins qu'en 1986. Le pouvoir d'achat du dollar a baissé exactement dans la même proportion que l'indice des prix à la consommation a augmenté. Par conséquent, le pouvoir d'achat d'un dollar en juin 1990, par rapport au dollar de 1986,

Ce processus peut être assimilé à la déflation de l'argent, c'est-à-dire à la correction des valeurs monétaires afin d'éliminer l'influence des prix.

Les utilisateurs des totalisations qui indiquent le pouvoir d'achat du dollar de consommation à différentes périodes par rapport à 1986 (tableau 2) doivent noter que ces chiffres sont tirés de l'indice des prix à la consommation et qu'ils peuvent, tout comme ce dernier, ne pas mesurer fidèlement la situation particulière d'une famille faisant partie du grand groupe urbain auquel se rapporte l'IPC. Par ailleurs, les variations du pouvoir d'achat du dollar ne reflètent pas les changements touchant les autres groupes de population dont les habitudes de dépenses diffèrent sensiblement de celles du groupe cible pour l'IPC. Il faut également noter que, tout comme l'IPC, les variations du pouvoir d'achat du dollar ne sont pas touchées directement par les changements de l'impôt sur le revenu, des primes d'assurance-chômage, d'autres paiements de sécurité sociale et des prix de tous les autres biens et services ne faisant pas partie du panier de l'IPC.

Appendix 3

SEASONAL ADJUSTMENT OF THE CONSUMER PRICE INDEX

Economic time series, measuring changes through time in economic activities, reflect the combined effects of the underlying seasonal, cyclical, trend and irregular factors which influence them. Such series can be decomposed into distinct movements representing the separate effects of the seasonal, cyclical and trend factors and a residual movement representing factors causing irregular non-repetitive movements.

Seasonal fluctuations in a series are those that can be identified with a particular season or time of year. These fluctuations tend to occur at about the same time each year with roughly the same magnitude and are the composite result of climatic influences and social and commercial customs (e.g., harvests, end of season sales).

Cyclical movements consist of sequences of change over periods longer than a year, during which the series rises to a peak and then falls back, subsequently to rise again. For many series this type of movement is associated with expansion and contraction of the economy over the "business cycle".

The trend is a steady underlying movement which reflects continuing or slowly changing economic forces.

Finally, the fluctuations that remain unaccounted for by the seasonal, cyclical and trend movements of a series are termed irregular. The factors causing irregular movements in a series are of a non-repetitive, ad-hoc nature. The irregular component tends to have a stable random appearance, but may include some extreme movements having identifiable causes (e.g., strikes or severe weather). They therefore can be distinguished from the much smaller random irregular variations.

Appendice 3

LA DÉSAISONNALISATION DE L'INDICE DES PRIX À LA CONSOMMATION

Les séries chronologiques économiques mesurent l'évolution dans le temps de l'activitié économique. Ces séries reflètent les effets combinés de la saisonnalité, du cycle, de la tendance générale et d'autres facteurs accidentels qui leur sont propres et qui agissent sur elles. Il est possible de décomposer de telles séries ou mouvements distincts représentant séparément les effets de tel ou tel facteur (saisonnalité, cycle, tendance) et en un mouvement résiduel représentant les facteurs de mouvements accidentels (non répétitifs).

Les fluctuations saisonnières d'une série sont celles que l'on peut relier à une saison ou une période donnée de l'année; elles ont tendance à se produire généralement à peu près à la même époque de l'année et avec la même ampleur. Elles sont le résultat à la fois de conditions climatiques et d'habitudes sociales et commerciales (telle les récoltes, les ventes de fin de saison).

Les mouvements cycliques se définissent comme une suite de variations sur des périodes supérieures à un an, au cours desquelles la série atteint un sommet, descend puis remonte à nouveau. Ce type de mouvement est associé, pour de nombreuses séries, à l'expansion et à la récession économique au cours du "cycle économique".

La tendance générale est un mouvement fondamental stable qui reflète la continuité ou un changement lent de l'économie.

Enfin, les fluctuations qui ne se classent ni dans la saisonnalité, ni dans le cycle, ni dans la tendance générale sont désignées comme mouvements accidentels. Les facteurs expliquant ce type de mouvement dans une série sont de nature spéciale et non répétitive. L'élément accidentel tend à présenter une apparence aléatoire stable mais il peut comprendre certains mouvements extrêmes, dont on peut identifier les causes (comme des grèves ou de fortes intempéries). Ils peuvent donc être distingués des variations irrégulières aléatoires beaucoup moins prononcées.

The methodologies used for removing as much of the seasonal fluctuation as possible from a series have been described in detail in numerous articles and texts on the subject.¹ Rather than reiterating those texts, an outline of the methodologies employed in the derivation of seasonally adjusted consumer price indexes for Canada is provided below.

With the introduction of the 1982 basket, the seasonal adjustment methodology was changed. seasonal adjustment is performed at the level of the seven major components with the seasonally adjusted All-items and All-items excluding Food indexes being the weighted average of their components. This indirect seasonal adjustment of the two aggregate series ensures (except for possible rounding differences) that the aggregate movements will be within the range of their components' movements. Since each basket has its own weights, the move to indirect seasonal adjustment of the aggregates dictated the use of unlinked series as the basis for the seasonal adjustment. Estimating a separate seasonal pattern for each basket has some conceptual advantages since it means that the classification and weight changes introduced with each updating of the basket will not distort the estimates. However, there is an operational difficulty which arises due to the desirability of having at least seven years of data for estimation of the seasonal pattern and the current rapidity with which CPI baskets are updated. Given the current updating cycle, at the time a new basket is introduced, we have only three years of data for the new basket. To create a longer time series, we chain on data from the previous basket back to it's beginning. This reintroduces some of the distortions present in estimating seasonal patterns from linked data.

The above distortion will be minimized through the use of concurrent seasonal adjustment rather than forecast seasonal factors. With the concurrent methodology, the seasonal pattern is estimated each month using all available data. However, to minimize revisions we will revise past indexes only at the end of each calendar year.

Les méthodes utilisées pour éliminer le plus possible de saisonnalité d'une série ont fait l'objet de descriptions détaillées dans de nombreux articles et ouvrages sur la question¹. Au lieu d'en reprendre ici le contenu, nous présentons ci-dessous les grandes lignes des méthodes utilisées pour dériver les indices des prix à la consommation désaisonnalisés pour le Canada.

Avec l'introduction du panier 1982, la méthode de désaisonnalisation fût changée. La désaisonnalisation directe est effectuée à l'échelle des sept composantes principales; les versions désaisonnalisées de l'indice des aliments et de l'indice d'ensemble sans les aliments correspondent à la leurs pondérée de composantes. désaisonnalisation indirecte des deux séries agrégées garantit que les mouvements agrégés se situeront dans les limites des mouvements de leurs composantes (exception faite des différences attribuables à l'arrondissement). Puisque chaque panier a ses propres coefficients de pondération, le passage à la méthode indirecte de désaisonnalisation des séries agrégées a entraîné l'utilisation, à titre de base de la désaisonnalisation, des séries non enchaînées. L'estimation de tendances saisonnières distinctes pour chacun des paniers représente certains avantages au point de vue conceptuel, puisqu'elle signifie que les changements apportés à la classification et aux coefficients de pondération au moment de la mise à jour du panier n'entraîneront aucune distortion. Toutefois, une difficulté opérationnelle existe étant donné, d'une part, qu'il est souhaitable d'avoir au moins sept années de données pour estimer la tendance saisonnière et, d'autre part, en raison de la rapidité avec laquelle on met maintenant à jour le panier de l'IPC. étant donné le cycle courant de mise-à-jour, nous n'avons que trois ans de données pour un nouveau panier lorsque celui-ci est introduit. Afin de créer une série plus longue, nous enchaînons les données du nouveau panier à celles du panier précédent jusqu'à son début. Cette mesure ramène certaines distorsions que l'on retrouvait dans l'estimation des tendances saisonnières des données enchaînées.

Ces distortions seront toutefois minimisées par l'utilisation de désaisonnalisations concomitantes plutôt que de coefficients saisonniers projetés. Dans la méthodologie concomitante, la tendance saisonnière est estimée chaque mois au moyen de toutes les données accessibles. Nous ne recalculerons toutefois les indices antérieurs qu'à la fin de chaque année civile, et ce pour réduire au minimum le nombre de révisions.

Appendix 4

CITY AVERAGE RETAIL PRICES

Introduction

The Average Retail Price Survey is under taken to produce an accurate measure of average prices at one point in time which will permit comparison between cities. In order not to generate artificial price differentials it is essential that the qualities, brands and sizes selected are sufficiently similar. Prices of approximately 60 items, consisting mainly of food and some personal care items and household supply items are collected in representative outlets in 26 cities. These cities are: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Regina, Saskatoon, Calgary, Winnipeg, Edmonton, Vancouver, Victoria and Whitehorse. This survey is normally under taken during the first week of January, April, July and October.

In order that the average prices generated for one city will be comparable with those for another city, price collection is generally limited to widely available manufacturers' brands. For meat and produce, care is taken to narrowly define cuts and qualities. The goods and services tax (GST) and the provincial retail sales tax are included in the retail averages where applicable.

Calculation Methodology

City Prices. Prices are collected in both chain and independent stores. (A chain stores organization is defined as one operating four or more stores under the same legal ownership.) A city average price is calculated for each item by weighting the average prices obtained for chain and independent stores according to their overall market sales share in that city. For branded items sold under brand labels, an average price for each brand is first calculated in the manner described above; the brand averages are then weighted together to form the item average. The weight assigned each brand in this process is proportionate to the number of price quotes obtained for each of the brands in that city.

Appendice 4

PRIX DE DÉTAIL MOYENS PAR VILLE

Introduction

L'enquête sur les prix moyens de détail est effectuée afin d'obtenir une mesure adéquate des prix moyens, à une période donnée, qui permette une comparaison entre les villes. Il est essentiel que les qualités, les marques et les tailles choisies soient suffisamment équivalentes afin de ne pas introduire des différences de prix artificielles. Les prix de quelques 60 articles, principalement des produits alimentaires, certains articles de soins personnels et des fournitures de ménage, sont relevés dans de nombreux points de vente dans 26 villes: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria et Whitehorse. Cette enquête est normalement effectuée durant la première semaine de janvier, d'avril, de juillet et d'octobre.

Afin que les prix moyens calculés pour une ville puissent être comparables à ceux d'une autre ville, l'observation des prix se limite généralement aux marques des fabricants largement distribuées. Dans le cas de la viande, des fruits et des légumes, on prend soin de définir avec précision les morceaux et les qualités. La taxe sur les produits et services (TPS) et la taxe de vente au détail sont ajoutées au prix de détail moyen s'il y a lieu.

Méthode de calcul

Prix urbains. Les prix sont recueillis dans les magasins à succursales multiples et les magasins indépendants. (Une entreprise à succursales multiples est définie comme celle qui exploite quatre magasins ou plus sous la même raison sociale.) On calcule un prix moyen par ville pour chaque article en pondérant les prix moyens recueillis dans les magasins à succursales multiples et dans les magasins indépendants selon la part de leurs ventes sur le marché général dans leur ville. Dans le cas ces articles vendus sous marque déposée, on calcule d'abord un prix moyen pour chaque marque déposée de la façon décrite plus haut: ensuite on pondère ensemble les moyennes des marques déposées afin d'en arriver à la moyenne pour l'article. Le poids assigné à chaque marque déposée lors de ce processus est proportionnel au nombre de prix observés dans la ville en question pour cette marque déposée.

Weighted city averages. A weighted city average price for each item is derived by weighting the relevant city averages. The importance of each city in calculating the weighted city average is determined by the volume of retail sales in that city.

Item Specifications

A description of the approximately 60 items covered in the Average Prices Survey can be acquired by contacting Prices Division.

Average Retail Prices for Gasoline

Tables 16 through 19 present average retail prices for two types of gasoline retailed in two types of filling stations. The information is collected on a monthly basis as part of the Consumer Price Index survey. Gasoline prices are collected at the pump from a sample of full service and self-serve filling stations in major urban centres across Canada. The prices collected included all applicable Federal and Provincial taxes. They are presented as average prices per litre of gasoline. The series presented in these tables are confined to the 16 urban centres for which Consumer Price Indexes are produced and cover the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to January 1979, are, however, based on the average prices per imperial gallon.

Average Retail Prices for Fuel Oil

Table 20 presents average retail prices for fuel oil. The information is collected nine times yearly as part of the Consumer Price Index Survey. Fuel oil prices are collected from a sample of distributors in major urban centres across Canada. The prices collected include all applicable Federal and Provincial taxes. They are presented as average prices per litre. The series presented in Table 20 are confined to 16 urban centres and for the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to October 1980 are, however, based on the average prices per imperial gallon.

Moyennes pondérées des villes. Une moyenne pondérée du prix de chaque article pour l'ensemble des villes est calculée en pondérant les moyennes appropriées des villes. L'importance de chaque ville dans le calcul de la moyenne pondérée des villes est déterminée par le volume des ventes au détail dans cette ville.

Spécification des articles

Une description des quelques 60 articles contenus dans l'enquête des prix moyens peut être obtenu en communiquant avec la Division des prix.

Prix de détail moyens de l'essence

Les tableaux 16 à 19 présentent les prix de détail moyens de deux types d'essence vendus dans deux genres de stations. Cette information est relevée à chaque mois dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix de l'essence sont relevés, sur place, auprès d'un échantillon de stations offrant un service complet et de stations libre service dans les principaux centres urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ces tableaux sont ceux d'un litre d'essence. Les séries présentées se limitent aux 16 centres urbains pour lesquels on produit un IPC pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant janvier 1979 sont, toutefois, sur la base d'un gallon impérial.

Prix de détail moyens du mazout

Le tableau 20 présente les prix de détail moyens du mazout. Cette information est relevée neuf fois par année dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix du mazout sont relevés auprès d'un échantillon de distributeurs dans les principaux centre urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ce tableau sont ceux d'un litre. Les séries présentées au tableau 20 se limitent à 16 centres urbains, pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant octobre 1980 sont, toutefois, sur la base d'un gallon impérial.

Appendix 5

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government

Appendice 5

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que

employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking an other complete survey.

statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada recoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 7 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 7 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

HIRE OUR TEAM OF RESEARCHERS FOR \$53 A YEAR

NOTRE ÉQUIPE DE CHERCHEURS EST À VOTRE SERVICE POUR 53\$PAR ANNÉE

Subscribing to **Perspectives on Labour and Income** is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But **Perspectives** is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analysing the statistics to bring you simple, clear summaries of where the labour market and income distributions are headed.

Our team of experts is working to bring you the latest labour and income data. Each quarterly issue has:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research projects
- information on new survey results

As a special bonus, twice a year you will also receive a Labour Market Review, giving you up-to-the-minute analysis and data of how the labour market has performed over the last six months or year.

And all for only \$53.00.

Thousands of Canadian professionals turn to **Perspectives** to discover new trends in labour and income and to stay up-to-date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find **Perspectives** indispensable. GUARANTEED. If you aren't convinced after reading your first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to **Perspectives** today.

ORDER NOW!

For only \$53 (plus \$3.71 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$64 for U.S. customers and US\$74 for customers outside North America.

S'abonner à **L'emploi et le revenue en perspective**, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les tendances actuelles du marché du travail et de la répartition des revenus.

Notre équipe de spécialistes travaille activement afin de mettre à votre disposition des données actuelles sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez

- des articles de fond rédigés par des spécialistes de l'emploi et du revenu;
- plus de 50 indicateurs clés de l'emploi et du revenu;
- un aperçu des projets de recherche en cours;
- de l'information provenant des nouvelles enquêtes.

En plus, vous recevrez une revue du marché du travail, un supplément publié deux fois par année.

Tout cela pour 53 \$ seulement!

Des milliers de professionnels au Canada consultent **Perspective** pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que **L'emploi et le revenu en perspective** deviendra pour vous un outil indispensable. Nous le garantissons. Si vous n'êtes pas satisfaits après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à **Perspective** dès aujourd'hui.

ABONNEZ-VOUS DÈS MAINTENANT:

Pour 53 \$ seulement (plus 3,71 \$ de TPS), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année).
L'abonnement est de 64 \$ US a l'extérieur de l'Amérique du Nord.

Canadä

ARE YOU CONCERNED ABOUT CANADA'S COMPETITIVENESS IN THE GLOBAL MARKETPLACE?

You are not alone. Goods, money, information and technology are flowing across borders at an unprecedented pace. In order for us to be key players, we must keep informed. We must know:

- how our products are sold to other countries
- how to assess the foreign competition

Statistics Canada offers you five publications on the subject that can broaden your understanding of Canada's dealings with other countries.

CANADA'S INTERNATIONAL INVESTMENT POSITION

This publication gives a snapshot of Canada's international financial position, showing who's investing in what, in Canada and abroad at year end. Especially valuable analytical information is also provided on the relative position of both Canadian and foreign ownership and control of capital employed in Canada.

PRICE: \$37 (Cat. No. 67 -202)

SECURITY TRANSACTIONS WITH NON-RESIDENTS

Find out who's trading what on security markets with this monthly publication which presents Canada's trading in stocks, bonds and money market paper with non-residents. The December issue includes a description of sources and methods as well as complete data for the year.

PRICE: \$158 (Cat. No. 67 -002)

CANADA'S BALANCE OF INTERNATIONAL PAYMENTS (HISTORICAL STATISTICS 1926 TO 1990)

For the first time, balance of payments data are available in the same format from 1926 to 1990, in one publication. You get:

- all the historical data in one place!
- summary tables for the current and capital accounts.
- selected additional data such as exchange rates and gross domestic product.

...all in one compact, well-presented publication!

PRICE: \$50

CANADA'S INTERNATIONAL TRANSACTIONS IN SERVICES

This annual report looks at our international pattern of trade in services: travel, freight, business services, government and other services.

PRICE: \$32 (Cat. No. 67 -203)

CANADA'S BALANCE OF INTERNATIONAL PAYMENTS

Need a complete picture of Canada's international transactions? Then refer to this quarterly publication which outlines merchandise, services, investment income and transfers of the current account; and the financial transactions of the capital account. Transactions are shown for six geographical areas.

PRICE: \$110 (Cat. No. 67 -001)

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

LA SITUATION CONCURRENTIELLE DU CANADA SUR LES MARCHÉS INTERNATIONAUX VOUS PRÉOCCUPE-T-ELLE?

Vous n'êtes pas les seuls. Les produits, l'argent, l'information et la technologie franchissent les frontières à un rythme encore jamais vu. Si nous voulons faire partie des joueurs clés, nous devons être informés sur :

- comment nos produits sont vendus aux autres pays
- comment évaluer la place du Canada dans la concurrence étrangère À ce sujet, Statistique Canada met à votre disposition cinq publications qui peuvent élargir votre compréhension des relations économiques du Canada avec les autres pays.

BILAN DES INVESTISSEMENTS INTERNATIONAUX DU CANADA

Cette publication donne un instantané de la position financière internationale du Canada et montre qui investit dans quoi au Canada et à l'étranger, en fin d'année. S'y retrouvent aussi des renseignements sur l'importance de la propriété et du contrôle canadiens et étrangers du capital employé au Canada.

PRIX: 37 \$ (N°. 67 -202 au cat.)

BALANCE DES PAIEMENTS INTERNATIONAUX DU CANADA (STATISTIQUES HISTORIQUES 1926 à 1990)

Pour la première fois, les données de la balance des paiements sont présentées sous le même format de 1926 à 1990 dans une seule publication. Vous y trouverez:

- toutes les données historiques dans le même volume!
- des tableaux sommaires pour le compte courant et le compte de capital
- des données supplémentaires choisies, telles que les taux de change et le produit intérieur brut ...et tout ceci, dans une publication unique, compacte et bien présentée!

PRIX: 50 \$ (N°. 67-508 au cat.)

Pour commander, prière d'écrire au Service de la Vente des publications de Statistique Canada, Ottawa (Ontario) K1A 0T6, ou de communiquer avec le centre régional de consultation de Statistique Canada le plus proche (la liste apparaît dans cette publication).

Pour commander plus rapidement, utilisez votre carte VISA ou MasterCard et appelez sans frais au

LA BALANCE DES PAIEMENT INTERNATIONAUX DU CANADA

Vous voulez une vue complète des opérations internationales du Canada? Alors consultez cette publication trimestrielle qui retrace les marchandises, les services, les revenus de placements et les transferts au compte courant et les opérations financières au compte de capital. Les opérations sont classées selon six régions géographiques.

PRIX: 110 \$

LES TRANSACTIONS INTERNATIONALES DE SERVICES DU CANADA

Cette publication annuelle examine nos pratiques internationales en ce qui concerne les services : voyages, transports, services commerciaux, services gouvernementaux et autres.

PRIX: 32 \$ (N°. 67 -203 au cat.)

OPÉRATIONS EN VALEURS MOBILIÈRES AVEC LES NON-RÉSIDENTS

Sachez qui achète quoi sur les marchés des valeurs mobilières grâce à cette publication mensuelle qui présente le commerce du Canada en actions, obligations et effets du marché monétaire avec les non-résidents. Le numéro de décembre non seulement présente les données complètes de l'année, mais encore une description des sources et des néthodes.

PRIX: 158 \$ (N°. 67 -002 au cat.)

JOIN THE WITH THE MOST USEFUL AND ATTRACTIVE CANADA YEAR BOOK EVER PUBLISHED.

On the occasion of the nation's 125th anniversary of Confederation, the 1992 Canada Year Book takes a unique look at the fascinating highlights in the development of Canada since 1867.

Exceptionally popular among business people, journalists, librarians, parliamentarians, educators and diplomats for 125 years, the 1992 Canada Year Book is designed as a comprehensive reference source for the latest on economic, political, and social information on Canada and Canadians. And for the first time, this "special collector's" edition presents picturesque vignettes on Canada's past with informative, easy-to-read text.

Special features include:

- a new 22cm X 30cm (9" X 12") format
- larger typeface
- over 300 rare archival photos

• historical perspectives on Canada's past

• 22 chapters, 607 pages bound in deluxe hard cover

Time and time again, you'll reach for this compact encyclopedia to answer questions on all aspects of Canada.

EN VOUS PROCURANT
L'ANNUAIRE DU CANADA
LE PLUS UTILE ET LE PLUS
ATTRAYANT JAMAIS PUBLIÉ.

L'Annuaire du Canada de 1992, qui marque le 125e anniversaire de la Confédération, jette un regard unique sur les grands moments de l'évolution du pays depuis 1867.

Cet ouvrage, particulièrement populaire depuis 125 ans auprès des gens d'affaires, des journalistes, des bibliothécaires, des parlementaires, des enseignants et des diplomates, est conçu comme un ouvrage de référence où l'on retrouve les données économiques, politiques et sociales les plus récentes sur le Canada et les Canadiens. Cette édition spéciale présente, pour la première fois, de pittoresques illustrations se rapportant à l'histoire du Canada de même que des textes informatifs et faciles à lire.

Au nombre des caractéristiques spéciales, on compte :

- un nouveau mode de présentation : 22cm x 30 cm (9" x 12")
- des caractères plus gros
- plus de 300 photos d'archives rares
- des perspectives historiques sur le passé du Canada
 - 22 chapitres, 607 pages reliées par une couverture rigide de luxe.

Cette encyclopédie compacte est un ouvrage indispensable pour répondre à vos questions portant sur tous les aspects du Canada.

- LE TERRITOIRE
 - LA POPULATION
 - LA NATION
 - L'ÉCONOMIE
 - LES ARTS ET LES LOISIRS

Available in separate English and French editions, the Canada Year Book (Cat. No. 11-402E) sells for \$49.95 (plus \$5.05 shipping and handling) in Canada, US \$60 in the United States, and US\$70 in other countries (includes shipping and handling).

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A OT6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster ordering, using your VISA or MasterCard, call toll-free 1-800-267-6677 or fax your order to (613) 951-1584. Please do not send confirmation.

Vous pouvez vous procurer l'Annuaire du Canada (no 11-402F au Catalogue), en version française ou anglaise, pour 49,95 \$ (plus 5,05 \$ pour frais d'expédition et de manutention) au Canada, 60 \$ (devises américaines) aux États-Unis et 70 \$ (devises américaines) dans les autres pays (frais d'expédition et de manutention compris).

Pour commander, prière d'écrire au Service des Ventes des publications de Statistique Canada, Ottawa (Ontario) K1A 0T6, ou de communiquer avec le Centre régional de consultation de Statistique Canada le plus près de chez vous (voir la liste qui figure dans la publication).

Pour accélérer les commandes, utilisez votre carte VISA ou MasterCard ou composez sans frais le 1-800-267-6677 (téléphone) ou le (613) 951-1584 (télécopieur). Veuillez ne pas envoyer de confirmation.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Information and Current Analysis Unit, Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9606) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

Most of the data published in this publication is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. The Databank identification numbers, by which data may be retrieved from CANSIM, are given in the headings of the relevant series in Tables in the publication. For further information on CANSIM call (613) 951-8200 or write Electronic Data Dissemination Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Margaret Parlor, Chief, Consumer Prices Section
- Harold Harnarine, Head, Information and Current Analysis Unit

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans cette publication peuvent être obtenues sous forme lisible par machine de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Les numéros d'identification de la Databank qui servent à retrouver les données de CANSIM sont inscrits à l'en-tête des séries respectives de la publication. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à, Division de la diffusion informatique des données, Statistique Canada, Immeuble R.H. Coats Building, Ottawa, K1A 0T6.

Cette publication a été rédigée sous la direction de:

- Michel Jacod, Directeur, Division des prix
- Margaret Parlor, Chef, Section des prix à la consommation
- Harold Harnarine, Chef, Sous-section de l'information et de l'analyse courante

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behaviour

Third Quarter, 1992

Trends in the All-items Index

Between June and September 1992 (third quarter), the All-items Consumer Price Index (CPI) for Canada increased by 0.2%. The index rose 0.2% in July, held steady in August, and slid back 0.1% in September. The CPI advanced by 0.9% and 0.5% in the first and second quarters of this year.

The seasonally adjusted CPI rose by 0.4%, following an increase of 0.2% in the second quarter and a higher increase of 0.6% in the first quarter. Both the July and August indexes rose 0.2%, while the September index rose 0.1%. The seasonally adjusted quarterly rates have been below 1.0% since the second quarter of last year.

The average of the year-over-year changes recorded in the third quarter was 1.3%, slightly lower than the 1.6% and 1.4% changes posted in the first and second quarters.

Contributions by Aggregate Indexes

Five of the major components showed price rises over the third quarter while two showed declines. The largest upward pressures came from Housing (0.4%) and from Recreation, Reading and Education (1.1%). Other upward influences emanated from Tobacco Products and Alcoholic Beverages (0.5%), Health and Personal Care (0.8%) and Clothing (0.4%). Two components exerted downward pressures, Food (-0.7%) and Transportation (-0.5%).

The Goods index fell 0.3% in the third quarter, primarily due to declines for Durable goods (-0.9%) and Non-durable goods (-0.2%). These were only slightly offset by a rise in prices of Semi-durable goods (0.2%). The relatively large drop in the Goods index was more than matched by a 0.8% rise in the Services index. One factor in the increase in this index was the broadening of Quebec's sales tax base in July. Some of the commodities affected by this move were new houses, home repairs, hotel and motel accommodation, cultural and recreational services, automotive repairs, hair dressing and domestic flights.

The Energy index rose 0.2%. Increases for electricity (0.8%) and fuel oil (0.3%) were somewhat mitigated by a decline of 0.2% in gasoline prices.

Points saillants

Comportement des prix à la consommation

Troisième trimestre de 1992

Tendances de l'indice d'ensemble

Entre juin et septembre 1992 (troisième trimestre), l'indice d'ensemble des prix à la consommation (IPC) pour le Canada augmente de 0.2%. Il s'accroît de 0.2% en juillet, reste stable en août et recule de 0.1% en septembre. L'IPC avait augmenté de 0.9% et de 0.5% au premier et au deuxième trimestre de l'année.

L'IPC désaisonnalisé s'accroît de 0.4%, après une hausse de 0.2% au deuxième trimestre et une progression plus forte de 0.6% au premier. L'indice augmente de 0.2% en juillet et en août, et de 0.1% en septembre. Les taux trimestriels désaisonnalisés sont inférieurs à 1.0% depuis le deuxième trimestre de l'an dernier.

La moyenne des variations d'une année sur l'autre au troisième trimestre s'établit à 1.3%, un peu moins que les variations de 1.6% et de 1.4% enregistrées au premier et au deuxième trimestre.

Contribution des indices agrégés

Cinq des principales composantes augmentent au cours du troisième trimestre et deux baissent. Les pressions à la hausse les plus fortes proviennent des indices de l'habitation (0.4%) et des loisirs, de la lecture et de l'éducation (1.1%). Les indices des produits du tabac et des boissons alcoolisées (0.5%), de la santé et des soins personnels (0.8%) ainsi que de l'habillement (0.4%) exercent également une pression à la hausse. Deux indices se traduisent par une pression à la baisse. Il s'agit de ceux des aliments (-0.7%) et des transports (-0.5%).

L'indice des biens diminue de 0.3% au troisième trimestre, principalement à cause des baisses pour les biens durables (-0.9%) et les biens non durables (-0.2%). Ces dernières ne sont compensées que légèrement par la hausse du prix des biens semi-durables (0.2%). La diminution relativement importante de l'indice des biens est inférieure à la croissance de 0.8% de l'indice des services. Une des raisons de la hausse de ce dernier indice est l'élargissement de l'assiette de la taxe de vente du Québec en juillet. Parmi les produits touchés par cette mesure figurent les maisons neuves, les réparations immobilières, les hôtels et les motels, les services culturels et de loisirs, les réparations automobiles, les services de coiffeur et les vols intérieurs.

L'indice de l'énergie augmente de 0.2%. Les hausses de l'électricité (0.8%) et du mazout (0.3%) sont quelque peu atténuées par une baisse de 0.2% du prix de l'essence.

The All-items excluding Food and Energy index advanced 0.3%, slightly higher than the increase in the All-items index. The combined Food and Energy index dropped by 0.4% following a large 1.5% rise in the second quarter.

Contributions by Lower-Level Indexes

The third quarter increase of 0.4% in the Housing index resulted from increases in all three components; Shelter (0.3%), Household Operation (0.8%), and Household Furnishings and Equipment (0.5%). Within the Shelter component, Rent increased by 0.8%, Traveller Accommodation by 5.8%, Homeowners' Maintenance and Repairs by 2.1%, and Electricity by 0.8%, but, on the other hand, Mortgage Interest Costs dropped by 1.8%. The main contributors to Household Operation price increases were higher prices for pet expenses (1.8%), child care (0.8%), and postal services (3.5%), while a 1.6% increase in household textile prices was the main contributor to the increase in the Household Furnishings and Equipment index.

The Recreation Reading and Education index posted a sharp increase of 1.1%. Most of the upward pressure was exerted by the Education index which jumped 5.9% as a result of higher tuition fees, particularly for post secondary courses. The Recreation index rose by a much lesser 0.2%, while the Reading component ended up 0.1% lower than at the end of the previous quarter.

The Tobacco Products and Alcoholic Beverages index increased 0.5% during the quarter, with virtually all the movement coming from a rise of 0.9% in the Alcoholic Beverages component. The price of Beer in Containers rose by 2.0%, largely in response to the delayed impact of the Ontario environmental tax on beer cans. A 0.7% price rise was observed for Served Alcohol, reflecting higher operating costs.

The Health and Personal Care index rose by 0.8%. The Personal Care component increased 1.1%, largely due to the introduction of a tax on hair cutting, washing and grooming services in Quebec. The Health Care index rose 0.5%, reflecting higher prices for medicines and eye-care.

The Clothing index advanced 0.4% during the quarter. Prices fell 0.5% in July as a result of sales, jumped 1.6% in August as many sales ended, and fell back 0.7% in September as a direct result of seasonal promotions.

The Transportation index went down 0.5% over the quarter. By far the largest contributor to the decline was a marked drop of 2.0% in automobile prices. Rebates offered on a number of different models explained this decline. An important but somewhat smaller effect came from a 0.2% decline in gasoline prices reflecting price wars in several localities. Somewhat offsetting these declines were price increases for the Rental and Leasing of Automotive Vehicles (7.4%) and Public Transportation (0.8%).

L'indice d'ensemble sans les aliments et l'énergie augmente de 0.3%, soit un peu plus que l'indice d'ensemble. L'indice combiné des aliments et de l'énergie baisse de 0.4%, après une forte augmentation de 1.5% au deuxième trimestre.

Contribution des indices de niveau inférieur

La hausse de 0.4% de l'indice de l'habitation est attribuable à des augmentations des trois composantes: le logement (0.3%), les dépenses de ménage (0.8%) et les meubles et articles ménagers (0.5%). S'agissant du logement, les loyers augmentent de 0.8%, l'hébergement des voyageurs, de 5.8%, l'entretien et les réparations par le propriétaire, de 2.1%, et l'électricité, de 0.8%. Par contre, les intérêts hypothécaires baissent de 1.8%. Les principales causes de la hausse de prix pour les dépenses de ménage est l'augmentation des dépenses pour animaux de maison (1.8%), des soins d'enfants (0.8%) et des services postaux (3.5%). L'accroissement de 1.6% du prix des articles ménagers en matière textile est la cause principale de la progression de l'indice des articles d'ameublement et de l'équipement ménager.

L'indice des loisirs, de la lecture et de l'éducation enregistre une forte hausse de 1.1%. La plus grande partie de cette dernière est imputable à l'indice de l'éducation qui s'accroît de 5.9% en raison de l'augmentation des frais de scolarité, en particulier pour les cours postsecondaires. L'indice des loisirs augmente beaucoup moins (0.2%), tandis que celui de la lecture baisse de 0.1% par rapport à la fin du trimestre précédent.

L'indice des produits du tabac et des boissons alcoolisées augmente de 0.5% au troisième trimestre, presque uniquement en raison d'un accroissement de 0.9% de la composante des boissons alcoolisées. Le prix de la bière en fûts s'accroît de 2.0%, principalement à cause de l'incidence tardive de la taxe environnementale de l'Ontario sur les canettes de bière. On note une hausse de 0.7% pour les boissons alcoolisées servies en raison d'une hausse des coûts d'exploitation.

L'indice de la santé et des soins personnels augmente de 0.8%. La composante des soins personnels s'accroît de 1.1% en raison surtout de l'entrée en vigueur d'une taxe sur les services de coiffeur, de buanderie et de soins de toilette au Québec. L'indice des soins de santé s'accroît de 0.5% à cause de la majoration du prix des médicaments et des soins oculaires.

L'indice de l'habillement est en hausse de 0.4% au troisième trimestre. Les prix baissent en juillet à cause des ventes, progressent de 1.6% en août, après la fin de nombreuses ventes et diminuent de 0.7% en septembre à la suite de promotion saisonnières.

L'indice des transports baisse de 0.5% au cours du trimestre. La principale composante responsable, et de loin, de cette diminution est la baisse marquée de 2.0% du prix des automobiles, qui s'explique par les rabais offerts sur un certain nombre de modèles. Une autre raison importante, bien que moins forte, est le repli du 0.2% du prix de l'essence à cause des guerres de prix dans diverses villes. Ces diminutions sont quelque peu compensées par une hausse de prix pour la location de véhicules automobiles (7.4%) et du transport public (0.8%).

The Food index fell 0.7% over the third quarter, registering a decline in each of the three months. The index for Food Purchased from Stores declined by 1.2%, while the 0.5% rise in the index for Food Purchased from Restaurants only slightly offset this decline. Seasonal factors were the driving force behind the 16.8% drop in fresh vegetable prices and the 3.3% fall in fresh fruit prices. Various promotions were the main reasons for the decline in meat prices.

L'indice des aliments se replie de 0.7% au troisième trimestre, et il baisse au cours de chacun des trois mois. L'indice es aliments achetés au magasin diminue de 1.2% tandis que celui des aliments achetés au restaurant s'accroît de 0.5%, ce qui ne compense que légèrement cette diminution. La chute de 16.8% du prix des légumes frais et la baisse de 3.3% de celui des fruits frais s'expliquent par des facteurs saisonniers. Le prix de la viande baisse surtout en réaction à diverses promotions.

Introduction

This quarterly publication presents a compendium of consumer prices and price index related information of both a current and historical nature. It provides a wide range of timely and detailed statistical information and serves as a complement to the monthly publication, The Consumer Price Index, Catalogue 62-001.

Part I of this report presents a synopsis of current consumer price index movements. This is presented in the form of tabular and graphic information. Some tabular information on international prices is also presented, in particular for some Canada - U.S. comparisons.

Parts II and III provide a detailed historical summary of monthly consumer price indexes in recent years. This summary contains considerable disaggregated information, again in the perspective of both the urban Canada and the separate city contexts.

Part IV of this report contains tables for the All-items and seven major components for each province.

Place-to-place comparative retail price information forms Part V of the report. This segment presents the most recent data with regards to average city retail prices and inter-city indexes of retail price differentials. Special feature articles, which are periodically included in the publication, are presented in Part VI.

Appendices serve as sources of reference for the statistical data presented in the preceding segments of the report. Appendices 1 and 2 contain explanatory notes pertaining to consumer price index data; Appendix 3 provides reference material for seasonal adjustment methodology in the context of its application to the Consumer Price Index; Appendices 4, 5 and 6 present background information relating to place-to-place retail price comparisons.

Introduction

Cette publication présente un résumé de renseignements historiques et courants des prix à la consommation et des indices de prix. Elle fournit une gamme d'informations statistiques étendue, d'une façon détaillée, et sert de complément à la publication mensuelle, L'indice des prix à la consommation, n° 62-001 au catalogue.

La partie I de ce rapport contient un aperçu synoptique qui présente les mouvements courants des prix à la consommation. Ces informations sont présentées sous la forme de tableaux et de graphiques. Des tableaux comportant de l'information sur les prix internationaux sont également présentés, particulièrement en ce qui regarde certaines comparaisons entre le Canada et les É.-U.

Les parties II et III fournissent un résumé historique détaillé des indices mensuels des prix à la consommation des dernières années. Ce résumé contient des renseignements pour le Canada et les villes à un niveau beaucoup plus désagrégé.

La partie IV de ce rapport contient des tableaux pour l'ensemble et les sept composantes principales pour chaque province.

Des informations sur les prix de détail comparés d'un endroit à l'autre composent la partie V de ce rapport. Cette section fournit les plus récentes données au sujet des prix de détail moyens par ville et des indices comparatifs des prix de détail entre les villes. Les articles spéciaux, qui font périodiquement partie de cette publication, se retrouvent à la partie VI.

Les appendices servent de référence aux données statistique présentées dans les parties précédentes du rapport. Les appendices 1 et 2 contiennent les notes explicatives reliées aux données de l'indice des prix à la consommation; l'appendice 3 fait référence à la méthode des ajustements saisonniers dans son application à l'indice des prix à la consommation; les appendices 4, 5 et 6 fournissent des informations de base reliées aux comparaisons de prix d'un endroit à l'autre.

December - Décembre									

With the CPI for December 1991 a change in the seasonally adjusted procedure was introduced. Prior to this time the All-items seasonally adjusted CPI was calculated as an aggregate of its seasonally adjusted major component indexes with the exception of the Transportation index which was used in an unadjusted form. According particularly in the month of November when new automobile models are introduced into the CPI. As a result, the revised procedure now incorporates this index in a seasonally adjusted form. Owing to noticeable differences to the adjusted mouvement for November, the revised adjusted indexes are released with the December data. This is a slight departure from past practices when revised seasonally adjusted indexes were published with the release of the CPI for January.

adjusted indexes were published with the release of the CPI for January.

Avec la publication de l'IPC de Décembre 1991, débute une nouvelle façon de faire l'ajustement saisonnier. Jusqu'à cette date, on calculait l'indice d'ensemble désaisonnalisé comme aggrégation des indices majeurs qui le composent, composantes qui avaient toutes été désaisonnalisées à l'exception de l'indice des transports. L'examen, récemment, de l'indice des transports révèle la présence de variations saisonnières, surtout en novembre quand les nouveaux modèles automobiles sont introduits dans l'IPC. En conséquence, la nouvelle méthode d'ajustement de l'indice d'ensemble incorpore maintenant l'indice des transports sous une forme corrigée des variations saisonnières. Parce que cette nouvelle méthode créait des différences appréciables de la variation de l'indice désaisonnalisé pour novembre, les révisions de l'indice désaisonnalisé sont publiés en même temps que les données de décembre. Par le passé, les indices désaisonnalisés révisés étaient publiés avec les données de janvier.

Appendix 1

THE CONSUMER PRICE INDEX

The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time. Changes in the costs of this basket are therefore due only to "pure" price movements, i.e., price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.

The Consumer Price Index for each city measures price change from one time period to another within that specific city. Thus, while city CPI's show the **movement** of prices over time in each city, they do not indicate price level differences between cities or between cities and Canada. Such inter-city price comparisons for a selected number of items sold in grocery stores for 26 cities are available at present in Part V of this publication. Inter-spatial indexes covering approximately two thirds of the CPI basket for a selected number of cities are also available in this section.

Coverage

Beginning with the December 1988 to January 1989 price change, the weights used in the Consumer Price Index are those pertaining to 1986 expenditure patterns. Data used for establishing these patterns were obtained through the 1986 Family Expenditure Surveys. The expenditure data represents the expenditures of all private households (families and individuals) living in Canadian urban centres with a population of 30,000 or more. Population estimates for 1986 revealed 82 such urban centres. Largely due to limitations on the availability of detailed information on consumer expenditures it has become necessary to group the 82 urban centres into 34 urban centre strata. An urban centre stratum may be interpreted as a geographical unit around which the sampling framework of the CPI is constructed.

Separate CPI's are published for 18 of these centres which, together, accounted for approximately 75% of the total 1986 current consumption expenditures reported in the 82 centres. These 18 centres were, in part, selected in order to permit the publication of at least one CPI in each province. Some 300 commodities are priced in each of these 18 cities while in the remaining 64 urban centres, the number of commodities surveyed is fewer, with clothing and home furnishings being the notable exclusions.

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION

L'indice des prix à la consommation (IPC) mesure la variation dans le temps, exprimée en pourcentage, du coût à l'achat d'un "panier" constant de biens et de services, qui représente les achats faits par un groupe particulier de la population au cours d'une période donnée. Le "panier" renferme des biens et des services de quantité et de qualité invariables ou équivalentes et dont les prix sont mesurables au cours du temps. C'est ainsi que les variations de son coût résultent uniquement des mouvements "purs" de prix, c.-à-d. des mouvements de prix qui ne sont pas attribuables à des changements de qualité ou de quantité des biens et services de consommation du panier.

L'indice des prix à la consommation de chaque agglomération urbaine mesure les variations de prix entre deux périodes dans cette agglomération. Aussi les IPC des villes indiquent-ils le **mouvement** des prix dans le temps dans chaque agglomération, mais non les différences de niveau des prix entre les villes ou bien entre les villes et le Canada. De telles comparaisons entre les villes en ce qui concerne les niveaux de prix de certains articles vendus dans les épiceries sont présentées, pour 26 villes, à la Partie V de la présente publication. On y trouve également, pour certaines villes, des indices interspatiaux portant sur les deux tiers environ du panier de l'IPC.

Champ d'observation

À compter de janvier 1989, les pondérations utilisées pour l'indice des prix à la consommation se rapportent à la composition des dépenses de 1986. Les données qui ont servi à établir cette composition proviennent des enquêtes sur les dépenses des familles de 1986. Les données sur les dépenses représentent les dépenses de tous les ménages privés (familles et personnes seules) qui habitent les centres urbains du Canada qui comptent 30,000 habitants ou plus. D'après les estimations démographiques pour 1986, 82 centres urbains répondent à ce critère de population. En raison principalement du manque de renseignements détaillés sur les dépenses des consommateurs, il a été nécessaire de grouper les 82 centres urbains en 34 strates de centres urbains. Une strate de centres urbains peut se définir comme une unité géographique à partir de laquelle est constituée la base de sondage de l'IPC.

Des IPC distincts sont publiés pour 18 centres qui, ensemble, interviennent pour près de 75% du total des dépenses courantes de consommation déclarées en 1986 par les 82 centres. Les 18 centres ont été choisis, en partie, parce qu'ils permettent la publication d'un IPC au moins dans chaque province. On relève les prix de quelque 300 produits dans chacune des 18 villes; ce nombre est plus faible dans les 64 centres restants, les produits exclus étant principalement l'habillement et les articles d'ameublement.

Prices

The prices used in the calculation of the CPI are retail prices without regard to whether they are described as regular, special, etc. inclusive of all sales and excise taxes applicable to individual commodities. The pricing cycle starts in the latter part of each month and extends to the middle part of the following month. Although prices for most CPI items are collected on a monthly basis, some are priced less frequently, e.g., property taxes, automobile registration fees, dry cleaning services. However, such goods or services scheduled for pricing at less than monthly intervals will be priced in any month when there is evidence to suggest that significant price changes may occur prior to the next regularly scheduled pricing. The number of prices observed in a given city depends upon the importance of that city's expenditures to the total Canada expenditure and also the nature of the commodity, with those commodities displaying a high variability of price change generally requiring more observations. The selection of outlets in which prices are to be collected is judgmental (other than for rents) with the sample being designed to cover volume selling establishments.

Weights and Linking

The weights used in the calculation of the Consumer Price Index are periodically updated. This is a necessary procedure which serves to ensure that weights reflect changes in consumer expenditures thereby maintaining the relevancy of the index. As a result, different weighting systems are in effect in different time periods.

The 1982 family expenditure patterns were used to compile the CPI from January 1985 to December 1988. In January 1989 the 1982 weights were replaced by those derived from the expenditure patterns of 1986. This updating continues the policy of updating on a four-year cycle.

Prix

Les prix servant au calcul de l'IPC sont les prix au détail qu'il s'agisse de prix réguliers, de prix spéciaux, etc. et englobent toutes les taxes de vente, d'accise et autres taxes imposées aux produits. Le cycle des relevés commence vers la fin de chaque mois et se termine au milieu du mois suivant. Les prix de la plupart des articles de l'IPC sont recueillis chaque mois, mais certains articles sont observés moins souvent, notamment l'impôt foncier, l'immatriculation d'automobiles, le nettoyage à sec. Cependant, dans le cas des biens et services dont l'observation est prévue à des intervalles de plus d'un mois, on en relèvera le prix dans tout mois où il apparaît qu'une variation importante se produira avant le prochain relevé prévu au calendrier. Le nombre de prix observés dans une ville donnée dépend de l'importance des dépenses de cette ville par rapport au total des dépenses pour le Canada ainsi que de la nature du produit, les observations étant généralement plus fréquentes pour les produits dont les prix varient beaucoup. Le choix des points de vente où les prix doivent être recueillis est fait au jugé (sauf pour les loyers) et l'échantillon a pour but de couvrir les établissements à gros volume de vente.

Pondérations et enchaînement

Les pondérations utilisées dans le calcul de l'indice des prix à la consommation sont mises à jour périodiquement. Ce procédé est nécessaire pour que les pondérations tiennent compte des changements qui s'opèrent au niveau des dépenses à la consommation et, par le fait même, pour que l'indice conserve son utilité. En conséquence, différents schémas de pondérations sont utilisés pour des périodes de temps distinctes.

La composition des dépenses des familles de 1982 a servi au calcul de l'IPC à partir de janvier 1985 jusqu'à décembre 1988. En janvier 1989, les pondérations de 1982 ont été remplacées par d'autres dérivées de la composition des dépenses de 1986. Cette mise à jour poursuit la politique de Statistique Canada de mettre à jour les pondérations régulièrement à tous les quatre ans.

TEXT TABLE II. Comparison of 1982 and 1986 Expenditure Weights Used in the Consumer Price Index, by Major Component for Canada

TABLEAU EXPLICATIF II. Comparaison des pondérations des dépenses de 1982 et de 1986 utilisées pour l'indice des prix à la consommation, par composante principale pour le Canada

Major components	Weights 1982	Weights 1986
Composantes principales	Pondérations 1982	Pondérations 1986
All-items - Ensemble	100.00¹	100.00¹
Food - Aliments	20.02	18.05
Housing - Habitation	38.14	36.32
Clothing - Habillement	8.37	8.69
Transportation - Transports	15.75	18.29
Health and personal care - Santé et soins personnels	4.02	4.20
Recreation, reading and education – Loisirs, lecture et formation Tobacco products and alcoholic beverages – Produits du tabac et boissons	8.25	8.84
alcoolisées	5.45	5.60

Figures may not add up due to rounding.

The weights shown in Text Table II represent expenditures in 1982 (1982 quantities valued in 1982 prices) and in 1986 (1986 quantities valued in 1986 prices). They cannot be used to reconstruct or reaggregate indexes on a 1981 = 100 time base. The methodology required to permit such a reaggregation can be obtained on request by contacting the:

Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Telephone: (613) 951-9606).

The indexes based on 1986 weights were linked or connected in December 1988 to the appropriate indexes based on 1982 weights which had been in use since January 1985.

This linking procedure ensures that conceptually equivalent series are made continuous over time. It should be noted that the linking method is such that aggregate indexes cannot be considered as the direct average of their respective component indexes. In exceptional cases, this may cause the level, as well as the percentage changes, of an aggregate index to fall slightly outside the range of its component indexes.

Les pondérations du tableau explicatif II représentent les dépenses en 1982 (quantités et prix de 1982) et en 1986 (quantités et prix de 1986). Elles ne peuvent servir à reconstruire ni à réagréger des indices sur la base de 1981 = 100. La méthode à suivre pour une telle reconstruction peut être obtenue sur demande auprès de la:

Section des prix à la consommation Division des prix, Statistique Canada Ottawa (Ontario) K1A 0T6 (Téléphone: (613) 951-9606).

Les indices fondés sur les pondérations de 1986 ont été enchaînés ou raccordés en décembre 1988 aux indices correspondants fondés sur les pondérations de 1982, en usage depuis janvier 1985.

Grâce à cet enchaînement, des séries équivalentes sur le plan conceptuel sont continues dans le temps. On notera que cette méthode d'enchaînement ne permet pas de considérer les indices composés comme des moyennes directes de leur composante respective. Dans des cas exceptionnels, le niveau et les variations en pourcentage d'un indice agrégé peuvent ainsi dépasser légèrement l'étendue des indices composantes.

¹ Les chiffres ayant été arrondis, les totaux peuvent ne pas correspondre

Time Base

The All-items Consumer Price Index for Canada and each index city is expressed in terms of 1986 = 100, except for certain items, as noted, where the pricing survey was introduced subsequent to that year. The 1986 = 100 time base became effective with the release of the June 1990 index. The base period for the Consumer Price Index, as well as for other Statistics Canada index series, is revised periodically.

Rebasing the CPI is a straightforward arithmetic operation which does not change the picture of economic events. Percentage changes computed will be the same, except for small differences due to rounding, regardless of whether the 1981 = 100 or 1986 = 100 time base is used. Rebasing of the CPI does not involve changes in the base period expenditure weights. Furthermore, the method employed in converting to the 1986 = 100 time base does not affect the continuity or statistical comparability of the index series.

It should be noted, however, that although the percentage changes in an index series will be the same, except for small differences due to rounding, regardless of whether they are computed from the 1981 or 1986 time base series, the same is not true for changes measured in terms of index points.

Current Annual Rate of Change

A rate of change representative of an annual movement in prices may be derived in several ways, none of which is free of shortcomings and interpretational problems. Statistics Canada presently calculates three measures of annual change, the percentage change between any given month and the same month a year ago, the percentage change between annual averages based on a calendar year and the current annual rate of change.

The method selected for calculating the current seasonally adjusted annual rate of change in the CPI in Table 1 involves compounding the growth rate over the latest three-month period on the seasonally adjust ed level (see Appendix 3). For more information on CPI growth rates, see "A Note on the Current Annual Rate of Change of the Consumer Price Index", **Retail Prices and Living Costs** – Service Bulletin (Catalogue 62-005), Vol. 4, No. 4, April 1975.

Reconstructed Indexes

With the release of the January 1985 Consumer Price Index, certain series were reconstructed historically to reflect the introduction of the Consumer Classification System of Statistics Canada which was introduced with the 1982 Updating. A few additional reconstructions were made with the introduction of the 1986 basket. For further information, contact Prices Division (613-951-9606 or 951-3353).

Période de base

L'indice d'ensemble des prix à la consommation du Canada et les indices de chaque ville sont exprimés sur la base de 1986 = 100, sauf pour certains articles, qui sont signalés et dont l'enquête sur les prix n'a été introduite qu'après cette année là. La base temporelle de 1986 = 100 est devenue effective à partir de la diffusion de l'indice de juin 1990. La période de base pour l'indice des prix à la consommation, et pour d'autres séries d'indices de Statistique Canada, fait l'objet d'une révision periodiquement.

Pour recalculer la base de l'IPC, il suffit d'effectuer une opération arithmétique simple qui ne modifie pas le tableau des événements économiques. Les variations en pourcentage calculées sur la base 1981 = 100 et 1986 = 100 sont équivalentes, les petites différences étant attribuables à l'arrondissement. Le calcul de la nouvelle base de l'IPC ne change pas les pondérations des dépenses de la période de base. De plus, la méthode de conversion selon la base 1986 = 100 ne compromet pas la continuité ou la comparabilité statistique des séries d'indices.

Toutefois, même si les variations en pourcentage d'une série d'indices seront identiques, à quelques différences d'arrondissement près, quelle que soit la base (1981 ou 1986) utilisée pour les calculer, tel ne sera pas le cas de ses mouvements exprimés en points.

Taux de variation annuel courant

Plusieurs méthodes permettent de dériver un taux de variation pour représenter le mouvement annuel des prix, mais toutes comportent des points faibles et des problèmes d'interprétation. Statistique Canada calcule actuellement trois mesures de la variation annuelle, soit le changement en pourcentage pour un mois donné par rapport à un autre et au mois correspondant de l'année précédente, le changement en pourcentage entre des moyennes annuelles basées sur l'année civile et le taux de variation annuel courant.

La méthode retenue pour calculer le taux de variation annuel courant après désaisonnalisation de l'IPC au tableau 1 consiste à prendre un taux de croissance composé sur le niveau désaisonnalisé des trois derniers mois (voir appendice 3). Pour plus de renseignements sur le taux de croissance de l'IPC, se reporter à "Note sur le taux annuel courant de l'indice des prix à la consommation", **Prix de détail et coût de la vie** - Bulletin de service (n° 62-005 au catalogue), vol. 4, n° 4, avril 1975.

Indices reconstruits

À compter de l'émission de l'indice des prix à la consommation de janvier 1985, certaines séries historiques ont été reconstruites de façon à ce qu'elles représentent l'introduction du système de classification de la consommation de Statistique Canada qui fut introduit avec la mise à jour de 1982. L'adoption du panier de 1986 a amené quelques autres remaniements. Pour plus de renseignements, communiquez avec la Divison des prix (613-951-9606 ou 951-3353).

Whitehorse and Yellowknife

In keeping with its commitment to publish consumer price indexes for at least one urban centre in each province and territory. Statistics Canada, as part of the 1978 Updating, began to develop consumer price indexes for the urban centres of Whitehorse and Yellowknife. As no Family Expenditure Survey was conducted in these centres in 1978, 1972 expenditure patterns for these two centres were extrapolated to 1978 using the change in expenditure patterns between 1972 and 1978 in other urban centres. As the 1978 expenditure patterns were incorporated into the official CPI, commencing with the release of the April 1982 index, consumer price indexes for Whitehorse and Yellowknife were developed on a March 1982 = 100 time reference base. Since the expenditure patterns for Whitehorse and Yellowknife were derived and not directly observed, the indexes for these two urban centres were not included in the calculation of the official CPI for Canada. With the introduction of the 1982 Updating, these two centres were included in the calculation of the official CPI for Canada.

It was not possible, at this time, to develop an owned accommodation index for these two centres comparable to that in concept of the national CPI. The nature and the relatively small size of the housing market in these two centres is such that Statistics Canada was unable to construct reliable price indexes for new houses. It was decided that as an interim and only available alternative measure, the price movement of rental accommodation would be used to represent that of owned accommodation. As a consequence, the All-items indexes published for these centres are not comparable to those for Canada or for any of the sixteen urban centres for which a CPI is produced. The rent data used are collected on a quarterly basis by the respective territorial governments. For rents, the data are incorporated into the consumer price indexes for these two centres with a two-month lag.

Provincial CPI's

Consumer price indexes for provincial urban centres were published for the first time in the July-September 1988 issue of this publication. An article describing the coverage and method of these indexes was published in the same issue. Updated Provincial CPI's are now a permanent feature of this publication.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in **The Consumer Price Index, Reference Paper, Updating Based on 1986 Expenditures,** (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in Family Expenditure in Canada, 1986, Catalogue 62-555.

Whitehorse et Yellowknife

Statistique Canada, conformément à son engagement de publier des indices des prix à la consommation pour au moins un centre urbain dans chaque province et territoire, a commencé à élaborer des indices de prix à la consommation pour les centres urbains de Whitehorse et Yellowknife dans le cadre de la mise à jour de 1978. Puisqu'il n'y a pas eu dans ces centres d'enquête sur les dépenses des familles en 1978, les données sur la composition des dépenses de 1972 pour ces deux villes ont été extrapolées pour l'année 1978 en se fondant sur l'évolution de la composition des dépenses entre 1972 et 1978 dans d'autres centres urbains. Étant donné que la composition des dépenses de 1978 a été incorporée dans l'IPC officiel à la consommation avec l'indice d'avril 1982, les indices des prix à la consommation pour Whitehorse et Yellowknife ont été élaborés sur la base mars 1982 = 100. La composition des dépenses pour Whitehorse et Yellowknife ayant été dérivée plutôt qu'observée directement, les indices pour ces deux centres urbains n'étaient pas compris dans le calcul de l'IPC officiel pour le Canada. Avec l'introduction de la mise à jour de 1982, ces deux centres ont été pris en compte lors du calcul de l'IPC officiel pour le Canada.

Il n'a pas été possible d'élaborer, pour ces deux centres, un indice du logement en propriété qui soit conceptuellement comparable à celui incorporé à l'IPC national. La nature et la petitesse relative du marché de l'habitation dans ces deux centres ont empêché Statistique Canada de construire des indices de prix fiables pour les maisons neuves. Comme c'est la seule mesure disponible, il a été décidé d'utiliser, pour le moment, le mouvement des prix du logement en location pour représenter celui du logement en propriété. En conséquence, les indices d'ensemble publiés pour ces centres ne sont pas comparables à ceux du Canada ou d'aucun des seize autres centres urbains pour lesquels un IPC est calculé. Les données sur les loyers utilisées sont recueillies trimestriellement par les deux administrations publiques territoriales. S'agissant des loyers, les données pour ces deux centres sont incorporées aux indices de prix à la consommation avec deux mois de retard.

IPC Provinciaux

Des indices de prix à la consommation pour les centres urbains provinciaux ont été publiés pour la première fois dans le numéro de juillet-septembre 1988 de la présente publication. Un article décrivant la couverture et la méthodologie de ces indices est paru dans ce même numéro. Les IPC provinciaux mis à jour sont devenus partie intégrante de la présente publication.

Renseignements supplémentaires et publications

Le Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986, (hors-série), n° 62-553 au catalogue, décrit en détail les méthodes et les concepts de l'IPC. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans Dépenses des familles au Canada, 1986, n° 62-555 au catalogue.

The latest information on the Consumer Price Index for Canada and 18 cities is also available in the **Consumer Price Index**, Catalogue 62-001 monthly. In addition, selected educational and promotional material are available. For these and further information contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606 or 613-951-3353).

De plus, les derniers renseignements sur l'indice des prix à la consommation du Canada et de 18 villes sont publiés dans le bulletin mensuel **L'indice des prix à la consommation**, n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606 ou 613-951-3353).

Appendix 2

THE PURCHASING POWER OF THE CONSUMER DOLLAR

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

Changes in the purchasing power of the consumer dollar, put simply, are inversely related to movements in the Consumer Price Index. For example, between 1986 and June 1990, consumer prices as measured by the CPI rose 19.2% such that, goods and services which could have been purchased for \$100.00 in 1986 would cost \$119.20 in June 1990. Each consumer dollar in June 1990 therefore buys less than in 1986. The extent to which the purchasing power of the dollar has declined is matched precisely by the increase in the consumer price index. Thus the purchasing power of a dollar in June 1990 compared to the 1986

This process may be interpreted as the deflation of money, that is, adjusting values expressed in monetary terms in order to eliminate price effects.

Users of the tabulation which shows the purchasing power of the consumer dollar compared to the 1986 dollar at different points in time (Table 2) should note that, as in the case of the Consumer Price Index from which the numbers are derived, the data may not measure closely the experiences of any one specific family within the large urban group to which the CPI relates. At the same time changes in the purchasing power of the dollar are not expected to match the experience of other population groups whose expen diture behaviour is significantly different from those associated with the CPI target population. It should also be noted that like the CPI, changes in the purchasing power of the dollar are not directly affected by changes in income taxes, unemployment insurance premiums, other types of security payments and all other goods and services that are not included in the CPI basket.

Appendice 2

LE POUVOIR D'ACHAT DU DOLLAR DE CONSOMMATION

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie et la baisse des prix est liée à la hausse du pouvoir d'achat.

En somme, le pouvoir d'achat du dollar de consommation varie en relation inverse avec les mouvements de l'indice des prix à la consommation. Par exemple, entre 1986 et juin 1990, les prix à la consommation mesurés par l'IPC ont grimpé de 19.2% de sorte que les biens et services qu'on pouvait acheter en 1986 avec \$100.00 coûtaient \$119.20 en juin 1990. Chaque dollar de consommation en juin 1990 achète donc moins qu'en 1986. Le pouvoir d'achat du dollar a baissé exactement dans la même proportion que l'indice des prix à la consommation a augmenté. Par conséquent, le pouvoir d'achat d'un dollar en juin 1990, par rapport au dollar de 1986,

Ce processus peut être assimilé à la déflation de l'argent, c'est-à-dire à la correction des valeurs monétaires afin d'éliminer l'influence des prix.

Les utilisateurs des totalisations qui indiquent le pouvoir d'achat du dollar de consommation à différentes périodes par rapport à 1986 (tableau 2) doivent noter que ces chiffres sont tirés de l'indice des prix à la consommation et qu'ils peuvent, tout comme ce dernier, ne pas mesurer fidèlement la situation particulière d'une famille faisant partie du grand groupe urbain auquel se rapporte l'IPC. Par ailleurs, les variations du pouvoir d'achat du dollar ne reflètent pas les changements touchant les autres groupes de population dont les habitudes de dépenses diffèrent sensiblement de celles du groupe cible pour l'IPC. Il faut également noter que, tout comme l'IPC, les variations du pouvoir d'achat du dollar ne sont pas touchées directement par les changements de l'impôt sur le revenu, des primes d'assurance-chômage, d'autres paiements de sécurité sociale et des prix de tous les autres biens et services ne faisant pas partie du panier de I'IPC.

Appendix 3

SEASONAL ADJUSTMENT OF THE CONSUMER PRICE INDEX

Economic time series, measuring changes through time in economic activities, reflect the combined effects of the underlying seasonal, cyclical, trend and irregular factors which influence them. Such series can be decomposed into distinct movements representing the separate effects of the seasonal, cyclical and trend factors and a residual movement representing factors causing irregular non-repetitive movements.

Seasonal fluctuations in a series are those that can be identified with a particular season or time of year. These fluctuations tend to occur at about the same time each year with roughly the same magnitude and are the composite result of climatic influences and social and commercial customs (e.g., harvests, end of season sales).

Cyclical movements consist of sequences of change over periods longer than a year, during which the series rises to a peak and then falls back, subsequently to rise again. For many series this type of movement is associated with expansion and contraction of the economy over the "business cycle".

The trend is a steady underlying movement which reflects continuing or slowly changing economic forces.

Finally, the fluctuations that remain unaccounted for by the seasonal, cyclical and trend movements of a series are termed irregular. The factors causing irregular movements in a series are of a non-repetitive, ad-hoc nature. The irregular component tends to have a stable random appearance, but may include some extreme movements having identifiable causes (e.g., strikes or severe weather). They therefore can be distinguished from the much smaller random irregular variations.

Appendice 3

LA DÉSAISONNALISATION DE L'INDICE DES PRIX À LA CONSOMMATION

Les séries chronologiques économiques mesurent l'évolution dans le temps de l'activitié économique. Ces séries reflètent les effets combinés de la saisonnalité, du cycle, de la tendance générale et d'autres facteurs accidentels qui leur sont propres et qui agissent sur elles. Il est possible de décomposer de telles séries ou mouvements distincts représentant séparément les effets de tel ou tel facteur (saisonnalité, cycle, tendance) et en un mouvement résiduel représentant les facteurs de mouvements accidentels (non répétitifs).

Les fluctuations saisonnières d'une série sont celles que l'on peut relier à une saison ou une période donnée de l'année; elles ont tendance à se produire généralement à peu près à la même époque de l'année et avec la même ampleur. Elles sont le résultat à la fois de conditions climatiques et d'habitudes sociales et commerciales (telle les récoltes, les ventes de fin de saison).

Les mouvements cycliques se définissent comme une suite de variations sur des périodes supérieures à un an, au cours desquelles la série atteint un sommet, descend puis remonte à nouveau. Ce type de mouvement est associé, pour de nombreuses séries, à l'expansion et à la récession économique au cours du "cycle économique".

La tendance générale est un mouvement fondamental stable qui reflète la continuité ou un changement lent de l'économie.

Enfin, les fluctuations qui ne se classent ni dans la saisonnalité, ni dans le cycle, ni dans la tendance générale sont désignées comme mouvements accidentels. Les facteurs expliquant ce type de mouvement dans une série sont de nature spéciale et non répétitive. L'élément accidentel tend à présenter une apparence aléatoire stable mais il peut comprendre certains mouvements extrêmes, dont on peut identifier les causes (comme des grèves ou de fortes intempéries). Ils peuvent donc être distingués des variations irrégulières aléatoires beaucoup moins prononcées.

The methodologies used for removing as much of the seasonal fluctuation as possible from a series have been described in detail in numerous articles and texts on the subject. Rather than reiterating those texts, an outline of the methodologies employed in the derivation of seasonally adjusted consumer price indexes for Canada is provided below.

With the introduction of the 1982 basket, the seasonal Direct adjustment methodology was changed. seasonal adjustment is performed at the level of the seven major components with the seasonally adjusted All-items and All-items excluding Food indexes being the weighted average of their components. This indirect seasonal adjustment of the two aggregate series ensures (except for possible rounding differences) that the aggregate movements will be within the range of their components' movements. Since each basket has its own weights, the move to indirect seasonal adjustment of the aggregates dictated the use of unlinked series as the basis for the seasonal adjustment. Estimating a separate seasonal pattern for each basket has some conceptual advantages since it means that the classification and weight changes introduced with each updating of the basket will not distort the estimates. However, there is an operational difficulty which arises due to the desirability of having at least seven years of data for estimation of the seasonal pattern and the current rapidity with which CPI baskets are updated. Given the current updating cycle, at the time a new basket is introduced, we have only three years of data for the new basket. To create a longer time series, we chain on data from the previous basket back to it's beginning. This reintroduces some of the distortions present in estimating seasonal patterns from linked data.

The above distortion will be minimized through the use of concurrent seasonal adjustment rather than forecast seasonal factors. With the concurrent methodology, the seasonal pattern is estimated each month using all available data. However, to minimize revisions we will revise past indexes only at the end of each calendar year.

Les méthodes utilisées pour éliminer le plus possible de saisonnalité d'une série ont fait l'objet de descriptions détaillées dans de nombreux articles et ouvrages sur la question¹. Au lieu d'en reprendre ici le contenu, nous présentons ci-dessous les grandes lignes des méthodes utilisées pour dériver les indices des prix à la consommation désaisonnalisés pour le Canada.

Avec l'introduction du panier 1982, la méthode de désaisonnalisation fût changée. La désaisonnalisation directe est effectuée à l'échelle des sept composantes principales; les versions désaisonnalisées de l'indice des aliments et de l'indice d'ensemble sans les aliments correspondent à la de leurs composantes. pondérée désaisonnalisation indirecte des deux séries agrégées garantit que les mouvements agrégés se situeront dans les limites des mouvements de leurs composantes (exception faite des différences attribuables à l'arrondissement). Puisque chaque panier a ses propres coefficients de pondération, le passage à la méthode indirecte de désaisonnalisation des séries agrégées a entraîné l'utilisation, à titre de base de la désaisonnalisation, des séries non enchaînées. L'estimation de tendances saisonnières distinctes pour chacun des paniers représente certains avantages au point de vue conceptuel, puisqu'elle signifie que les changements apportés à la classification et aux coefficients de pondération au moment de la mise à jour du panier n'entraîneront aucune distortion. Toutefois, une difficulté opérationnelle existe étant donné, d'une part, qu'il est souhaitable d'avoir au moins sept années de données pour estimer la tendance saisonnière et, d'autre part, en raison de la rapidité avec laquelle on met maintenant à jour le panier de l'IPC. étant donné le cycle courant de mise-à-jour, nous n'avons que trois ans de données pour un nouveau panier lorsque celui-ci est introduit. Afin de créer une série plus longue, nous enchaînons les données du nouveau panier à celles du panier précédent jusqu'à son début. Cette mesure ramène certaines distorsions que l'on retrouvait dans l'estimation des tendances saisonnières des données enchaînées.

Ces distortions seront toutefois minimisées par l'utilisation de désaisonnalisations concomitantes plutôt que de coefficients saisonniers projetés. Dans la méthodologie concomitante, la tendance saisonnière est estimée chaque mois au moyen de toutes les données accessibles. Nous ne recalculerons toutefois les indices antérieurs qu'à la fin de chaque année civile, et ce pour réduire au minimum le nombre de révisions.

Appendix 4

CITY AVERAGE RETAIL PRICES

Introduction

The Average Retail Price Survey is under taken to produce an accurate measure of average prices at one point in time which will permit comparison between cities. In order not to generate artificial price differentials it is essential that the qualities, brands and sizes selected are sufficiently similar. Prices of approximately 60 items, consisting mainly of food and some personal care items and household supply items are collected in representative outlets in 26 cities. These cities are: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria and Whitehorse. This survey is normally under taken during the first week of January, April, July and October.

In order that the average prices generated for one city will be comparable with those for another city, price collection is generally limited to widely available manufacturers' brands. For meat and produce, care is taken to narrowly define cuts and qualities. The goods and services tax (GST) and the provincial retail sales tax are included in the retail averages where applicable.

Calculation Methodology

City Prices. Prices are collected in both chain and independent stores. (A chain stores organization is defined as one operating four or more stores under the same legal ownership.) A city average price is calculated for each item by weighting the average prices obtained for chain and independent stores according to their overall market sales share in that city. For branded items sold under brand labels, an average price for each brand is first calculated in the manner described above; the brand averages are then weighted together to form the item average. The weight assigned each brand in this process is proportionate to the number of price quotes obtained for each of the brands in that city.

Appendice 4

PRIX DE DÉTAIL MOYENS PAR VILLE

Introduction

L'enquête sur les prix moyens de détail est effectuée afin d'obtenir une mesure adéquate des prix moyens, à une période donnée, qui permette une comparaison entre les villes. Il est essentiel que les qualités, les marques et les tailles choisies soient suffisamment équivalentes afin de ne pas introduire des différences de prix artificielles. Les prix de quelques 60 articles, principalement des produits alimentaires, certains articles de soins personnels et des fournitures de ménage, sont relevés dans de nombreux points de vente dans 26 villes: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria et Whitehorse. Cette enquête est normalement effectuée durant la première semaine de janvier, d'avril, de juillet et d'octobre.

Afin que les prix moyens calculés pour une ville puissent être comparables à ceux d'une autre ville, l'observation des prix se limite généralement aux marques des fabricants largement distribuées. Dans le cas de la viande, des fruits et des légumes, on prend soin de définir avec précision les morceaux et les qualités. La taxe sur les produits et services (TPS) et la taxe de vente au détail sont ajoutées au prix de détail moyen s'il y a lieu.

Méthode de calcul

Prix urbains. Les prix sont recueillis dans les magasins à succursales multiples et les magasins indépendants. (Une entreprise à succursales multiples est définie comme celle qui exploite quatre magasins ou plus sous la même raison sociale.) On calcule un prix moyen par ville pour chaque article en pondérant les prix moyens recueillis dans les magasins à succursales multiples et dans les magasins indépendants selon la part de leurs ventes sur le marché général dans leur ville. Dans le cas ces articles vendus sous marque déposée, on calcule d'abord un prix moyen pour chaque marque déposée de la façon décrite plus haut: ensuite on pondère ensemble les moyennes des marques déposées afin d'en arriver à la moyenne pour l'article. Le poids assigné à chaque marque déposée lors de ce processus est proportionnel au nombre de prix observés dans la ville en question pour cette marque déposée.

Weighted city averages. A weighted city average price for each item is derived by weighting the relevant city averages. The importance of each city in calculating the weighted city average is determined by the volume of retail sales in that city.

Item Specifications

A description of the approximately 60 items covered in the Average Prices Survey can be acquired by contacting Prices Division.

Average Retail Prices for Gasoline

Tables 16 through 19 present average retail prices for two types of gasoline retailed in two types of filling stations. The information is collected on a monthly basis as part of the Consumer Price Index survey. Gasoline prices are collected at the pump from a sample of full service and self-serve filling stations in major urban centres across Canada. The prices collected included all applicable Federal and Provincial taxes. They are presented as average prices per litre of gasoline. The series presented in these tables are confined to the 16 urban centres for which Consumer Price Indexes are produced and cover the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to January 1979, are, however, based on the average prices per imperial gallon.

Average Retail Prices for Fuel Oil

Table 20 presents average retail prices for fuel oil. The information is collected nine times yearly as part of the Consumer Price Index Survey. Fuel oil prices are collected from a sample of distributors in major urban centres across Canada. The prices collected include all applicable Federal and Provincial taxes. They are presented as average prices per litre. The series presented in Table 20 are confined to 16 urban centres and for the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to October 1980 are, however, based on the average prices per imperial gallon.

Moyennes pondérées des villes. Une moyenne pondérée du prix de chaque article pour l'ensemble des villes est calculée en pondérant les moyennes appropriées des villes. L'importance de chaque ville dans le calcul de la moyenne pondérée des villes est déterminée par le volume des ventes au détail dans cette ville.

Spécification des articles

Une description des quelques 60 articles contenus dans l'enquête des prix moyens peut être obtenu en communiquant avec la Division des prix.

Prix de détail moyens de l'essence

Les tableaux 16 à 19 présentent les prix de détail moyens de deux types d'essence vendus dans deux genres de stations. Cette information est relevée à chaque mois dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix de l'essence sont relevés, sur place, auprès d'un échantillon de stations offrant un service complet et de stations libre service dans les principaux centres urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ces tableaux sont ceux d'un litre d'essence. Les séries présentées se limitent aux 16 centres urbains pour lesquels on produit un IPC pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant janvier 1979 sont, toutefois, sur la base d'un gallon impérial.

Prix de détail moyens du mazout

Le tableau 20 présente les prix de détail moyens du mazout. Cette information est relevée neuf fois par année dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix du mazout sont relevés auprès d'un échantillon de distributeurs dans les principaux centre urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ce tableau sont ceux d'un litre. Les séries présentées au tableau 20 se limitent à 16 centres urbains, pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant octobre 1980 sont, toutefois, sur la base d'un gallon impérial.

Appendix 5

CANADIAN INTER-CITY RETAIL PRICE COMPARISONS

Table 21 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly city consumer price indexes. For the inter-city food price differentials, however, use was also made of data gathered in a special program of pricing undertaken quarterly for publication of City Average Retail Prices.¹

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets so far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's - Halifax Charlottetown - Halifax - Halifax Saint John Ottawa - Halifax Toronto - Montréal Ottawa - Toronto Toronto - Winnipea Regina - Winnipeg - Winnipeg Edmonton - Vancouver Edmonton

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practises. By means of a linking procedure, the paired city item in dexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100. The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city CPI weighting patterns updated for price change to the time of the inter-city retail price comparison study. Measurements of inter-city retail price differentials are updated, as required, by application of the relative movement of item prices in each city, obtained from the relevant city CPI.

Appendice 5

COMPARAISONS ENTRE LES PRIX DE DÉTAIL DANS DIFFÉRENTES VILLES DU CANADA

Le tableau 21 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie du relevé de prix utilisé pour la production de l'indice mensuel des prix à la consommation. On a, toutefois, utilisé les données obtenues dans le cadre d'un programme trimestriel spécial de relevé des prix servant à la publication des prix de détail moyens par ville¹ pour déterminer les différences de prix de la nourriture entre les villes.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont été calculées séparément pour les paires de villes suivantes:

- Halifax St. John's - Halifax Charlottetown Saint John - Halifax Ottawa - Halifax - Montréal Toronto Ottawa - Toronto - Winnipea Toronto Regina - Winnipeg - Winnipeg Edmonton Edmonton - Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison de 11 villes étant égale à 100). Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en applicant le schéma de pondération de l'IPC des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes. Les mesures de comparaison des prix de détail entre villes sont mises à jour, lorsque nécessaire, en utilisant le mouvement des prix obtenu des IPC de chaque ville, au niveau de l'article.

See Table 15 and Appendix 4.

Voir tableau 15 et appendice 4.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occuring in each location. Furthermore, since the re tail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importantes pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Il convient de noter, surtout dans une période de fluctuation

des prix, que les relations entre les prix de détail d'une ville à

Footnotes for Table 21

- (2) The weights shown are rounded 1986 weights as contained in the report The Consumer Price Index Reference Paper, Updating Based on 1986 Expenditures (Occasional), Catalogue 62-553. They are provided for illustration only; the weights actually used are combined cities weights with adjustments for price change since 1986.
- (3) Includes the following sub-groups: Condiments, spices and vinegar, sugar and sugar preparations, coffee and tea, fats and oils and other foods, food preparation materials and food preparations.

Notes pour le tableau 21

- (2) Les poids indiqués sont les poids arrondis pour 1986 figurant dans Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986 (hors-série, nº 62-553 au catalogue. Ils ne sont présentés qu'à titre documentaire; les poids utilisés en fait sont les poids des villes combinés rajustés en fonction des variations des prix observées depuis 1986.
- (3) Comprend les sous-groupes suivants: Condiments, épices et vinaigre, sucre et préparations à base de sucre, le café et le thé, les huiles et matières grasses et les autres aliments, ingrédients et préparations alimentaires.

Appendix 6

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to

Appendice 6

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont

purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking an other complete survey.

parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 7 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 7 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

CANADA'S ENVIRONMENT L'ENVIRONNEMENT DU CANADA

very day you read news items about recycling, water pollution, industrial emissions or the depletion of the ozone layer. Unfortunately, these reports are often fragmented, making it difficult to get a complete picture of Canada's physical environment.

Human Activity and the Environment is written to help you understand the links between our population, socio-economic activities and our environment. You'll see, for example, how the purple loosestrife and zebra mussels are spreading throughout inland waters and the effect they have.

CASE STUDY: A statistical profile of an

Ontario river basin is also included as

a case study to demonstrate how

socio-economic information can be

linked with physical data at a local level.

ous lisez tous les jours des articles traitant de recyclage, de la pollution de l'eau, des émissions de gaz industrielles ou de la diminution de la couche d'ozone. Malheureusement, ces rapports sont trop souvent fragmentés et il devient difficile de se faire une parfaite idée de l'environnement physique du Canada.

Activité humaine et l'environnement est écrit afin de vous aider à comprendre les liens entre notre population, nos activités socio-économiques et notre environnement. Vous verrez, par exemple, comment les salicaires et les dreissna sont réparties à travers les eaux intérieures et quels en sont leurs effets.

ÉTUDE DE CAS : un profil statistique du bassin

hydrographique de l'Ontario est également présenté,

comme étude de cas, en vue de montrer comment

l'information socio-économique peut être mise en rapport

avec les données physiques à un endroit donné.

Organized in three, easy-to-read sections: Population, Socio-Economic Systems, and Environmental Conditions, this publication examines our activities from a number of perspectives:

- resource consumption
- waste generation
- monitoring the conditions of land, water, air and living organisms

This unique bestseller highlights such fascinating details as:

- purchases of potential pollutants by Canadian households
- the importance of natural resources to the Canadian economy
- energy consumption by industry

L'ouvrage est divisé en trois parties importantes : la population, les réseaux socio-économiques et l'état de l'environnement, qui examine nos activités sous différents angles:

- la consommation des ressources naturelles
- la production des déchets

Activité humaine 1997 en l'informaine ment

 la surveillance de l'état des terres, de l'eau, de l'air et des organismes vivants

Ce best-seller unique met en relief des détails aussi fascinants que :

- les achats de polluants potentiels par les grandes maisons canadiennes
- l'importance des ressources naturelles pour l'économie canadienne
- la consommation d'énergie par industrie

INTERESTED IN ACQUIRING A CANADIAN ORIGINAL?

Then *Canadian Social Trends* is the acquisition for you. A first on the Canadian scene, this journal is claiming international attention from the people who need to know more about the social issues and trends of this country.

Drawing on a wealth of statistics culled from hundreds of documents, *Canadian Social Trends* looks at Canadian population dynamics, crime, education, social security, health, housing, and more.

For social policy analysts, for trendwatchers on the government or business scene, for educators and students, *Canadian Social Trends* provides the information for an improved discussion and analysis of Canadian social issues.

Published four times a year, *Canadian Social Trends* also features the latest social indicators, as well as information about new products and services available from Statistics Canada.

CANADIAN SOCIAL TRENDS

(Catalogue No. 11-008E) is \$34 annually in Canada, US\$40 in the United States and US\$48 in other countries.

To order, write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster service, fax your order to 1-613-951-1584. Or call toll free 1-800-267-6677 and use your VISA or MasterCard.

VOUS DÉSIREZ FAIRE L'ACQUISITION D'UNE OEUVRE ORIGINALE?

Alors *Tendances sociales canadiennes* est la publication qu'il vous faut. Première en son genre sur la scène canadienne, cette revue retient l'attention des gens d'ici et d'ailleurs qui désirent en savoir plus sur les questions sociales de l'heure au pays.

À l'aide d'abondantes statistiques extraites de nombreux documents, *Tendances sociales canadiennes* brosse le tableau de la dynamique de la population canadienne, de la criminalité, de l'éducation, de la sécurité sociale, de la santé, de l'habitation et de plusieurs autres sujets.

Que ce soit pour les analystes de la politique sociale, les analystes des tendances oeuvrant au sein des administrations publiques et du monde des affaires, les enseignants ou encore les étudiants, **Tendances sociales canadiennes** dégage l'information nécessaire à des discussions et des analyses approfondies relativement aux questions sociales.

Tendances sociales canadiennes présente également les plus récents indicateurs sociaux de même que des renseignements relatifs aux produits et services qu'offre Statistique Canada.

TENDANCES SOCIALES CANADIENNES

Ce trimestriel (No 11-008F au catalogue) se vend 34 \$ l'abonnement annuel au Canada, 40 \$ US aux États-Unis et 48 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

JOIN THE WITH THE MOST USEFUL AND ATTRACTIVE CANADA YEAR BOOK EVER PUBLISHED.

On the occasion of the nation's 125th anniversary of Confederation, the 1992 Canada Year Book takes a unique look at the fascinating highlights in the development of Canada since 1867.

Exceptionally popular among business people, journalists, librarians, parliamentarians, educators and diplomats for 125 years, the 1992 Canada Year Book is designed as a comprehensive reference source for the latest on economic, political, and social information on Canada and Canadians. And for the first time, this "special collector's" edition presents picturesque vignettes on Canada's past with informative, easy-to-read text.

Special features include:

- a new 22cm X 30cm (9" X 12") format
- larger typeface
- over 300 rare archival photos

historical perspectives on Canada's past
22 chapters, 607 pages bound in

deluxe hard cover

Time and time again, you'll reach for this compact encyclopedia to answer questions on all aspects of Canada.

L'ANNUAIRE DU CANADA

LE PLUS UTILE ET LE PLUS

ATTRAYANT JAMAIS PUBLIÉ.

L'Annuaire du Canada de 1992, qui marque le 125e anniversaire de la Confédération, jette un regard unique sur les grands moments de l'évolution du pays depuis 1867.

Cet ouvrage, particulièrement populaire depuis 125 ans auprès des gens d'affaires, des journalistes, des bibliothécaires, des parlementaires, des enseignants et des diplomates, est conçu comme un ouvrage de référence où l'on retrouve les données économiques, politiques et sociales les plus récentes sur le Canada et les Canadiens. Cette édition spéciale présente, pour la première fois, de pittoresques illustrations se rapportant à l'histoire du Canada de même que des textes informatifs et faciles à lire.

Au nombre des caractéristiques spéciales, on compte :

- un nouveau mode de présentation : 22cm x 30 cm (9" x 12")
- des caractères plus gros
- plus de 300 photos d'archives rares
- des perspectives historiques sur le passé du Canada
 - 22 chapitres, 607 pages reliées par une couverture rigide de luxe.

Cette encyclopédie compacte est un ouvrage indispensable pour répondre à vos questions portant sur tous les aspects du Canada.

- LE TERRITOIRE
 - LA POPULATION
 - LA NATION
 - L'ÉCONOMIE
 - LES ARTS ET LES LOISIRS

Available in separate English and French editions, the Canada Year Book (Cat. No. 11-402E) sells for \$49.95 (plus \$5.05 shipping and handling) in Canada, US \$60 in the United States, and US\$70 in other countries (includes shipping and handling).

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A OT6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster ordering, using your VISA or MasterCard, call toll-free 1-800-267-6677 or fax your order to (613) 951-1584. Please do not send confirmation.

Vous pouvez vous procurer l'Annuaire du Canada (no 11-402F au Catalogue), en version française ou anglaise, pour 49,95 \$ (plus 5,05 \$ pour frais d'expédition et de manutention) au Canada, 60 \$ (devises américaines) aux États-Unis et 70 \$ (devises américaines) dans les autres pays (frais d'expédition et de manutention compris).

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Information and Current Analysis Unit, Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9606) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Sous-section de l'information et de l'analyse courante, Division des prix,

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

Most of the data published in this publication is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. The Databank identification numbers, by which data may be retrieved from CANSIM, are given in the headings of the relevant series in Tables in the publication. For further information on CANSIM call (613) 951-8200 or write to Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

This publication was prepared under the direction of:

- Michel Jacod, Director, Prices Division
- Margaret Parlor, Chief, Consumer Prices Section
- Harold Harnarine, Head, Information and Current Analysis Unit

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.
- p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans cette publication peuvent être obtenues sous forme lisible par machine de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Les numéros d'identification de la Databank qui servent à retrouver les données de CANSIM sont inscrits à l'en-tête des séries respectives de la publication. Pour plus d'information sur CANSIM, composer le (613) 951-8200 ou écrire à la Division de la commercialisation, Statistique Canada, Immeuble R.H. Coats Building, Ottawa, K1A 0T6.

Cette publication a été rédigée sous la direction de:

- Michel Jacod, Directeur, Division des prix
- Margaret Parlor, Chef, Section des prix à la consommation
- Harold Harnarine, Chef, Sous-section de l'information et de l'analyse courante

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behaviour

Fourth Quarter, 1992

Trends in the All-Items Index

Between September and December 1992 (fourth quarter), the All-items Consumer Price Index (CPI) for Canada increased by 0.8% in seasonally adjusted terms. This advance was the largest since the second quarter of 1991 when an increase of 0.9% was observed. The quarterly movement slowed to 0.3% in the third quarter of 1991, and declined by 0.2% in the fourth quarter. Increases of 0.5%, 0.4% and 0.4% were observed in the first three quarters of 1992. In the fourth quarter, seasonally adjusted monthly movements of 0.2%, 0.3% and 0.3% were recorded in October, November and December respectively. Note that this analysis is based on revised seasonally adjusted figures. When December data is available each year, the seasonal adjustment program is rerun and seasonally adjusted index levels for recent years are revised. Unadjusted data are not revised.

In unadjusted terms, the CPI increased by 0.6% in the fourth quarter, preceded in the second and third quarters by advances of 0.5% and 0.2% respectively. The year began with a 0.9% rise.

The average of the 12-month rates of increase in the fourth quarter of 1992 was 1.8%. This compares with averages of 1.6%, 1.4% and 1.3% noted in the first three quarters of 1992. Except for the previous three quarters, the fourth quarter figure was lower than any quarterly average since the first quarter of 1971 and, before that, the fourth quarter of 1964.

Contributions by Major Components

In the fourth quarter, six of the seven major components increased, the most significant being a rise of 2.2% in Transportation. The 0.6% advance in the Housing index also had an impact, while smaller increases were registered in the Food (0.4%), the Recreation, Reading and Education (0.4%), the Tobacco Products and Alcoholic Beverages (0.2%), and the Health and Personal Care (0.3%) indexes. The Clothing index was the only component to show a decline, dropping 1.2% in the final quarter of 1992.

Points saillants

Comportement des prix à la consommation

Quatrième trimestre de 1992

Tendances de l'indice d'ensemble

Entre septembre et décembre 1992 (quatrième trimestre), l'Indice d'ensemble des prix à la consommation (IPC) pour le Canada progresse de 0.8% après correction des variations saisonnières. Cette hausse est la plus importante enregistrée depuis le deuxième trimestre de 1991. Durant ce trimestre, une augmentation de 0.9% était observée. Le mouvement trimestriel a ralenti par la suite pour se fixer à 0.3% au troisième trimestre de 1991 puis a régressé de 0.2% au quatrième trimestre. Des hausses de 0.5%, 0.4% et 0.4% ont été observées successivement dans les trois premiers trimestres de 1992. Au quatrième, des mouvements désaisonnalisés de 0.2%, 0.3% et 0.3% sont enregistrés en octobre, novembre et décembre respectivement. Il convient de remarquer que cette analyse est fondée sur des chiffres désaisonnalisés révisés. Chaque année, lorsque les données de décembre paraissent, on repasse le programme de désaisonnalisation et les niveaux de l'indice désaisonnalisé pour les dernières années sont révisés. Les données non corrigées ne sont pas révisées.

Sans correction des variations saisonnières, l'IPC progresse de 0.6% durant le quatrième trimestre, après avoir augmenté de 0.5% au deuxième et de 0.2% au troisième trimestres. L'année avait commencé avec une hausse de 0.9%.

La moyenne des taux d'augmentation sur douze mois s'élève à 1.8% au quatrième trimestre de 1992. Les taux correspondants des trois premiers trimestres de 1992 étaient successivement de 1.6%, 1.4% et 1.3%. En excluant les trois trimestres précédents, la moyenne du quatrième trimestre est inférieure aux moyennes trimestrielles enregistrées depuis le premier trimestre de 1971 et, avant cela, le quatrième trimestre de 1964.

Contribution des principales composantes

Dans le quatrième trimestre, six des sept principales composantes augmentent, la hausse la plus élevée étant enregistrée pour les transports (2.2%). La progression de 0.6% de l'Indice de l'habitation joue également un rôle. Des augmentations moins importantes sont enregistrées pour les aliments (0.4%), les loisirs, la lecture et la formation (0.4%), les produits du tabac et boissons alcoolisées (0.2%) et la santé et les soins personnels (0.3%). L'Indice de l'habillement est la seule composante à diminuer, enregistrant une baisse de 1.2% au dernier trimestre de 1992.

Contributions by Lower-Level indexes

Within the Transportation index, increases of 2.2% and 2.0% were observed for the Private and Public Transportation components. The rise in Private Transportation came primarily as a result of a 5.3% advance in new automotive vehicle prices in November with the introduction of 1993 car and truck models. Differences in characteristics of vehicles between model years are taken into account; the increase of 5.3% represents the change in the amount that consumers pay for vehicles of comparable quality. The advance in the Public Transport component resulted from increases in air fares.

The main contributor to the 0.6% increase in the Housing index was the Property Tax component which rose by 8.4%. Property taxes include charges for local governments, for regional governments where applicable, for school boards, and, in some municipalities, for special services. Increases by city ranged from 0.6% in Winnipeg to 22.3% in St. John's where property assessments were increased but mill rates did not change. Vancouver and Victoria showed 21.5% and 16.5% rises as supplementary rebates to property owners were discontinued. Rent, which rose by 0.6% over the quarter, also had an upward impact. Both traveller accommodation charges (-10.0%) and mortgage interest costs (-1.5%) showed significant declines between September and December.

The Food index climbed 0.4% in the final quarter as both Food Purchased from Stores and Food Purchased from Restaurants showed 0.4% advances. Declines were noted for fresh fruits and fruit juices, but increases of 15.5% and 1.6% in the series for fresh vegetables and meat more than offset these declines.

Movements within the Recreation, Reading and Education, the Tobacco Products and Alcoholic Beverages, and the Health and Personal Care indexes were small and offsetting.

The Clothing index decreased by 1.2% in the final quarter of 1992 driven mainly by 1.9% and 1.2% declines in the Women's and Men's Wear indexes. Excluding the months of August and October of this year, the Clothing index fell in each month since April. Continuing price declines were indicative of a lack of demand in this sector.

Contribution des indices de niveau inférieur

On observe, dans l'Indice des transports, des hausses de 2.2% et de 2.0% des composantes du transport privé et du transport public. L'augmentation du transport privé est surtout attribuable à la progression de 5.3% du prix des nouveaux véhicules automobiles en novembre avec l'arrivée des modèles 1993 de voitures et camions. Ceci tient compte des différences dans les caractéristiques des véhicules d'une année à l'autre : ainsi, la hausse de 5.3% représente le changement dans la somme payée par les consommateurs pour des véhicules de qualité comparable. La progression de la composante du transport public s'explique par les augmentations des tarifs aériens.

Le principal facteur ayant contribué à la hausse de 0.6% de l'Indice de l'habitation est la composante de l'impôt foncier qui s'accroît de 8.4%. Cet impôt comprend les taxes des administrations locales, des administrations régionales (le cas échéant) et des commissions scolaires, ainsi que les taxes exigées par certaines municipalités pour des services spéciaux. Les augmentations dans les villes sont comprises entre 0.6% à Winnipeg et 22.3% à St. John's où les évaluations foncières ont été majorées mais le taux exprimé en millième n'a pas changé. On observe des hausses de 21.5% et de 16.5% à Vancouver et à Victoria en raison de l'abolition des dégrèvements supplémentaires accordés aux propriétaires. Le loyer, qui s'accroît de 0.6% durant le trimestre, a aussi un effet d'entraînement. Tant les frais d'hébergement des voyageurs (-10.0%) que les intérêts hypothécaires (-1.5%) enregistrent des baisses considérables entre septembre et décembre.

L'Indice des aliments progresse de 0.4% dans le dernier trimestre, les aliments achetés au magasin et ceux achetés au restaurant augmentant tous deux de 0.4%. On constate un recul du prix des fruits frais et des jus de fruits, mais les hausses de 15.5% et de 1.6% dans les séries des légumes frais et de la viande neutralisent largement ce recul.

Les mouvements observés à l'intérieur de l'Indice des loisirs, de la lecture et de la formation, de l'Indice des produits du tabac et des boissons alcoolisées et de l'Indice de la santé et des soins personnels ont peu d'ampleur et se neutralisent les uns les autres.

L'Indice de l'habillement régresse de 1.2% au dernier trimestre de 1992, en raison surtout de diminutions de 1.9% et de 1.2% du prix des vêtements pour hommes et du prix des vêtements pour femmes. Abstraction faite des mois d'août et d'octobre de cette année, l'Indice de l'habillement recule chaque mois depuis avril. La baisse constante des prix traduit l'absence de demande dans ce secteur.

Introduction

This quarterly publication presents a compendium of consumer prices and price index related information of both a current and historical nature. It provides a wide range of timely and detailed statistical information and serves as a complement to the monthly publication, The Consumer Price Index, Catalogue 62-001.

Part I of this report presents a synopsis of current consumer price index movements. This is presented in the form of tabular and graphic information. Some tabular information on international prices is also presented, in particular for some Canada - U.S. comparisons.

Parts II and III provide a detailed historical summary of monthly consumer price indexes in recent years. This summary contains considerable disaggregated information, again in the perspective of both the urban Canada and the separate city contexts.

Part IV of this report contains tables for the All-items and seven major components for each province.

Place-to-place comparative retail price information forms Part V of the report. This segment presents the most recent data with regards to average city retail prices and inter-city indexes of retail price differentials. Special feature articles, which are periodically included in the publication, are presented in Part VI.

Appendices serve as sources of reference for the statistical data presented in the preceding segments of the report. Appendices 1 and 2 contain explanatory notes pertaining to consumer price index data; Appendix 3 provides reference material for seasonal adjustment methodology in the context of its application to the Consumer Price Index; Appendices 4, 5 and 6 present background information relating to place-to-place retail price comparisons.

Introduction

Cette publication présente un résumé de renseignements historiques et courants des prix à la consommation et des indices de prix. Elle fournit une gamme d'informations statistiques étendue, d'une façon détaillée, et sert de complément à la publication mensuelle, L'indice des prix à la consommation, n° 62-001 au catalogue.

La partie I de ce rapport contient un aperçu synoptique qui présente les mouvements courants des prix à la consommation. Ces informations sont présentées sous la forme de tableaux et de graphiques. Des tableaux comportant de l'information sur les prix internationaux sont également présentés, particulièrement en ce qui regarde certaines comparaisons entre le Canada et les É.-U.

Les parties II et III fournissent un résumé historique détaillé des indices mensuels des prix à la consommation des dernières années. Ce résumé contient des renseignements pour le Canada et les villes à un niveau beaucoup plus désagrégé.

La partie IV de ce rapport contient des tableaux pour l'ensemble et les sept composantes principales pour chaque province.

Des informations sur les prix de détail comparés d'un endroit à l'autre composent la partie V de ce rapport. Cette section fournit les plus récentes données au sujet des prix de détail moyens par ville et des indices comparatifs des prix de détail entre les villes. Les articles spéciaux, qui font périodiquement partie de cette publication, se retrouvent à la partie VI.

Les appendices servent de référence aux données statistique présentées dans les parties précédentes du rapport. Les appendices 1 et 2 contiennent les notes explicatives reliées aux données de l'indice des prix à la consommation; l'appendice 3 fait référence à la méthode des ajustements saisonniers dans son application à l'indice des prix à la consommation; les appendices 4, 5 et 6 fournissent des informations de base reliées aux comparaisons de prix d'un endroit à l'autre.

Seasonal adjustment of the Consumer Price Index for Canada is undertaken separately for each of the seven major components of the CPI with the quarterly calculation being made before linking or chaining takes place. The resulting seven major component indexes as well as the All-items and All-items excluding Food aggregates are then "linked" or "chained" to form continuous series starting from January 1978. The seasonally adjusted monthly data are published without further revision until the year end, when revisions to any months data may be made from January 1985 forward (the start of the 1986 basket). These revision are published with the December release.

La désaisonnalisation de l'indice des prix à la consommation pour le Canada est effectuée séparément pour chacune des sept composantes principale de l'IPC. Les calculs sont faits avant de procéder à l'enchaînement. Les indices des sept composantes principales, d'ensemble et d'ensemble sans les aliments ainsi obtenus sont ensuite "enchaînés" pour déterminer les séries continues à partir de janvier 1978. Les données désaisonnalisées mensuelles sont publiés sans autre révision jusqu'à la fin de l'année où une révision peut être effectuée pour tout mois à compter de janvier 1985 (le début du panier de 1986). Ces révisions sont émis avec la publication de décembre.

Pour de plus amples renseignements et détails, consulter l'appendice 4.

Nous avons laissé les espaces en blanc dans ce tableau lorsque la qualité et (ou) la quantité des prix relevés ne nous a pas permis d'établir des moyennes fiables.

Whitehorse n'est pas inclus dans les moyennes pondérées des villes.

A compter d'octobre 1990, les prix du bifteck de surlonge sans la partie du filet sont relevés dans toutes les villes.

Chicoutimi (450 g).

Un paquet donnant en tout 2.25 L

Average Retail Prices for Regular Unleaded Gasoline at Full Service Filling Stations, by Selected City, by Month - Cents Per TABLE 16.

Prix de détails moyens, essence régulière sans plomb, aux stations avec service complet, par ville choisie, par mois - Cents par litre¹ TABLEAU 16.

THE CONSUMER PRICE INDEX

The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is of an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time. Changes in the costs of this basket are therefore due only to "pure" price movements, i.e., price movements that are not associated with changes in the quality and/or quantity of the set of consumer goods and services in the basket.

The Consumer Price Index for each city measures price change from one time period to another within that specific city. Thus, while city CPI's show the **movement** of prices over time in each city, they do not indicate price level differences between cities or between cities and Canada. Such inter-city price comparisons for a selected number of items sold in grocery stores for 26 cities are available at present in Part V of this publication. Inter-spatial indexes covering approximately two thirds of the CPI basket for a selected number of cities are also available in this section.

Coverage

Beginning with the December 1988 to January 1989 price change, the weights used in the Consumer Price Index are those pertaining to 1986 expenditure patterns. Data used for establishing these patterns were obtained through the 1986 Family Expenditure Surveys. The expenditure data represents the expenditures of all private households (families and individuals) living in Canadian urban centres with a population of 30,000 or more. Population estimates for 1986 revealed 82 such urban centres. Largely due to limitations on the availability of detailed information on consumer expenditures it has become necessary to group the 82 urban centres into 34 urban centre strata. An urban centre stratum may be interpreted as a geographical unit around which the sampling framework of the CPI is constructed.

Separate CPI's are published for 18 of these centres which, together, accounted for approximately 75% of the total 1986 current consumption expenditures reported in the 82 centres. These 18 centres were, in part, selected in order to permit the publication of at least one CPI in each province. Some 300 commodities are priced in each of these 18 cities while in the remaining 64 urban centres, the number of commodities surveyed is fewer, with clothing and home furnishings being the notable exclusions.

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION

L'indice des prix à la consommation (IPC) mesure la variation dans le temps, exprimée en pourcentage, du coût à l'achat d'un "panier" constant de biens et de services, qui représente les achats faits par un groupe particulier de la population au cours d'une période donnée. Le "panier" renferme des biens et des services de quantité et de qualité invariables ou équivalentes et dont les prix sont mesurables au cours du temps. C'est ainsi que les variations de son coût résultent uniquement des mouvements "purs" de prix, c.-à-d. des mouvements de prix qui ne sont pas attribuables à des changements de qualité ou de quantité des biens et services de consommation du panier.

L'indice des prix à la consommation de chaque agglomération urbaine mesure les variations de prix entre deux périodes dans cette agglomération. Aussi les IPC des villes indiquent-ils le **mouvement** des prix dans le temps dans chaque agglomération, mais non les différences de niveau des prix entre les villes ou bien entre les villes et le Canada. De telles comparaisons entre les villes en ce qui concerne les niveaux de prix de certains articles vendus dans les épiceries sont présentées, pour 26 villes, à la Partie V de la présente publication. On y trouve également, pour certaines villes, des indices interspatiaux portant sur les deux tiers environ du panier de l'IPC.

Champ d'observation

À compter de janvier 1989, les pondérations utilisées pour l'indice des prix à la consommation se rapportent à la composition des dépenses de 1986. Les données qui ont servi à établir cette composition proviennent des enquêtes sur les dépenses des familles de 1986. Les données sur les dépenses représentent les dépenses de tous les ménages privés (familles et personnes seules) qui habitent les centres urbains du Canada qui comptent 30,000 habitants ou plus. D'après les estimations démographiques pour 1986, 82 centres urbains répondent à ce critère de population. En raison principalement du manque de renseignements détaillés sur les dépenses des consommateurs, il a été nécessaire de grouper les 82 centres urbains en 34 strates de centres urbains. Une strate de centres urbains peut se définir comme une unité géographique à partir de laquelle est constituée la base de sondage de l'IPC.

Des IPC distincts sont publiés pour 18 centres qui, ensemble, interviennent pour près de 75% du total des dépenses courantes de consommation déclarées en 1986 par les 82 centres. Les 18 centres ont été choisis, en partie, parce qu'ils permettent la publication d'un IPC au moins dans chaque province. On relève les prix de quelque 300 produits dans chacune des 18 villes; ce nombre est plus faible dans les 64 centres restants, les produits exclus étant principalement l'habillement et les articles d'arneublement.

Prices

The prices used in the calculation of the CPI are retail prices without regard to whether they are described as regular, special, etc. inclusive of all sales and excise taxes applicable to individual commodities. The pricing cycle starts in the latter part of each month and extends to the middle part of the following month. Although prices for most CPI items are collected on a monthly basis, some are priced less frequently, e.g., property taxes, automobile registration fees, dry cleaning services. However, such goods or services scheduled for pricing at less than monthly intervals will be priced in any month when there is evidence to suggest that significant price changes may occur prior to the next regularly scheduled pricing. The number of prices observed in a given city depends upon the importance of that city's expenditures to the total Canada expenditure and also the nature of the commodity, with those commodities displaying a high variability of price change generally requiring more observations. The selection of outlets in which prices are to be collected is judgmental (other than for rents) with the sample being designed to cover volume selling establishments.

Weights and Linking

The weights used in the calculation of the Consumer Price Index are periodically updated. This is a necessary procedure which serves to ensure that weights reflect changes in consumer expenditures thereby maintaining the relevancy of the index. As a result, different weighting systems are in effect in different time periods.

The 1982 family expenditure patterns were used to compile the CPI from January 1985 to December 1988. In January 1989 the 1982 weights were replaced by those derived from the expenditure patterns of 1986. This updating continues the policy of updating on a four-year cycle.

Prix

Les prix servant au calcul de l'IPC sont les prix au détail qu'il s'agisse de prix réguliers, de prix spéciaux, etc. et englobent toutes les taxes de vente, d'accise et autres taxes imposées aux produits. Le cycle des relevés commence vers la fin de chaque mois et se termine au milieu du mois suivant. Les prix de la plupart des articles de l'IPC sont recueillis chaque mois, mais certains articles sont observés moins souvent, notamment l'impôt foncier, l'immatriculation d'automobiles, le nettoyage à sec. Cependant, dans le cas des biens et services dont l'observation est prévue à des intervalles de plus d'un mois, on en relèvera le prix dans tout mois où il apparaît qu'une variation importante se produira avant le prochain relevé prévu au calendrier. Le nombre de prix observés dans une ville donnée dépend de l'importance des dépenses de cette ville par rapport au total des dépenses pour le Canada ainsi que de la nature du produit, les observations étant généralement plus fréquentes pour les produits dont les prix varient beaucoup. Le choix des points de vente où les prix doivent être recueillis est fait au jugé (sauf pour les loyers) et l'échantillon a pour but de couvrir les établissements à gros volume de vente.

Pondérations et enchaînement

Les pondérations utilisées dans le calcul de l'indice des prix à la consommation sont mises à jour périodiquement. Ce procédé est nécessaire pour que les pondérations tiennent compte des changements qui s'opèrent au niveau des dépenses à la consommation et, par le fait même, pour que l'indice conserve son utilité. En conséquence, différents schémas de pondérations sont utilisés pour des périodes de temps distinctes.

La composition des dépenses des familles de 1982 a servi au calcul de l'IPC à partir de janvier 1985 jusqu'à décembre 1988. En janvier 1989, les pondérations de 1982 ont été remplacées par d'autres dérivées de la composition des dépenses de 1986. Cette mise à jour poursuit la politique de Statistique Canada de mettre à jour les pondérations régulièrement à tous les quatre ans.

TEXT TABLE II. Comparison of 1982 and 1986 Expenditure Weights Used in the Consumer Price Index, by Major Component for Canada

TABLEAU EXPLICATIF II. Comparaison des pondérations des dépenses de 1982 et de 1986 utilisées pour l'indice des prix à la consommation, par composante principale pour le Canada

Major components	Weights 1982	Weights 1986
Composantes principales	Pondérations 1982	Pondérations 1986
All-items - Ensemble	100.00 ¹	100.00 ¹
Food - Aliments Housing - Habitation Clothing - Habillement Transportation - Transports Health and personal care - Santé et soins personnels Recreation, reading and education - Loisirs, lecture et formation Tobacco products and alcoholic beverages - Produits du tabac et boissons alcoolisées	20.02 38.14 8.37 15.75 4.02 8.25	18.05 36.32 8.69 18.29 4.20 8.84

¹ Figures may not add up due to rounding.

The weights shown in Text Table II represent expenditures in 1982 (1982 quantities valued in 1982 prices) and in 1986 (1986 quantities valued in 1986 prices). They cannot be used to reconstruct or reaggregate indexes on a 1981 = 100 time base. The methodology required to permit such a reaggregation can be obtained on request by contacting the:

Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Telephone: (613) 951-9606).

The indexes based on 1986 weights were linked or connected in December 1988 to the appropriate indexes based on 1982 weights which had been in use since January 1985.

This linking procedure ensures that conceptually equivalent series are made continuous over time. It should be noted that the linking method is such that aggregate indexes cannot be considered as the direct average of their respective component indexes. In exceptional cases, this may cause the level, as well as the percentage changes, of an aggregate index to fall slightly outside the range of its component indexes.

Les pondérations du tableau explicatif II représentent les dépenses en 1982 (quantités et prix de 1982) et en 1986 (quantités et prix de 1986). Elles ne peuvent servir à reconstruire ni à réagréger des indices sur la base de 1981 = 100. La méthode à suivre pour une telle reconstruction peut être obtenue sur demande auprès de la:

Section des prix à la consommation Division des prix, Statistique Canada Ottawa (Ontario) K1A 0T6 (Téléphone: (613) 951-9606).

Les indices fondés sur les pondérations de 1986 ont été enchaînés ou raccordés en décembre 1988 aux indices correspondants fondés sur les pondérations de 1982, en usage depuis janvier 1985.

Grâce à cet enchaînement, des séries équivalentes sur le plan conceptuel sont continues dans le temps. On notera que cette méthode d'enchaînement ne permet pas de considérer les indices composés comme des moyennes directes de leur composante respective. Dans des cas exceptionnels, le niveau et les variations en pourcentage d'un indice agrégé peuvent ainsi dépasser légèrement l'étendue des indices composantes.

¹ Les chiffres ayant été arrondis, les totaux peuvent ne pas correspondre.

Time Base

The All-items Consumer Price Index for Canada and each index city is expressed in terms of 1986 = 100, except for certain items, as noted, where the pricing survey was introduced subsequent to that year. The 1986 = 100 time base became effective with the release of the June 1990 index. The base period for the Consumer Price Index, as well as for other Statistics Canada index series, is revised periodically.

Rebasing the CPI is a straightforward arithmetic operation which does not change the picture of economic events. Percentage changes computed will be the same, except for small differences due to rounding, regardless of whether the 1981 = 100 or 1986 = 100 time base is used. Rebasing of the CPI does not involve changes in the base period expenditure weights. Furthermore, the method employed in converting to the 1986 = 100 time base does not affect the continuity or statistical comparability of the index series.

It should be noted, however, that although the percentage changes in an index series will be the same, except for small differences due to rounding, regardless of whether they are computed from the 1981 or 1986 time base series, the same is not true for changes measured in terms of index points.

Current Annual Rate of Change

A rate of change representative of an annual movement in prices may be derived in several ways, none of which is free of shortcomings and interpretational problems. Statistics Canada presently calculates three measures of annual change, the percentage change between any given month and the same month a year ago, the percentage change between annual averages based on a calendar year and the current annual rate of change.

The method selected for calculating the current seasonally adjusted annual rate of change in the CPI in Table 1 involves compounding the growth rate over the latest three-month period on the seasonally adjust ed level (see Appendix 3). For more information on CPI growth rates, see "A Note on the Current Annual Rate of Change of the Consumer Price Index", **Retail Prices and Living Costs** – Service Bulletin (Catalogue 62-005), Vol. 4, No. 4, April 1975.

Reconstructed Indexes

With the release of the January 1985 Consumer Price Index, certain series were reconstructed historically to reflect the introduction of the Consumer Classification System of Statistics Canada which was introduced with the 1982 Updating. A few additional reconstructions were made with the introduction of the 1986 basket. For further information, contact Prices Division (613-951-9606 or 951-3353).

Période de base

L'indice d'ensemble des prix à la consommation du Canada et les indices de chaque ville sont exprimés sur la base de 1986 = 100, sauf pour certains articles, qui sont signalés et dont l'enquête sur les prix n'a été introduite qu'après cette année là. La base temporelle de 1986 = 100 est devenue effective à partir de la diffusion de l'indice de juin 1990. La période de base pour l'indice des prix à la consommation, et pour d'autres séries d'indices de Statistique Canada, fait l'objet d'une révision periodiquement.

Pour recalculer la base de l'IPC, il suffit d'effectuer une opération arithmétique simple qui ne modifie pas le tableau des événements économiques. Les variations en pourcentage calculées sur la base 1981 = 100 et 1986 = 100 sont équivalentes, les petites différences étant attribuables à l'arrondissement. Le calcul de la nouvelle base de l'IPC ne change pas les pondérations des dépenses de la période de base. De plus, la méthode de conversion selon la base 1986 = 100 ne compromet pas la continuité ou la comparabilité statistique des séries d'indices.

Toutefois, même si les variations en pourcentage d'une série d'indices seront identiques, à quelques différences d'arrondissement près, quelle que soit la base (1981 ou 1986) utilisée pour les calculer, tel ne sera pas le cas de ses mouvements exprimés en points.

Taux de variation annuel courant

Plusieurs méthodes permettent de dériver un taux de variation pour représenter le mouvement annuel des prix, mais toutes comportent des points faibles et des problèmes d'interprétation. Statistique Canada calcule actuellement trois mesures de la variation annuelle, soit le changement en pourcentage pour un mois donné par rapport à un autre et au mois correspondant de l'année précédente, le changement en pourcentage entre des moyennes annuelles basées sur l'année civile et le taux de variation annuel courant.

La méthode retenue pour calculer le taux de variation annuel courant après désaisonnalisation de l'IPC au tableau 1 consiste à prendre un taux de croissance composé sur le niveau désaisonnalisé des trois derniers mois (voir appendice 3). Pour plus de renseignements sur le taux de croissance de l'IPC, se reporter à "Note sur le taux annuel courant de l'indice des prix à la consommation", **Prix de détail et coût de la vie** - Bulletin de service (n° 62-005 au catalogue), vol. 4, n° 4, avril 1975.

Indices reconstruits

À compter de l'émission de l'indice des prix à la consommation de janvier 1985, certaines séries historiques ont été reconstruites de façon à ce qu'elles représentent l'introduction du système de classification de la consommation de Statistique Canada qui fut introduit avec la mise à jour de 1982. L'adoption du panier de 1986 a amené quelques autres remaniements. Pour plus de renseignements, communiquez avec la Divison des prix (613-951-9606 ou 951-3353).

Whitehorse and Yellowknife

In keeping with its commitment to publish consumer price indexes for at least one urban centre in each province and territory, Statistics Canada, as part of the 1978 Updating, began to develop consumer price indexes for the urban centres of Whitehorse and Yellowknife. As no Family Expenditure Survey was conducted in these centres in 1978, 1972 expenditure patterns for these two centres were extrapolated to 1978 using the change in expenditure patterns between 1972 and 1978 in other urban centres. As the 1978 expenditure patterns were incorporated into the official CPI, commencing with the release of the April 1982 index, consumer price indexes for Whitehorse and Yellowknife were developed on a March 1982 = 100 time reference base. Since the expenditure patterns for Whitehorse and Yellowknife were derived and not directly observed, the indexes for these two urban centres were not included in the calculation of the official CPI for Canada. With the introduction of the 1982 Updating, these two centres were included in the calculation of the official CPI for Canada.

It was not possible, at this time, to develop an owned accommodation index for these two centres comparable to that in concept of the national CPI. The nature and the relatively small size of the housing market in these two centres is such that Statistics Canada was unable to construct reliable price indexes for new houses. It was decided that as an interim and only available alternative measure, the price movement of rental accommodation would be used to represent that of owned accommodation. As a consequence, the All-items indexes published for these centres are not comparable to those for Canada or for any of the sixteen urban centres for which a CPI is produced. The rent data used are collected on a quarterly basis by the respective territorial governments. For rents, the data are incorporated into the consumer price indexes for these two centres with a two-month lag.

Provincial CPI's

Consumer price indexes for provincial urban centres were published for the first time in the July-September 1988 issue of this publication. An article describing the coverage and method of these indexes was published in the same issue. Updated Provincial CPI's are now a permanent feature of this publication.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in **The Consumer Price Index**, **Reference Paper**, **Updating Based on 1986 Expenditures**, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in Family Expenditure in Canada, 1986, Catalogue 62-555.

Whitehorse et Yellowknife

Statistique Canada, conformément à son engagement de publier des indices des prix à la consommation pour au moins un centre urbain dans chaque province et territoire, a commencé à élaborer des indices de prix à la consommation pour les centres urbains de Whitehorse et Yellowknife dans le cadre de la mise à jour de 1978. Puisqu'il n'y a pas eu dans ces centres d'enquête sur les dépenses des familles en 1978, les données sur la composition des dépenses de 1972 pour ces deux villes ont été extrapolées pour l'année 1978 en se fondant sur l'évolution de la composition des dépenses entre 1972 et 1978 dans d'autres centres urbains. Étant donné que la composition des dépenses de 1978 a été incorporée dans l'IPC officiel à la consommation avec l'indice d'avril 1982, les indices des prix à la consommation pour Whitehorse et Yellowknife ont été élaborés sur la base mars 1982 = 100. La composition des dépenses pour Whitehorse et Yellowknife ayant été dérivée plutôt qu'observée directement, les indices pour ces deux centres urbains n'étaient pas compris dans le calcul de l'IPC officiel pour le Canada. Avec l'introduction de la mise à jour de 1982, ces deux centres ont été pris en compte lors du calcul de l'IPC officiel pour le Canada.

Il n'a pas été possible d'élaborer, pour ces deux centres, un indice du logement en propriété qui soit conceptuellement comparable à celui incorporé à l'IPC national. La nature et la petitesse relative du marché de l'habitation dans ces deux centres ont empêché Statistique Canada de construire des indices de prix fiables pour les maisons neuves. Comme c'est la seule mesure disponible, il a été décidé d'utiliser, pour le moment, le mouvement des prix du logement en location pour représenter celui du logement en propriété. En conséquence, les indices d'ensemble publiés pour ces centres ne sont pas comparables à ceux du Canada ou d'aucun des seize autres centres urbains pour lesquels un IPC est calculé. Les données sur les loyers utilisées sont recueillies trimestriellement par les deux administrations publiques territoriales. S'agissant des loyers, les données pour ces deux centres sont incorporées aux indices de prix à la consommation avec deux mois de retard.

IPC Provinciaux

Des indices de prix à la consommation pour les centres urbains provinciaux ont été publiés pour la première fois dans le numéro de juillet-septembre 1988 de la présente publication. Un article décrivant la couverture et la méthodologie de ces indices est paru dans ce même numéro. Les IPC provinciaux mis à jour sont devenus partie intégrante de la présente publication.

Renseignements supplémentaires et publications connexes

Le Document de référence de l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1986, (hors-série), n° 62-553 au catalogue, décrit en détail les méthodes et les concepts de l'IPC. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans Dépenses des familles au Canada, 1986, n° 62-555 au catalogue.

The latest information on the Consumer Price Index for Canada and 18 cities is also available in the **Consumer Price Index**, Catalogue 62-001 monthly. In addition, selected educational and promotional material are available. For these and further information contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606 or 613-951-3353).

De plus, les derniers renseignements sur l'indice des prix à la consommation du Canada et de 18 villes sont publiés dans le bulletin mensuel **L'indice des prix à la consommation**, n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606 ou 613-951-3353).

THE PURCHASING POWER OF THE CONSUMER DOLLAR

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

Changes in the purchasing power of the consumer dollar, put simply, are inversely related to movements in the Consumer Price Index. For example, between 1986 and June 1990, consumer prices as measured by the CPI rose 19.2% such that, goods and services which could have been purchased for \$100.00 in 1986 would cost \$119.20 in June 1990. Each consumer dollar in June 1990 therefore buys less than in 1986. The extent to which the purchasing power of the dollar has declined is matched precisely by the increase in the consumer price index. Thus the purchasing power of a dollar in June 1990 compared to the 1986

dollar was 83.9 (100 cents X
$$\frac{100.0}{119.2}$$
 = 83.9 cents).

This process may be interpreted as the deflation of money, that is, adjusting values expressed in monetary terms in order to eliminate price effects.

Users of the tabulation which shows the purchasing power of the consumer dollar compared to the 1986 dollar at different points in time (Table 2) should note that, as in the case of the Consumer Price Index from which the numbers are derived, the data may not measure closely the experiences of any one specific family within the large urban group to which the CPI relates. At the same time changes in the purchasing power of the dollar are not expected to match the experience of other population groups whose expen diture behaviour is significantly different from those associated with the CPI target population. It should also be noted that like the CPI, changes in the purchasing power of the dollar are not directly affected by changes in income taxes, unemployment insurance premiums, other types of security payments and all other goods and services that are not included in the CPI basket.

Appendice 2

LE POUVOIR D'ACHAT DU DOLLAR DE CONSOMMATION

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie et la baisse des prix est liée à la hausse du pouvoir d'achat.

En somme, le pouvoir d'achat du dollar de consommation varie en relation inverse avec les mouvements de l'indice des prix à la consommation. Par exemple, entre 1986 et juin 1990, les prix à la consommation mesurés par l'IPC ont grimpé de 19.2% de sorte que les biens et services qu'on pouvait acheter en 1986 avec \$100.00 coûtaient \$119.20 en juin 1990. Chaque dollar de consommation en juin 1990 achète donc moins qu'en 1986. Le pouvoir d'achat du dollar a baissé exactement dans la même proportion que l'indice des prix à la consommation a augmenté. Par conséquent, le pouvoir d'achat d'un dollar en juin 1990, par rapport au dollar de 1986,

Ce processus peut être assimilé à la déflation de l'argent, c'est-à-dire à la correction des valeurs monétaires afin d'éliminer l'influence des prix.

Les utilisateurs des totalisations qui indiquent le pouvoir d'achat du dollar de consommation à différentes périodes par rapport à 1986 (tableau 2) doivent noter que ces chiffres sont tirés de l'indice des prix à la consommation et qu'ils peuvent, tout comme ce dernier, ne pas mesurer fidèlement la situation particulière d'une famille faisant partie du grand groupe urbain auquel se rapporte l'IPC. Par ailleurs, les variations du pouvoir d'achat du dollar ne reflètent pas les changements touchant les autres groupes de population dont les habitudes de dépenses diffèrent sensiblement de celles du groupe cible pour l'IPC. Il faut également noter que, tout comme l'IPC, les variations du pouvoir d'achat du dollar ne sont pas touchées directement par les changements de l'impôt sur le revenu, des primes d'assurance-chômage, d'autres paiements de sécurité sociale et des prix de tous les autres biens et services ne faisant pas partie du panier de I'IPC.

SEASONAL ADJUSTMENT OF THE CONSUMER PRICE INDEX

Economic time series, measuring changes through time in economic activities, reflect the combined effects of the underlying seasonal, cyclical, trend and irregular factors which influence them. Such series can be decomposed into distinct movements representing the separate effects of the seasonal, cyclical and trend factors and a residual movement representing factors causing irregular non-repetitive movements.

Seasonal fluctuations in a series are those that can be identified with a particular season or time of year. These fluctuations tend to occur at about the same time each year with roughly the same magnitude and are the composite result of climatic influences and social and commercial customs (e.g., harvests, end of season sales).

Cyclical movements consist of sequences of change over periods longer than a year, during which the series rises to a peak and then falls back, subsequently to rise again. For many series this type of movement is associated with expansion and contraction of the economy over the "business cycle".

The trend is a steady underlying movement which reflects continuing or slowly changing economic forces.

Finally, the fluctuations that remain unaccounted for by the seasonal, cyclical and trend movements of a series are termed irregular. The factors causing irregular movements in a series are of a non-repetitive, ad-hoc nature. The irregular component tends to have a stable random appearance, but may include some extreme movements having identifiable causes (e.g., strikes or severe weather). They therefore can be distinguished from the much smaller random irregular variations.

Appendice 3

LA DÉSAISONNALISATION DE L'INDICE DES PRIX À LA CONSOMMATION

Les séries chronologiques économiques mesurent l'évolution dans le temps de l'activitié économique. Ces séries reflètent les effets combinés de la saisonnalité, du cycle, de la tendance générale et d'autres facteurs accidentels qui leur sont propres et qui agissent sur elles. Il est possible de décomposer de telles séries ou mouvements distincts représentant séparément les effets de tel ou tel facteur (saisonnalité, cycle, tendance) et en un mouvement résiduel représentant les facteurs de mouvements accidentels (non répétitifs).

Les fluctuations saisonnières d'une série sont celles que l'on peut relier à une saison ou une période donnée de l'année; elles ont tendance à se produire généralement à peu près à la même époque de l'année et avec la même ampleur. Elles sont le résultat à la fois de conditions climatiques et d'habitudes sociales et commerciales (telle les récoltes, les ventes de fin de saison).

Les mouvements cycliques se définissent comme une suite de variations sur des périodes supérieures à un an, au cours desquelles la série atteint un sommet, descend puis remonte à nouveau. Ce type de mouvement est associé, pour de nombreuses séries, à l'expansion et à la récession économique au cours du "cycle économique".

La tendance générale est un mouvement fondamental stable qui reflète la continuité ou un changement lent de l'économie.

Enfin, les fluctuations qui ne se classent ni dans la saisonnalité, ni dans le cycle, ni dans la tendance générale sont désignées comme mouvements accidentels. Les facteurs expliquant ce type de mouvement dans une série sont de nature spéciale et non répétitive. L'élément accidentel tend à présenter une apparence aléatoire stable mais il peut comprendre certains mouvements extrêmes, dont on peut identifier les causes (comme des grèves ou de fortes intempéries). Ils peuvent donc être distingués des variations irrégulières aléatoires beaucoup moins prononcées.

The methodologies used for removing as much of the seasonal fluctuation as possible from a series have been described in detail in numerous articles and texts on the subject. Rather than reiterating those texts, an outline of the methodologies employed in the derivation of seasonally adjusted consumer price indexes for Canada is provided below.

With the introduction of the 1982 basket, the seasonal adjustment methodology was changed. Direct seasonal adjustment is performed at the level of the seven major components with the seasonally adjusted All-items and All-items excluding Food indexes being the weighted average of their components. This indirect seasonal adjustment of the two aggregate series ensures (except for possible rounding differences) that the aggregate movements will be within the range of their components' movements. Since each basket has its own weights, the move to indirect seasonal adjustment of the aggregates dictated the use of unlinked series as the basis for the seasonal adjustment. Estimating a separate seasonal pattern for each basket has some conceptual advantages since it means that the classification and weight changes introduced with each updating of the basket will not distort the estimates. However, there is an operational difficulty which arises due to the desirability of having at least seven years of data for estimation of the seasonal pattern and the current rapidity with which CPI baskets are updated. Given the current updating cycle, at the time a new basket is introduced, we have only three years of data for the new basket. To create a longer time series, we chain on data from the previous basket back to it's beginning. This reintroduces some of the distortions present in estimating seasonal patterns from linked data.

The above distortion will be minimized through the use of concurrent seasonal adjustment rather than forecast seasonal factors. With the concurrent methodology, the seasonal pattern is estimated each month using all available data. However, to minimize revisions we will revise past indexes only at the end of each calendar year.

Les méthodes utilisées pour éliminer le plus possible de saisonnalité d'une série ont fait l'objet de descriptions détaillées dans de nombreux articles et ouvrages sur la question¹. Au lieu d'en reprendre ici le contenu, nous présentons ci-dessous les grandes lignes des méthodes utilisées pour dériver les indices des prix à la consommation désaisonnalisés pour le Canada.

Avec l'introduction du panier 1982, la méthode de désaisonnalisation fût changée. La désaisonnalisation directe est effectuée à l'échelle des sept composantes principales; les versions désaisonnalisées de l'indice des aliments et de l'indice d'ensemble sans les aliments correspondent à la pondérée leurs composantes. de désaisonnalisation indirecte des deux séries agrégées garantit que les mouvements agrégés se situeront dans les limites des mouvements de leurs composantes (exception faite des différences attribuables à l'arrondissement). Puisque chaque panier a ses propres coefficients de pondération, le passage à la méthode indirecte de désaisonnalisation des séries agrégées a entraîné l'utilisation, à titre de base de la désaisonnalisation, des séries non enchaînées. L'estimation de tendances saisonnières distinctes pour chacun des paniers représente certains avantages au point de vue conceptuel, puisqu'elle signifie que les changements apportés à la classification et aux coefficients de pondération au moment de la mise à jour du panier n'entraîneront aucune distortion. Toutefois, une difficulté opérationnelle existe étant donné, d'une part, qu'il est souhaitable d'avoir au moins sept années de données pour estimer la tendance saisonnière et, d'autre part, en raison de la rapidité avec laquelle on met maintenant à jour le panier de l'IPC. étant donné le cycle courant de mise-à-jour, nous n'avons que trois ans de données pour un nouveau panier lorsque celui-ci est introduit. Afin de créer une série plus longue, nous enchaînons les données du nouveau panier à celles du panier précédent jusqu'à son début. Cette mesure ramène certaines distorsions que l'on retrouvait dans l'estimation des tendances saisonnières des données enchaînées.

Ces distortions seront toutefois minimisées par l'utilisation de désaisonnalisations concomitantes plutôt que de coefficients saisonniers projetés. Dans la méthodologie concomitante, la tendance saisonnière est estimée chaque mois au moyen de toutes les données accessibles. Nous ne recalculerons toutefois les indices antérieurs qu'à la fin de chaque année civile, et ce pour réduire au minimum le nombre de révisions.

Shiskin, Julius and Harry Eisenpress, "Seasonal Adjustments by Electronic Computer Methods", Technical Paper 12, National Bureau of Economic Research, New York, 1958.

CITY AVERAGE RETAIL PRICES

Introduction

The Average Retail Price Survey is under taken to produce an accurate measure of average prices at one point in time which will permit comparison between cities. In order not to generate artificial price differentials it is essential that the qualities, brands and sizes selected are sufficiently similar. Prices of approximately 60 items, consisting mainly of food and some personal care items and household supply items are collected in representative outlets in 26 cities. These cities are: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Regina, Saskatoon, Winnipeg, Edmonton, Vancouver, Victoria and Whitehorse. This survey is normally under taken during the first week of January, April, July and October.

In order that the average prices generated for one city will be comparable with those for another city, price collection is generally limited to widely available manufacturers' brands. For meat and produce, care is taken to narrowly define cuts and qualities. The goods and services tax (GST) and the provincial retail sales tax are included in the retail averages where applicable.

Calculation Methodology

City Prices. Prices are collected in both chain and independent stores. (A chain stores organization is defined as one operating four or more stores under the same legal ownership.) A city average price is calculated for each item by weighting the average prices obtained for chain and independent stores according to their overall market sales share in that city. For branded items sold under brand labels, an average price for each brand is first calculated in the manner described above; the brand averages are then weighted together to form the item average. The weight assigned each brand in this process is proportionate to the number of price quotes obtained for each of the brands in that city.

Appendice 4

PRIX DE DÉTAIL MOYENS PAR VILLE

Introduction

L'enquête sur les prix moyens de détail est effectuée afin d'obtenir une mesure adéquate des prix moyens, à une période donnée, qui permette une comparaison entre les villes. Il est essentiel que les qualités, les marques et les tailles choisies soient suffisamment équivalentes afin de ne pas introduire des différences de prix artificielles. Les prix de quelques 60 articles, principalement des produits alimentaires, certains articles de soins personnels et des fournitures de ménage, sont relevés dans de nombreux points de vente dans 26 villes: St. John's, Halifax, Sydney, Charlottetown, Moncton, Saint John, Chicoutimi, Québec, Trois-Rivières, Sherbrooke, Montréal, Hull, Ottawa, Toronto, Hamilton, London, Sudbury, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, Victoria et Whitehorse. Cette enquête est normalement effectuée durant la première semaine de janvier, d'avril, de juillet et d'octobre.

Afin que les prix moyens calculés pour une ville puissent être comparables à ceux d'une autre ville, l'observation des prix se limite généralement aux marques des fabricants largement distribuées. Dans le cas de la viande, des fruits et des légumes, on prend soin de définir avec précision les morceaux et les qualités. La taxe sur les produits et services (TPS) et la taxe de vente au détail sont ajoutées au prix de détail moyen s'il y a lieu.

Méthode de calcul

Prix urbains. Les prix sont recueillis dans les magasins à succursales multiples et les magasins indépendants. (Une entreprise à succursales multiples est définie comme celle qui exploite quatre magasins ou plus sous la même raison sociale.) On calcule un prix moyen par ville pour chaque article en pondérant les prix moyens recueillis dans les magasins à succursales multiples et dans les magasins indépendants selon la part de leurs ventes sur le marché général dans leur ville. Dans le cas ces articles vendus sous marque déposée, on calcule d'abord un prix moyen pour chaque marque déposée de la façon décrite plus haut: ensuite on pondère ensemble les moyennes des marques déposées afin d'en arriver à la moyenne pour l'article. Le poids assigné à chaque marque déposée lors de ce processus est proportionnel au nombre de prix observés dans la ville en question pour cette marque déposée.

Weighted city averages. A weighted city average price for each item is derived by weighting the relevant city averages. The importance of each city in calculating the weighted city average is determined by the volume of retail sales in that city.

Item Specifications

A description of the approximately 60 items covered in the Average Prices Survey can be acquired by contacting Prices Division.

Average Retail Prices for Gasoline

Tables 16 through 19 present average retail prices for two types of gasoline retailed in two types of filling stations. The information is collected on a monthly basis as part of the Consumer Price Index survey. Gasoline prices are collected at the pump from a sample of full service and self-serve filling stations in major urban centres across Canada. The prices collected included all applicable Federal and Provincial taxes. They are presented as average prices per litre of gasoline. The series presented in these tables are confined to the 16 urban centres for which Consumer Price Indexes are produced and cover the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to January 1979, are, however, based on the average prices per imperial gallon.

Average Retail Prices for Fuel Oil

Table 20 presents average retail prices for fuel oil. The information is collected nine times yearly as part of the Consumer Price Index Survey. Fuel oil prices are collected from a sample of distributors in major urban centres across Canada. The prices collected include all applicable Federal and Provincial taxes. They are presented as average prices per litre. The series presented in Table 20 are confined to 16 urban centres and for the time period January 1988 to the latest available. Data for previous time periods (for some urban centres going back to January 1957) and for an expanded number of urban centres are available upon request. The prices available for the time series prior to October 1980 are, however, based on the average prices per imperial gallon.

Moyennes pondérées des villes. Une moyenne pondérée du prix de chaque article pour l'ensemble des villes est calculée en pondérant les moyennes appropriées des villes. L'importance de chaque ville dans le calcul de la moyenne pondérée des villes est déterminée par le volume des ventes au détail dans cette ville.

Spécification des articles

Une description des quelques 60 articles contenus dans l'enquête des prix moyens peut être obtenu en communiquant avec la Division des prix.

Prix de détail moyens de l'essence

Les tableaux 16 à 19 présentent les prix de détail moyens de deux types d'essence vendus dans deux genres de stations. Cette information est relevée à chaque mois dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix de l'essence sont relevés, sur place, auprès d'un échantillon de stations offrant un service complet et de stations libre service dans les principaux centres urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ces tableaux sont ceux d'un litre d'essence. Les séries présentées se limitent aux 16 centres urbains pour lesquels on produit un IPC pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant janvier 1979 sont, toutefois, sur la base d'un gallon impérial.

Prix de détail moyens du mazout

Le tableau 20 présente les prix de détail moyens du mazout. Cette information est relevée neuf fois par année dans le cadre de l'enquête de l'indice des prix à la consommation. Les prix du mazout sont relevés auprès d'un échantillon de distributeurs dans les principaux centre urbains du Canada. Les prix comprennent toutes les taxes fédérales et provinciales. Les prix moyens contenus dans ce tableau sont ceux d'un litre. Les séries présentées au tableau 20 se limitent à 16 centres urbains, pour la période allant de janvier 1988 jusqu'au dernier mois disponible. Les données se rapportant aux périodes précédentes (remontant jusqu'à janvier 1957 pour certains centres urbains) et pour un plus grand nombre de centres urbains sont disponibles sur demande. Les séries avant octobre 1980 sont, toutefois, sur la base d'un gallon impérial.

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to

Appendice 5

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking an other complete survey.

parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 7 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 7 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

JOIN THE WITH THE MOST USEFUL AND ATTRACTIVE CANADA YEAR BOOK

On the occasion of the nation's 125th anniversary of Confederation, the 1992 Canada Year Book takes a unique look at the fascinating highlights in the development of Canada since 1867.

FVFR PUBLISHED.

Exceptionally popular among business people, journalists, librarians, parliamentarians, educators and diplomats for 125 years, the 1992 Canada Year Book is designed as a comprehensive reference source for the latest on economic, political, and social information on Canada and Canadians. And for the first time, this "special collector's" edition presents picturesque vignettes on Canada's past with informative, easy-to-read text.

Special features include:

- a new 22cm X 30cm (9" X 12") format
- larger typeface
- over 300 rare archival photos

• historical perspectives on Canada's past

• 22 chapters, 607 pages bound in deluxe hard cover

Time and time again, you'll reach for this compact encyclopedia to answer questions on all aspects of Canada.

- THE LAND
- THE PEOPLE
- THE NATION
- THE ECONOMY
- ARTS AND LEISURE

Available in separate English and French editions, the Canada Year Book (Cat. No. 11-402E) sells for \$49.95 (plus \$5.05 shipping and handling) in Canada, US \$60 in the United States, and US\$70 in other countries (includes shipping and handling).

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A OT6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster ordering, using your VISA or MasterCard, call toll-free 1-800-267-6677 or fax your order to (613) 951-1584. Please do not send confirmation.

EN VOUS PROCURANT L'ANNUAIRE DU CANADA LE PLUS UTILE ET LE PLUS ATTRAYANT JAMAIS PUBLIÉ.

PARTICIPE

L'Annuaire du Canada de 1992, qui marque le 125e anniversaire de la Confédération, jette un regard unique sur les grands moments de l'évolution du pays depuis 1867.

Cet ouvrage, particulièrement populaire depuis 125 ans auprès des gens d'affaires, des journalistes, des bibliothécaires, des parlementaires, des enseignants et des diplomates, est conçu comme un ouvrage de référence où l'on retrouve les données économiques, politiques et sociales les plus récentes sur le Canada et les Canadiens. Cette édition spéciale présente, pour la première fois, de pittoresques illustrations se rapportant à l'histoire du Canada de même que des textes informatifs et faciles à lire.

Au nombre des caractéristiques spéciales, on compte :

- un nouveau mode de présentation : 22cm x 30 cm (9" x 12")
- des caractères plus gros
- plus de 300 photos d'archives rares
- des perspectives historiques sur le passé du Canada
 - 22 chapitres, 607 pages reliées par une couverture rigide de luxe.

Cette encyclopédie compacte est un ouvrage indispensable pour répondre à vos questions portant sur tous les aspects du Canada.

- LE TERRITOIRE
 - LA POPULATION
 - LA NATION
 - L'ÉCONOMIE
 - LES ARTS ET LES LOISIRS

Vous pouvez vous procurer l'Annuaire du Canada (no 11-402F au Catalogue), en version française ou anglaise, pour 49,95 \$ (plus 5,05 \$ pour frais d'expédition et de manutention) au Canada, 60 \$ (devises américaines) aux États-Unis et 70 \$ (devises américaines) dans les autres pays (frais d'expédition et de manutention compris).

Pour commander, prière d'écrire au Service des Ventes des publications de Statistique Canada, Ottawa (Ontario) K1A 0T6, ou de communiquer avec le Centre régional de consultation de Statistique Canada le plus près de chez vous (voir la liste qui figure dans la publication).

Pour accélérer les commandes, utilisez votre carte VISA ou MasterCard ou composez sans frais le 1-800-267-6677 (téléphone) ou le (613) 951-1584 (télécopieur). Veuillez ne pas envoyer de confirmation.

without it

Get a jump on your work week by making sure you have the most current economic and social information in Canada. Travelling by first class mail or courier, Statistics Canada's digest, Infomat, arrives at the beginning of each week to help you monitor key economic indicators and keep up with the most current data releases from Canada's national statistical agency.

In eight fact-filled pages, Infomat highlights the findings of Statistics Canada surveys and brings them to your desk each week, often long before detailed reports are published. Throughout the year you'll get the first results of over 100 ongoing surveys and many special surveys—from manufacturing shipments to the health of Canadians or post graduate employment to part-time workers.

Each week, Infomat presents you with,

- concise summaries of fresh facts from over 100 ongoing surveys
- charts and graphs that let you instantly scan the trends
- Overview an outline of the subjects covered in each issue that you can scan in 30 seconds
- guidance on how to obtain special reports to assist you in your more detailed research.
- Current Trends and Latest Monthly Statistics sections that bring you up to date on the Consumer Price Index, Gross Domestic Product and 21 other key monthly series

Managers, analysts and researchers who are responsible for keeping up to date on changes in Canada's economic and social climate can count on Infomat — as a quick overview of the latest trends and as a weekly reminder of key indicators and data releases. Many subscribers use Infomat's highlights to add authority to their industry analyses, investment plans or corporate reports.

To order Infomat (11-002E), 50 issues annually for \$125 in Canada, US\$150 in the U.S. and US\$175 in other countries, write to Publications Sales and Service, Statistics Canada, Ottawa, Canada, K1A OT6. For faster service, use your VISA or MasterCard and call toll-free in Canada, 1-800-267-6677.

Don't start your week votre première lecture de la semaine

Commencez votre semaine de travail en vous assurant que vous avez sous la main les dernières informations économiques et sociales au Canada. Voyageant en courrier de première classe ou par messagerie, Infomat, le condensé de Statistique Canada, arrive au début de chaque semaine pour vous aider à suivre les principaux indicateurs économiques et vous tenir au courant des dernières données publiées par l'organisme national d'enquêtes du pays.

En huit pages remplies de données, Infomat présente les faits saillants des enquêtes de Statistique Canada et les dépose sur votre bureau chaque semaine, bien avant que des rapports détaillés ne soient publiés. Tout au long de l'année, vous avez les premiers résultats de plus de 100 enquêtes permanentes et de nombreuses enquêtes spécialisées, qui vont des expéditions des fabricants à la santé des Canadiens ou de l'emploi des diplômés universitaires aux travailleurs à temps partiel.

Chaque semaine, Infomat vous offre:

- des résumés de faits tout récents provenant de plus de 100 enquêtes différentes
- des diagrammes et des graphiques qui vous donnent immédiatement
- Aperçu une description des sujets traités dans chaque numéro, que vous pouvez parcourir en 30 secondes
- des conseils sur la façon d'obtenir des rapports spéciaux pour vous aider dans vos recherches plus poussées
- Les tendances actuelles et Dernières statistiques mensuelles, rubriques qui vous tiennent à jour sur l'indice des prix à la consommation, le produit intérieur brut et 21 autres séries mensuelles importantes.

Canada

Les gestionnaires, les analystes et les chercheurs qui ont la responsabilité de se tenir au courant de l'évolution de la conjoncture économique et sociale du Canada peuvent compter sur Infomat pour avoir une vue d'ensemble des dernières tendances et disposer ainsi d'un aide-

> mémoire hebdomadaire des principaux indicateurs et données publiés. Plusieurs abonnés utilisent les faits saillants d'Infomat pour relever l'autorité de leurs analyses industrielles, projets d'investissements ou rapports financiers.

Pour commander Infomat (11-002F), 50 numéros par an pour 125 \$ au Canada, 150 \$ US aux États-Unis et 175 \$ US dans les autres pays, écrivez à Publications, vente et service, Statistique Canada, Ottawa, Canada K1A 0T6. Pour un service plus rapide, utilisez votre carte VISA ou MasterCard et composez sans frais au Canada le 1-800-267-6677.

No other monthly report on the Canadian Economy has this much to offer

La seule publication à vous offrir autant d'information sur l'économie canadienne

Canadian Economic Observer

The most extensive and timely information source for people who want objective facts and analysis on the Canadian Economy... every month.

Current economic conditions

Brief, "to the point" a current update summary of the economy's performance including trend analyses on employment, output, demand and the leading indicator.

Feature articles

In-depth research on current business and economic issues: business cycles, employment trends, personal savings, business investment plans and corporate concentration.

Statistical summary

Statistical tables, charts and graphs cover national accounts, output, demand, trade, labour and financial markets.

Regional analysis

Provincial breakdowns of key economic indicators.

International overview

Digest of economic performance of Canada's most important trading partners — Europe, Japan and the U.S.

Economic and statistical events

Each month, CEO also publishes a chronology of current events that will affect the economy, and information notes about new products from Statistics Canada.

Consult with an expert

The names and phone numbers of the most appropriate Statistics Canada contacts are provided with each data table in the statistical summary; not only can you read the data and the analysis, you can talk to the experts about it.

The Canadian Economic Observer

(Catalogue no. 11-010) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster service, fax your order to 1-613-951-1584. Or call toll free at 1-800-267-6677 and use your VISA or MasterCard.

L'Observateur économique canadien

La revue la plus complète et la plus à jour qui soit pour les gens qui désirent des renseignements objectifs et une analyse de l'économie canadienne... chaque mois.

Les conditions économiques actuelles

Résumé bref et incisif de l'actualité économique du mois, comportant l'analyse des tendances de l'emploi, de la production, de la demande et de l'indicateur avancé.

Les études spéciales

Recherche approfondie sur les questions du domaine des affaires et de l'économie : cycles économiques, tendances de l'emploi, épargne personnelle, projets d'investissement et concentration des sociétés.

L'aperçu statistique

Tableaux, graphiques et diagrammes englobant les statistiques des comptes nationaux, de la production, de la demande, du commerce, de l'emploi

et des marchés financiers.

L'analyse régionale

Ventilation par province des indicateurs économiques stratégiques.

Le survol de l'économie internationale

Un sommaire du rendement de l'économie des partenaires commerciaux du Canada, comme l'Europe, le Japon et les États-Unis.

Événements économiques et statistiques

Chaque mois, L'OEC publie une chronologie des événements qui influenceront l'économie de même que des renseignements sur les nouveaux produits de Statistique Canada.

Consultez un expert

Les noms et numéros de téléphone des personnes-ressources figurent à chaque tableau de l'aperçu statistique; non seulement pouvez-vous lire les données et l'analyse, mais vous pouvez de plus discuter du sujet avec les experts de Statistique Canada.

L'Observateur économique canadien.

(nº 11-010 au catalogue) coûte 220 \$ l'abonnement annuel au Canada, 260 \$ US aux États-Unis et 310 \$ US dans les autres pays.
